Tunnels Of Luxembourg Make Good Place To Hide

By HAL BOYLE
LUXEMBOURG (Via Airmail) (AP)
The best foothold in Europe in the event of an atomic war is the Grand Duchy of Luxembourg.

This tiny postwar country has been prepared for 200 years against the dropping of the atom bomb. Deep beneath the breath-taking hills of its capital, one of the world's most picturesque cities, lie 17 miles of defensive tunnels.

"They were dug in the early 1700s, and they could easily hold everyone in the country," said David Ned Blackmer, 33, of 319th Street, N. Y.

The little monarchy, ruled by Grand Duchess Charlotte, is only 999 miles square and has a population of about 260,000.

Blackmer, an ex-G.I. decided after the war—like many another American soldier—he wanted to learn more about the lands he had fought across. So when he had recuperated from a severe head wound he came here to study the culture of Luxembourg.

"The people have been extraordinarily friendly and cooperative," he said.

Luxembourgers have had a wacky time trying to live up to their national motto: "We Want to Remain What We Are."

The country is a natural stronghold, a crossroads for invasion armies moving across Europe, and its name means "little fortress." It has been a military outpost since Roman times.

More than most small countries Luxembourg knows the cost of being a football in the big powers. It agreed in 1867 to demolish its fortifications in return for a guarantee of "eternal neutrality." Since then German troops have wheeled across it in three wars.

German commanders took what they wanted, even forced Luxembourgers to serve in their armies.

But this tiny dot of Europe is beginning to bristle. It has found "neutrality" doesn't pay.

"They are a little imperialistic now," laughed Blackmer. "They want a slice of Germany. That is they want the land—but not the Germans who live on it."

And Luxembourg has raised its pre-war army of 300 men to 10,000. This is really a token gesture, however, to give a legalistic basis to its claim that its soldiers should be treated as war prisoners rather than impressed into foreign conquering armies.

How long Luxembourgers could hold out in the event of another invasion attack is problematical—unless they were quickly reinforced.

"But they are wiring the old tunnels again," said Blackmer.

During the last war Luxembourg served as the headquarters of Gen. George S. Patton's third army and the U. S. ninth airforce. It was saved from destruction during the battle of the bulge in 1944, and the people are now strongly pro-American.

"They love American cars," said Blackmer, and there are probably more American-made cars per capita here than there are in the United States.

On the other hand, there are also more Luxembourgers in Chicago than there are in the capital city here, and more Luxembourgers in America than now live in Luxembourg country itself.

WHYTAL'S.

When the tempo is slow, the temperature high, there's nothing like a tall ice-filled drink. And, since the temperature is high and the most energetic soul feels lazy, drinks should be easily-prepared ones. A favorite cooler is Tall, Dark and Handsome, sparkling coffee. Into tall glasses, half-full of cold coffee, put a scoop of vanilla ice cream and fill glass with ginger ale.

Randall Foster and sister, Ruby Goehring, Mrs. Flora Byers, all of Klamath Falls, Mrs. Rosa Barkhurst and daughter, Adeline, of Merrill, and Mrs. Bert Albert of Chiloquin. Staying here as Mrs. Castel's house guest for two weeks is Adeline Barkhurst, who remained here Wednesday on her mother's return to Merrill. Spending Father's Day here at the home of their son and family were Mr. and Mrs. Alfred B. Castel Sr., who are making their home in Klamath Falls, Castel being employed there as salesman for the Puckett-Shearer mill.

Don Wimer and Western Engle spent the week-end here at their homes from Weyerhaeuser Camp 11 where they are employed as truck-drivers for the lumber company.

Little Sharon Hescoek, daughter of Mr. and Mrs. W. B. Hescoek, was taken to the hospital in Klamath Falls Monday night for treatment of a severe cut on her foot which happened when the foot was caught in the spoke of a bicycle she was riding. The foot was cut to the bone and Sharon was brought home Tuesday after receiving emergency care and staying overnight at the hospital.

Mr. and Mrs. Bob Wood and daughters moved Sunday from the Ival Knox residence to the Frank Edwards property on Wood river.

Mr. and Mrs. Jesse B. Matthews and family moved Sunday to Merrill to make their home. Matthews has been employed for some time past by the Klamath Farms, Inc., of Klamath Falls, as dragline operator, the family having rented the property of Mr. and Mrs. William Strahan here for some months.

Two local youths, James Leggett and Hescoek, returned Wednesday morning from a trip to Seven lakes, where they went the preceding Sunday morning, hiking on foot the distance of 11 miles to the lakes from the Seven mile ranger station west of here. The boys were on a scouting expedition to find out conditions at the lakes at this time and report that there is scarcely any snow on the trail and although there is still about six feet at the lakes it is melting fast and will be gone in a short time. There is still ice on all the lakes with the exception of Grass lake, and the deer are very numerous and tame, coming into the boys' camp at night and eating some of their supplies, including a bar of soap. Two bears were seen on the trail on the trip

in to the lakes and the squirrels were plentiful.

The boys had no fishing tackle with them, so they passed the time by target practice at the squirrels. Incidentally, the supply of canned goods, etc., cached there last year by campers, even the trying pans and cooking utensils, were all gone, and a note was found pinned to the inside of the supply cache with the single word "suckers" written by some would-be outdoor sport who does not abide by the unwritten law of sportsmen everywhere.

For the trip, the two boys had carried on their backs packages containing 30 pounds each of provisions and camping gear, including sleeping bags, but had depended on using some of the supplies of food left at the lakes last year. However, as a result of the cache being raided and the food taken, they were forced to subsist on a

diet consisting mostly of canned pork and beans, and to make their coffee in an old tin can which they found there, the coffee pot being gone, too, of course. In spite of the fact that they did not particularly enjoy pork and beans for breakfast, the boys enjoyed the trip and stay at the lakes very much and are planning on going back later by means of saddle and packhorses for a longer camping trip at this ideal camping and fishing spot. They make the trip to the lakes every year, as do a number of other local and Chiloquin boys.

When is a raincoat not a raincoat? Well, that is an easy one to answer. Many raincoats are treated to make them water-repellent while others are really waterproof. The waterproof coats will always be raincoats until they are worn out, but the water-repellent ones will lose their chemical treatment after constant wear or trips to the dry cleaner. The moral—know what you are buying.

Pint-Size Fashions For the pintal crowd to cut capers in come FOURTH OF JULY, will send you off on a buying spree if you'll take a "quickie" look in SPENCER'S window this week.

Pint-Size Fashions For the pintal crowd to cut capers in come FOURTH OF JULY, will send you off on a buying spree if you'll take a "quickie" look in SPENCER'S window this week.

But here's a tip... don't take Sue or Sam if your intentions are negative for they'll hound you over the hill until you ante.

Our son is a gangling six-footer but just this once we're wishing he were in the 3 to 6 gang just so he could wear the cunning cream colored leather chaps and jacket, all touched up with brown and green... the woolly chaps with fleece top-side... the wee Lewis... shrieking sport shirts and belts all trimmed with beads.

You'll gather, and dig deep when you see the little cotton gingham sport clothes, trousers and jacket as cleverly cut as Poppa's and the loud colored ties that fairly shout FUN.

For that would-be cowgirl... DO ask to see this suit!... red corduroy skirt and jacket with white leather fringe... SO cute and our own Sue ready for college.

SPENCER'S, we found this week, certainly has EVERYTHING that your small-try will LOVE for Fourth of July frolicking... Get along now to 619 Main street.

SOMETHING TO TALK ABOUT and better to eat are the Chinese delicacies from the PELICAN CANDY JAR... SCOOP of the month in newspaper jargon is the news that you can find imported crystallized ginger from Canton \$1.00... preserved ginger in a darling pottery jar of Chinese blue \$1.45... water chestnuts and bamboo
