

### Scout Camp Staff Said 'Best Ever'

Camp Makulla, the official Boy Scout camp of the Modoc area council, has one of the best staffs ever assembled to handle the summer camp at Crescent lake.

Headed by Kenneth E. Pearson, field executive from Bend, the camp has filled to capacity this week. With Del Yantis as program chairman, Dillard Shipley as assistant, and Hollie Hill leading waterfront activities, this year's program is turning out to be one of the best ever held.

Others of the staff include Myrtle Stratton, head cook; Mrs. Ernst, assistant cook; Darrell Palmer, program aide; David Rasmussen, ranger and camp stockkeeper; Richard Landis, ranger and camp bugler; Hill Brandness, steward and ranger and Robert French, steward, program aide and ranger.

A total of 102 Scouts and adult leaders were present on opening day.

### Temperatures Leveling Off

By The Associated Press

Temperatures leveled off to nearly normal marks over most of the country today.

Cool air moved over parts of the northern plains and northern Great Lakes region, sending the mercury slightly below average figures. The mercury was in the high 40s and 50s in some of the cool belt early today.

There were quite a few wet spots, but no additional rain was reported in the northeastern drought area. However, some relief to the parched crops resulted from yesterday's showers.

Rain fell today in parts of Illinois, Michigan, Wisconsin, and another wet belt extended from Eastern Virginia to the Carolinas and into Georgia. Some showers also were reported in Tennessee and Eastern Kentucky, and in scattered sections of the Rocky mountains.

Yesterday's highest temperatures included 112 at Yuma, Ariz., 109 at Phoenix, Ariz. The mercury was in the 90s over most of Texas.

### Dr. Driggs To Speak On Monday

### Science Finds A Way To Make A Tough Old Rooster Into A Delicious Broiler

By ROBERT E. GEIGE

WASHINGTON, July 13 (AP)—Scientists can cut a chicken's personality to many different patterns by feeding it chemical substances and hormones, which are extracted from glands.

The big question now is this: Will these substances have the same effect on the people who eat the chickens as they did on the chickens?

Tough old roosters become tender when they lose their interest in hens. The barnyard is peaceful.

"That's why we are very careful in approving these new substances for use in chickens intended for eating," says one official of the food and drug administration.

"We can't be sure yet what effect some of these drugs might have on people.

"There may be some tough-minded human beings whose personality couldn't be changed by a ton of this stuff. But we have to protect the women, and young people who might be more sensitive."

Hormones control such things as and ability to put on fat. Chemical substances manufactured in the laboratory, called synthetic estrogens, imitate the results of some hormones.

Hormones and synthetic estrogens, fed in extra quantities, do such things as make chickens put on feathers faster, make birds fat by slowing down the life processes and make hens lay more eggs. Besides, there are those roosters that quit crowing and fighting and lose their sexual activity.

Now that synthetics can be manufactured, scientists are finding a lot of new uses for them. They may

help revolutionize the poultry business because the eating qualities of birds can be improved substantially and birds can be made to put on weight faster.

The government has approved the use of synthetic estrogens contained in a pellet inserted in the chicken's neck. The chicken absorbs the content of the pellet. Then, when his head is chopped off, the pellet goes along with it. This protects people from eating any large dose that might remain in the pellet.

But it is unlawful to use some hormones and synthetics in chicken feed.

People who have eaten hormone-treated chickens say it is delicious meat.

Louis Franke of Texas Agricultural and Mechanical college says he took some from a college experimental flock.

"You had to be careful frying those birds," he says. "They were so tender that by the time one side was browned, the whole chicken almost fell apart."

Franke didn't know, at the time, they were hormone-treated broilers. He thought they must be a new breed because they were so unusually delicious.

One combination of hormones tried at the Texas college put weight on chickens almost twice as fast as other chickens gained. When they were dressed they had about four per cent more meat in ratio to bone and other inedible parts than other chickens.

At a recent meeting of veterinarians one scientist told of a tough old rooster that lived only to fight, boss the hens and create a barnyard disturbance.

A few shots of female sex hormones made him quit crowing and strutting. And the scientist said solemnly this old rooster squatted like a setting hen trying to find a nest of eggs to hatch. He even clucked like a hen that has laid an egg.

The government food expert, discussing this case, said one serving of this old bird's meat wouldn't turn a cavalry officer's voice to soprano. But when it comes to the public and humanity in the mass, he added, the government can't be too careful.

### Camera Club Takes Over In New Quarters

The Klamath Camera club moved into its new home in the main hangar at the airport Saturday night.

An old eight by 10 foot darkroom used by the navy has been turned over to the club and will be used as a printing darkroom. A smaller darkroom, four by six feet, will be used for developing. Both darkrooms have lower ventilation. There

is also a large meeting hall 40 by 50 feet and plenty of storage space.

Plans are to equip the place as soon as possible for use of members, with proper facilities for finishing pictures.

Next meeting will be held at 8 p. m. July 20. Each member is asked to bring 10 slides for study in regard to composition and lighting.
