

Krug Asks Big Cut In USBR Funds

WASHINGTON, July 14 (AP)—Secretary Krug said Wednesday he believes other appropriations should be cut to allow more money for developing the nation's natural resources.

He told the house public works committee such development would create an industrial might that would prepare the nation for any emergency.

Krug was being cross-examined on his previous testimony urging congressional approval of the administration's Columbia Valley administration bill.

Had it not been for the Tennessee Valley authority and power produced in the Pacific Northwest, he said, the nation's air program and atomic bomb project might not have been so effective during the last war.

Krug had estimated congress should give the proposed CVA \$250,000,000 to \$300,000,000 a year for Columbia river basin development.

He said similar expenditures have been running \$150,000,000 a year and this year would approach \$250,000,000.

Rep. Pickett (D-Tex.) asked where, in view of declining federal income, will the money come from.

"I have thought for a long time," Krug replied, "that we have neglected things at home that need to be done. We could cut somewhere else."

Krug reiterated his views that the CVA would do a better, faster and more economical job than is being done now by the army engineers and reclamation bureau.

He said similar expenditures have been running \$150,000,000 a year and this year would approach \$250,000,000.

Rep. Pickett (D-Tex.) asked where, in view of declining federal income, will the money come from.

"I have thought for a long time," Krug replied, "that we have neglected things at home that need to be done. We could cut somewhere else."

Marriage Licenses
SMITH-BRANDHAM—Charles H. Smith, 21, laborer, native of Michigan, resident of Oregon, Philip Jean Brandham, 18, student, native of Oregon, resident of Klamath Falls.

Complaints Filed
Margaret M. Kiplinger vs. E. D. Miller, suit for annulment of marriage. Purported marriage took place in Reno, Nevada, June 21, 1948. Parties and lawyers, attorneys for plaintiff: Helen Houshain and Harold A. Houshain, suit for annulment of marriage. Purported marriage took place December 18, 1948, in Reno, Nevada. William Kaysen, attorney for the plaintiff.
Laura H. Herford vs. William Herford, suit for divorce. Plaintiff charges cruel and inhuman treatment. Couple married in Reno, Nevada, on April 10, 1948. Plaintiff wants custody of two minor children, and \$20 support for next ten months or \$200 lump sum for attorney and support to cover expert birth of child. A. C. Vaden, attorney for the plaintiff.
Edna J. Shives vs. James P. Shives, suit for divorce. Plaintiff charges cruel and inhuman treatment. Couple married January 27, 1904. J. C. O'Neill, attorney for the plaintiff.
Bessie Jones vs. Carl H. Jones, suit for divorce. Couple married August 3, 1906. Plaintiff charges cruel and inhuman treatment. Wants custody of minor child, and \$100 support for plaintiff and child during father's minority. Also wants property settlement. J. C. O'Neill, attorney for plaintiff.
Lillian Thompson vs. Wilford Thompson, suit for divorce. Plaintiff charges cruel and inhuman treatment. Wants custody of minor child, and \$100 support for plaintiff and child during father's minority. Also wants property settlement. J. C. O'Neill, attorney for plaintiff.
William Arthur Metaker, no stop light on trailer. Fine \$5.00.
John Oliver Arm, no warning device. Fine \$5.00.
Robert Bruce Hix, overhauling obey. Fine \$10.
Donald Leroy Daulton, failure to obey stop sign. Fine \$5.00.
Paul Jackson, violation of the basic rule. Fine \$7.50.
Rosa Althea John, no operator's license. Fine \$5.00.
Lloyd Malcolm Runyon, trailer of excessive width. Fine \$7.50.
James Taylor, no operator's license. Fine \$5.00.
Walter Schenk Garner, no operator's license. Fine \$5.00.
Peter Clark McFarland, violation of basic rule. Fine \$5.
Lloyd George Murphy, no vehicle license plates. Fine \$5.00.
Federico Cruz v. Zeussport, drunk on a public highway. Fine \$15 or seven days in jail.

No, Snapper isn't "going to pot!" He just heard that this squaw was hard to photograph so he's just using the good old Snapper technique. Part of that technique for getting good pictures can be adopted by everybody. That's just to see that your cameras and film supplies are bought from camera specialist. That's us, folks.

4000 FEET DOWN—And still going. This picture shows the oil derrick of the United Company of Oregon at Burns, where encouraging signs have been located.

Owners Keep Hopeful Eye On Burns Oil Well Shaft

BURNS, Ore., July 14—Stockholders in Southern Oregon and Northern California are watching closely the progress made by the drillers at the test well of the United Company of Oregon in the field near Burns, where surface and depth indications are favorable for the discovery of oil in commercial quantities when sufficient depth is gained.

Reports within the past few days give encouragement that the oil shaft may be reached when the hole goes through the line capping in which the drill has been working. Gas and oil in small quantities have come to the surface.

With 70,000 acres under lease, the United company will control a large area for future development in the event the hopes of those backing the enterprise are realized. Funds for development work have been raised largely through local subscriptions.

Capitalized for \$400,000, slightly over half of the stock has been sold. It is planned now to dispose of \$40,000 more of the capital stock to insure the company will have sufficient funds to finish No. 2 hole.

Geologists have examined the area showing oil formations, and have reported to the officers of the United company they are well justified in the testing of the field. At the present depth of about 4000 feet, the log of the well bears out the opinion of the oil experts who have made surveys and studied the formation.

For some time the work near Burns has been closely followed by large concerns, who are interested in the progress made.

Among them are the Love Drilling company, a large operation of Louisiana, which is considering the sinking of test wells in the district. Drilling for the United company is being done by the Big Basin Drilling company of Newcastle, Wyo., this concern having had experience for a long period in the extensive Wyoming oil fields, which state is now the fourth in production of oil in the United States.

Officers and directors of the United company are the following: President Edwin V. Anderson; vice president, J. Verne Shangle; secretary, George Jackson; directors, Glen Bown, Mac Lemmon, Ralph Green and Neil O. Davidson, all

No Brakes, Even At Service Stop

GARDEN CITY, Kas., July 14 (AP)—John Luther Fry drove his car to the garage Tuesday night to get his brakes fixed, but couldn't stop.

He turned into the motor company driveway and found his car had no brakes at all. The vehicle hit a door post and broke a plate glass window in the showroom.

Fry was embarrassed about the whole thing. The garage promised to have the brakes repaired soon.

Grain Care Important

Dry grain is less susceptible to insect damage which is responsible for 300,000,000 bushel losses each year, according to OSC Extension Entomologist Robert W. Evers.

Every gives some ABC's for reducing insect damage, first emphasizing clean storage bins. All grain from last year's crop should be removed with its possible insect contamination.

Spray cleaned bins with five per cent DDT emulsion, applied at the rate of one gallon to each 1000 square feet of bin area.

Two fumigants are recommended by the entomologist for insects already present in grain. A mixture of ethylene dichloride and carbon tetrachloride or chloropicrin, commonly known as fear gas, are two fumigants. Feed, seed and grain supply houses have both chemicals stocked.

Bill Asks Better Rural Phone Line

WASHINGTON, July 14 (AP)—The house Wednesday passed legislation designed to provide better rural telephone service.

The bill now goes to the senate.

The measure allows the rural electrification administration to make long term loans to private companies or cooperatives to build and extend telephone facilities in rural areas.

The interest rate would be 2 per cent, the same amount now charged on REA loans for electric lines. Reps. Allen (R-Ill.) and Brown (R-Ohio) tried to hike the rate but failed. Allen proposed 2.5 per cent. Brown 3 per cent.

Grasshoppers Moving In On Farm Crops

PULLMAN, Wash., July 14 (AP)—Hot weather has driven swarms of grasshoppers from the dry ranges to cultivated fields in nine Eastern Washington counties, a Washington state college entomologist said today.

So far the damage has been localized. Injury to crops ranges from slight to severe in the areas affected.

David Brannon, extension entomologist at WSC and state grasshopper control leader, said hopper damage has been reported in parts of nine counties. They are Adams, Columbia, Garfield, Kittitas, Lincoln, Stevens, Whitman, Yakima and Asotin counties.

The insects have damaged wheat, oats and other grains, some garden crops, and alfalfa.

Brannon said the grasshopper threat to crops will remain for three or four more weeks.

Brannon advised farmers in damage areas to use two new poisons, chlordane and toxaphene.

Woman Electrocuted While Ironing

HOUSTON, Tex., July 14 (AP)—The 41-year-old mother of 14 children was electrocuted Wednesday as she ironed clothing in her backyard.

She was Mrs. Viola Williams.

Capt. Charles Nix of the sheriff's office said Mrs. Williams had gone outside to iron because it was cooler. She was barefoot, he said, and the ground was damp, making a good electrical contact.

Nix said a neighbor quoted Mrs. Williams as saying a few days ago there was a short in her iron.

PORTLAND, July 14 (AP)—A fat, and then drifted away again, drunken passerby apparently got mad Wednesday.

He walked up to a stranger's car, smashed the windshield with his fist, and then drifted away again, muttering.

A woman was seated alone in the car, which was owned by Bertrand W. Reed, Seaside.

MOSQUITO WAR

PRINEVILLE, July 14 (AP)—An aerial attack on mosquitoes was launched today by the Prineville Lions club.

The group plans to spray lowland pools and sloughs with DDT.

Years of research pioneering guarantee LUCKIES ARE A FINER CIGARETTE!

Constant research at Lucky Strike's famous cigarette laboratory—America's largest and most completely equipped—is devoted to giving you a finer cigarette!

THERE is no finer cigarette in the world today than Lucky Strike. Here's why: Lucky Strike means fine tobacco. And every step in the making of Luckies—from before this fine tobacco is bought until the finished cigarette reaches you—comes under the watchful eye of the largest and most completely equipped cigarette research laboratory in America.

For many years, the famous Lucky Strike laboratory in Richmond, Virginia, has been a center of cigarette science and technology. In this remarkable building you can see a fascinating collection of scientific instruments—microscopes, spectrophotometers, balances, projectors, humidification chambers, and many other complicated and costly machines.

Working with this array of scientific equipment are more than 60 highly trained specialists—chemists, biologists, engineers, physicists. They work on tobacco, on finished cigarettes, on paper, foil, cellophane and even printing inks. For Lucky Strike scientists have for years delved into cigarette research on an extensive scale.

Today, because of the miracle of modern science, Lucky Strike is a finer cigarette.

Testing tobacco. Samples from every tobacco-growing area are analyzed before and after purchase. These extensive scientific analyses, along with the expert judgment of Lucky Strike buyers, assure you that the tobacco in Luckies is fine, light and mild. No wonder Luckies are a finer cigarette.

Luckies stay fresh. After Lucky Strike cigarettes have been packaged, they must be tightly sealed to remain fresh. Here you see the cellophane seal being tested for air-tightness. Such instruments are in constant use at every plant.

We know:

LUCKIES PAY MORE

for fine tobacco

(millions of dollars more than official parity prices)

We are convinced:

LUCKIES PAY MORE

for cigarette research

Prove to yourself Luckies are finer—Get a carton today!

COPY. THE AMERICAN TOBACCO COMPANY.

Research leads the way. Only constant, painstaking, exhaustive research—as conducted on a large scale through the years by The American Tobacco Company—could produce the scientific knowledge that results in the quality of Luckies.
