

# Oregon Tech Campus Gets Going Over During Long Summer, Changes Made

Many physical changes will greet returning students at Oregon Tech, Monday, August 1. Class locations, buildings, grounds, and roads have been altered.

Several building roofs have been repaired and recoated. The Nickerson hall (old mess hall) roof gleams with its aluminum heat reflecting surface.

The heating plant has been overhauled and the boiler No. 5 placed in service. Automatic regulators and controls have been repaired

and tested. Both of these changes should result in reductions of coal consumption, officials feel.

Gunsmithing moves from its first shop in Cornett hall to Nickerson hall. The old shop was designed for 12 to 15 students with over 30 in attendance. Business training, accounting, and business management leave the Snell hall to take quarters in the instructional materials building, along with office machinery repair.

Several porch decks have been painted for the first time since the state took over. Three painters have painted trim of buildings devoid of paint and repainted the cafeteria and other inside areas.

New lawn area near the gate house will afford space for football practice in combination with L. Guest House lawn. The gym floor, needing refinishing when the school started, is being resoled.

The roadway around the main shops at Cornett hall is being oiled for a smooth surface. Snow plowing will be possible in that area for the first time this winter.

Some of the playground equipment sponsored by the Faculty Wives club and provided by Klamath business people is installed. The balance is under construction.

Projected repairs include paving the road to apartment buildings B11 and B12. It will then be named Texas street. Erection of airport buildings for lumber storage and a maintenance vehicle garage, repairs to roads are other needed improvements included in the budget. Several dark spots will be lighted by extension of the street lighting system.

## US Steel Income On Way Down

NEW YORK, July 27 (AP)—Net income of United States Steel corporation declined to \$44,123,595 in the second quarter this year, the corporation reported Tuesday. This compared with \$49,328,070 for the first three months of 1949.

Directors of "Big Steel," meeting after the New York stock exchange closed, ordered a dividend of 50 cents a share on the corporation's new common stock. It was made payable September 10 to shareholders of record August 3.

On the old common shares, a dividend of \$1.50 was declared three months ago. Since that time each holder has received two additional shares for each share held, to effect a three-for-one split of the stock.

U. S. Steel's second-quarter net income is equal to \$1.45 a share on the more than 26,000,000 common shares now outstanding. On the same basis, the net for the preceding three months was equal to \$1.67 a share.

In the second quarter of 1948, income of \$25,585,877 or 73 cents a share of the increased number of common shares was reported.

## Volunteer Brigade Formed In Prague

PRAGUE (AP)—The Czech government announced through its press agency that it had recruited 177 boys and girls from all over the country to ship to Poland as a "volunteer brigade in the reconstruction of Warsaw." They will be engaged in house building and in road building.
