

### Building In Northwest Shows Dip

A definite dip in the volume of building and construction activity in Northwest cities is evident in the Pacific Northwest Building Data bulletin for June.

The majority of Washington, Oregon and Idaho cities report drops this June over the same month in 1948.

While Klamath Falls June, '49, figure is lower than June, 1948, the \$141,000 Sacred Heart parish job boosted the month's total far above May, 1949. The construction of the new gym and parish hall is also listed as one of the Northwest's major current building jobs.

A comparative table of some of the Oregon cities which reported in the bulletin follows:

City	June, 1949	June, 1948
Albany	\$211,996	\$22,666
Bend	\$130,500	75,905
Corvallis	77,810	186,725
Eugene	\$14,545	748,955
Klamath Falls	169,478	285,282
Medford	200,585	445,890
Roseburg	104,508	325,400
Springfield	208,417	233,985
