

City Dads Will Present Two Highway Proposals To New Road Group For Study

City councilmen last night made an initial move toward solution of some of the city traffic problems when they agreed unanimously to place two highway proposals before the city highway committee for study.

Both proposals originated on motions by Councilman Wendell Smith. Smith's first suggestion was the establishment of an additional artery from the south suburban area to the heart of the city.

Smith explained that such a road would relieve congested traffic on South Sixth and East Main and felt that the latter two thoroughfares were inadequate in handling the growing volume of traffic.

Although termed as a long-range plan, Smith argued that the rapid growth of the suburbs would some day make imperative such a highway.

The second proposal which met with council approval was using Alameda from Main to Shasta way as a freeway. It was explained that

plans are underway by the state to improve this stretch and it would handle a heavy load of travel.

In other highway matters, the city dads put their stamp of approval on having Tom Watters represent the city of Klamath Falls in urging speedy improvement of the South Sixth street viaduct, labelled last week by the city highway committee as the city's "number one bottleneck."

Watters is meeting today with the state highway commission in Salem. Fire protection at the city hall came up for discussion at last night's council session when Fire Chief Henry Akin turned in a list of recommendations for council perusal.

It was strongly emphasized that the main stairway in the city hall is the only exit in the event of a fire.

The recommendations, designed to improve safety conditions in the building, were turned over to the fire committee, building inspector, fire chief and the police judge for study.

It was stipulated that this group have power to act if sufficient funds could be found in the budget for the work.

Bids were opened on the Wall street paving but acceptance of the bids is contingent upon what the district school board does.

The original plan of installing a 20-foot paving strip on the hill leading to the high school was temporarily suspended with the thought of expanding the work to 10 more feet and also installing curbs.

City Engineer Thomas said the school board expressed willingness to share in the cost of the task but it also felt that property owners should carry part of the financial load.

Final decision will be made this week, it was intimated.

Scrapping of city records—including receipts, warrants and licenses—was a suggestion before the councilmen from the police judge's office.

It was felt the office of the police judge was unnecessarily cluttered with old records.

City Attorney Henry Perkins expressed the opinion that 10 years of records should be kept on hand. The matter was given the city attorney, police judge, and the judiciary committee to study with power to act.

With the shipment of 32 trial meters due this week, the city fathers agreed to place them in the high-valued district on Main between Sixth and Eleventh and place the meters taken from the district on Main between Eleventh and Eleventh junction, on the west side of Seventh between Oak and Klamath, and on Ninth between Walnut and Klamath.

Five bids were opened for a ton-and-a-half dump truck for the street department; three were submitted for a police department paddy wagon.

The bids will be studied and awarded next week.

Librarian Exams To Be Conducted

Examinations for positions as librarians in various federal agencies have been announced, and applications are now being accepted.

Those appointed from the examination will work in federal libraries in Washington, D. C. and vicinity, at salaries, ranging from \$3727 to \$4235.

Further information and application blanks may be obtained from L. E. Probst at the Klamath Falls post office or from the civil service commission, Washington 25, D. C. Applications must be received in the Washington office not later than August 23.

No Excise Tax Cuts Seen Soon

WASHINGTON, Aug. 2 (AP)—House Democratic Leader McCormack (Mass.) said after a White House conference Monday he sees no prospect for repeal of taxes at this session of congress.

McCormack, in addition to his party and means committee which originates tax legislation.

McCormack and other democratic congressional leaders discussed the tax situation and other matters at their regular Monday morning session with President Truman.

Other conferees were Vice President Barkley, Speaker Rayburn and Senate Majority Leader Lucas.

When Lucas was asked about the possibility of tax legislation he referred questions to McCormack, asserting the matter was in the jurisdiction of the house committee.

"Everybody is for repeal," McCormack said, "but when you open up the question of repealing excise taxes, you open up the question of repealing them all and raise the possibility of another \$1,700,000,000 loss in revenue.

"You can't lose this much revenue without further unbalancing the budget and without levying other taxes to replace the excise taxes."

Polio List In US Tops 8000 Cases

By The Associated Press

Infantile paralysis cases showed a sharp increase in some states in the last year, boosting the nation's total far ahead of 1948, a near record year.

The number of polio deaths for the first seven months of 1949, an Associated Press survey showed, is about double the total up to August 1, 1948.

The survey showed approximately 8000 cases and 442 deaths. However, data on fatalities was sketchy and incomplete in some states on the number of cases.

Many communities, fearing epidemics in the heavy polio months of August and September already have taken emergency measures. State health officials and leaders of the National Foundation for Infantile Paralysis are taking all precautions to prevent the outbreak or spread of the disease.

Second Highest

The 27,680 polio cases reported in 1948 were the second highest of record but up to August 1, 1949, the total was under 5000. The world polio year was 1916 when about 30,000 cases were reported.

Increases in the number of cases over last week's figures were reported in New York, Illinois, Indiana, Minnesota and Wisconsin. The 1122 cases in Texas did not include the number stricken in the last week in July.

New York state reported 482 cases, with 353 in the New York City metropolitan area, the largest number of cases in any big city. California reported 794 cases; Oklahoma 498; Arkansas 492; Illinois 376; Michigan

370; Minnesota 362, and Indiana 242.

The National Foundation for Infantile Paralysis has advanced \$3,501,365 to its 40 chapters up to August 1 this year, twice as much as granted in a similar period in 1948.

The outbreak in Muncie, Ind., resulted in a ban on public gatherings, including funeral services.

Although California reported 794 cases, authorities said the incidence was only half as high as last year.

Hillside Work Being Pushed

It will probably be another week before patients are moved back to Hillside hospital with the final painting repairs at the building holding up the transfer, hospital directors indicated today.

All the Hillside patients—numbering 28—were evacuated as a precautionary measure the afternoon of July 21 when a fire started on the roof of the building, causing fire, smoke and water damage, totaling \$2200.

Patients have been housed in Klamath Valley hospital since the fire.

Motor Court Rent Curb Not Seen

WASHINGTON, Aug. 2 (AP)—Senator Cain (R-Wash.) said today rent control on motor courts and trailer parks in Washington and Oregon will be removed by the end of the week.

He said House Expediter Tighe E. Woods told him the action will be decided on surveys just completed.

Controls were reestablished on such lodgings by the 1949 rent control act. The ceilings already have been lifted from courts and trailer parks in California.

Finding The Rainbow Is Easy, Supply Plentiful

By J. HUGH PRUETT
Astronomer, Extension Division, Oregon Higher Education System

The summer shower that passed beyond us. On the dark, stormy clouds in the east a gorgeous rainbow was painted by the setting sun as it shone over the western horizon. So near were the retreating raindrops that the lower end of one arm of the arc was clearly outlined between us and the hills, scarcely one-quarter mile away.

Someone suggested telephoning the professor across the street to the north, for he also delights in brilliantly-colored rainbows. "But," said another, "he couldn't see this nearby arm of the rainbow, for from his house it is behind that tall fir." No, he couldn't see the same one we did, but he would see one of his very own in exactly the same direction from him as was this one from us. Came the surprised response, "Do you mean the eastern sky right now is packed full of rainbows?"

That was precisely the meaning. No two people see exactly the same one. Each observer must be content with his own rainbow and forego the pleasure of viewing the solid sheet of exquisite prismatic colors that covers a large section of the heavens.

Two bows are sometimes seen when the display is unusually brilliant. The primary bow has the violet on the inside and on through the blue, green, yellow and orange to red on the outside. The secondary bow appears at some distance outside the arc of the primary, is dimmer and has the colors reversed with the violet on the outside. Inside the primary there occasionally appear narrow bands of color, principally red and green, known as supernumerary bows. These are interference effects.

When sunlight is passed through a glass prism, it is broken up into

the various rainbow colors due to refraction and dispersion. The falling raindrops opposite in direction from the sun act in the same way, then reflect the light back to us. Any high school physics text explains this.

The center of a rainbow, the point to which one end of an imaginary string might be fastened while the other swings out the arc as with colored crayons, is directly opposite the sun for the observer. The observer's back must be turned on the sun. The outside of the primary bow is a curve everywhere 42 degrees from this sun-opposite center; the outside of the secondary, 54 degrees. If the sun is on the western horizon, the bow-center is on the eastern horizon and the bow appears as only a half-circle.

Where is the rainbow? As far away as the falling drops that produce it. It may be nearer than a hill or beyond it. The larger the drops, the narrower and brighter the bow. Thunder storms produce the largest drops and finest rainbows.

**FRENCH SWIM SUIT
DRAWS SHOPP VETO**
NEW YORK, Aug. 2 (AP)—None of those scanty French bathing outfits

will ever reveal the charms of Miss America of 1949.

"They are not decent and I don't think American girls should wear them," says the 18-year-old beauty queen, Hebe Shopp of Hopkins, Minn.

She gave her veto when questioned by photographers yesterday as she left by plane for a trip to Europe.

Paris and French shore resorts are among her ports of call, but if she makes any bathing suit appearances it will be U. S. style.

Milk is a perfect food for the development of bacteria.

KIDNEYS MUST REMOVE EXCESS ACIDS

Help 15 Miles of Kidney Tubes Flush Out Poisonous Waste

When disorder of kidney function permits poisonous matter to remain in your blood, it may cause swelling, backache, rheumatic pain, leg pain, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness. Frequent or scanty passages with smarting and burning sometimes show there is something wrong with your kidneys or bladder.

Don't wait! Ask your druggist for Doan's Pills, a stimulant diuretic, used successfully for millions for over 50 years. Doan's give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

Western Band To Play Here

Western music will hold the spotlight at the army Wednesday night with Tommy Duncan and his Western All-Stars holding down the bandstand.

Dancing is from 9 till 1, and KFLW will carry a broadcast at 9:30 p. m.

Duncan was formerly featured with Bob Wills in the vocal department and just recently organized his own band.

Duncan's aggregation is heralded as one of the finest Western musical combinations of all time in that each musician is a featured artist in his own right.

OSC Man To Aid Portugal Growers

CORVALLIS, Aug. 2 (AP)—Myron O. Crepey, associate professor of agricultural engineering at Oregon State college, left Monday for Portugal, where he will serve as consultant to the government on potato storage problems for the next two months.

Crepey is the third OSC agricultural specialist to be "drafted" for foreign service in the past few months. Dr. Harold F. Holkado, professor of agricultural economics, is already in Paris on a year's leave of absence to work with the ECA. Dr. W. L. Powers, head of the soils department, has been granted from three to five months leave for special work in Turkey.

In the late summer, the striped skunk rats many grasshoppers and crickets.

Two Crews Jump On Brush Fire

Crews worked from both sides to quench fire which broke out at 2:10 p. m. Monday near Hildebrand along the reservation line.

Klamath Indian reservation men worked on the fire from their side of the boundary and KFLPA men worked it from their side, bringing it under control at 4:32 p. m. Men went out again Tuesday morning for mop-up operations.

It was a lightning fire and covered a couple of acres of brush and juniper land before it was stopped.

NOW! Dental Science Reveals a Startling Discovery in the Fight Against Tooth Decay

PROOF THAT BRUSHING TEETH RIGHT AFTER EATING IS THE SAFE, EFFECTIVE WAY TO

HELP STOP TOOTH DECAY with Colgate Dental Cream

X-RAYS SHOW HOW PROPER USE OF COLGATE'S HELPS STOP TOOTH DECAY!

Eminent dental authorities supervised 2 groups of college men and women for over a year. One group always brushed their teeth with Colgate's right after eating. The other group followed usual dental care. X-rays were taken at regular intervals.

The average of the group using Colgate Dental Cream as directed was a startling reduction in number of cavities—far less tooth decay! The other group developed new cavities at a much higher rate!

Regular visits to your dentist are necessary for complete dental care. No home method can help everyone; nor can it stop all tooth decay or help cavities already started!

NO OTHER DENTIFRICE OFFERS PROOF OF THESE RESULTS

The Most Important News in Dental History!
Exhaustive Research on Hundreds of People by Eminent Dental Authorities Proves How Using Colgate Dental Cream Helps Stop Tooth Decay Before It Starts!

NOW dental science offers scientific proof that brushing teeth with Colgate Dental Cream right after eating is an effective, proved way to help prevent new cavities, greatly reduce tooth decay!

More than a year's continuous research—hundreds of case histories—makes this the most important news in dental history!

For now—the same toothpaste you use to clean your breath while you clean your teeth—offers a safe, proved way to reduce tooth decay!

Colgate's Is Safe—Not An Experimental Formula!

Colgate Dental Cream has been proved to contain all the necessary ingredients—including an exclusive patented ingredient—for effective daily dental care. No risk of irritation to tissues and gums!

Now the Colgate Dental Cream now at your dentist is the same formula that was used in the tests.

You can use Colgate's with confidence. And using it as directed is a safe, proved way to avoid needless cavities—actually help stop tooth decay at home!

To The Dental Profession

The research described here was conducted in leading dental clinics under the supervision of some of America's foremost dental research authorities.

A detailed report of the tests is now in preparation and will be available for your use and study in the near future. If you wish a copy, send your request on your own professional letterhead to Colgate, Jersey City 2, N. J.

These studies represent the most exhaustive evidence ever offered to the dental profession of actual reduction of cavities. They present scientific proof that always brushing teeth right after eating is one of the most effective ways yet known to help stop tooth decay before it starts. And Colgate Dental Cream is the only dentifrice that can prove the statements reported here.

NO CHANGE IN FLAVOR, FOAM, OR CLEANSING ACTION!

Millions know that Colgate Dental Cream cleans their breath while it cleans their teeth. That its wonderful wake-up flavor is preferred over all other dentifrices tested. That no other toothpaste does a better job of cleaning teeth. And there has been no change in Colgate's famous flavor—its marvelous foaming quality—or its safe and thorough cleansing action!

Mothers! Children Love Colgate's Flavor!
It's Easy to Start Them On The Colgate Way To Reduce Tooth Decay!

9 out of 10 children have one or more decayed teeth by the time they enter school. So don't wait another day to start your children on Colgate Dental Cream. Teach them the importance of always brushing their teeth right after meals or snacks. They'll love Colgate's flavor—so it's easy to get them to use Colgate's correctly. Give them all the benefits of this safe, proved way to reduce tooth decay!

Portland Punch

You can't stop it from Cooling You Off!

REFRESHING as a mountain pool-tasty, ripe berries—LUSCIOUS-COOL

3¢ per Glass

JUST ADD WATER!

The drink-thrill of '49
One Bottle makes 6 full pints.
Stays Fresh! Tastes wonderful!

• The pure, natural flavor of Loganberries and Raspberries... concentrated so richly that one 12 ounce bottle actually makes 6 full pints of wonderful beverage.

Ask for Portland Punch at Your Dealer's!

COLGATE RIBBON DENTAL CREAM

Always use Colgate's to Clean Your Breath While You Clean Your Teeth and HELP STOP TOOTH DECAY!

There is only one Colgate Dental Cream! YOUR DEALER HAS IT NOW—IN THE SAME FAMILIAR PACKAGE

* Right after eating
