

# Mike Drops Count Against Criminologist

PORTLAND, Aug. 6 (AP)—Democratic Sheriff Marion Leroy (Mike) Elliott of Multnomah county is recalled, a democrat will be named to succeed him.

The county's two republican commissioners agreed on that yesterday. The third commissioner is a democrat.

Recall petitions continued in circulation as the sheriff dropped the charges that touched off the recall move.

Those were his charges against criminologist Stanley Mac Donald yesterday. He reinstated Mac Donald with back pay, and did not ask for a hearing on the charges that Mac Donald had misused county materials and was insubordinate.

A prepared statement from Elliott said, "Sheriff Elliott feels that his act of suspension was justifiable, but since the board of county commissioners approved of the arrangement of Mr. Mac Donald taking on outside work, that he has immediately reinstated him."

Mac Donald was suspended July 7.

**SPECIALISTS VIEW CROPS**—Agriculturists of the University of California and 200 Tulelake growers were present for the annual field day Thursday sponsored by the Tulelake experiment station and the Tulelake Growers. The above picture shows a part of the crowd gathered at the station to view crops grown on the 13-acre field at the station before moving to the Growers' transient labor camp at Newell for dinner.

# Larsen Goes To Finals, Whips Ampon

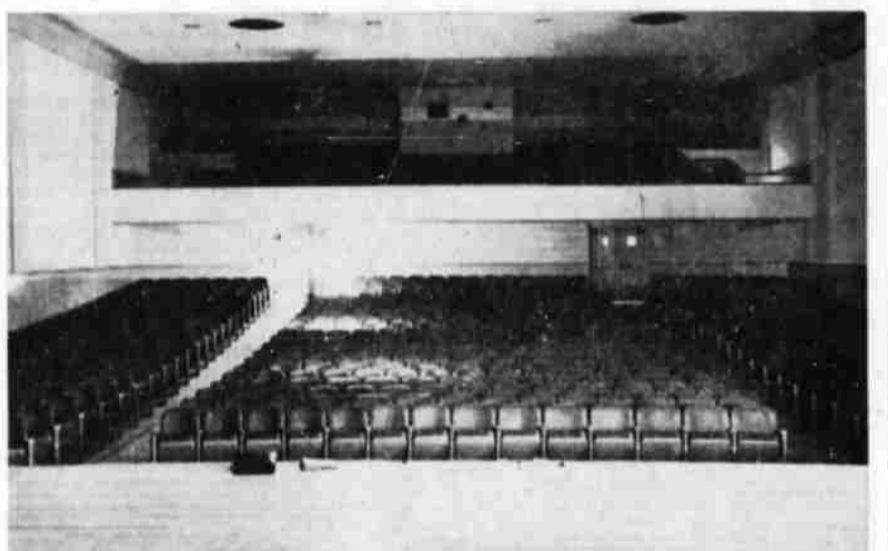

SOUTH ORANGE, N. J., Aug. 6 (AP)—It will be top seeded Billy Talbot of New York vs. fourth seeded Gardner Mulloy of Coral Gables, Fla., today in the semi-finals of the eastern grass courts singles championships.

Winner of this match will meet Art Larsen, eighth seeded San Francisco, tomorrow in the title match at the Orange Lawn Tennis club.

Larsen scored one of the biggest upsets of the tourney yesterday when he whipped pint sized Felisimo Ampon, giant killer from the Philippines.

It took Larsen five grueling sets to humble the mighty midget, 10-8, 5-7, 1-6, 6-3, 6-1.

Doris Hart of Jacksonville, Fla., and Shirley Fry of Akron, Ohio, will meet in the finals of the women's singles tomorrow.

**AUDITORIUM OPEN SOON**—The New Mills auditorium, which is almost completed, will boast a feature viewed for every building of its nature. The auditorium seats are so arranged that the view of the stage from any point is unobstructed either by another person or by beams. The seating capacity is over 800.

# Cerdan, LaMotta Rematched

NEW YORK, Aug. 6 (AP)—Marcel Cerdan of France will get his chance to win back the world middleweight title from Jack LaMotta on September 23 at the Polo Grounds.

The International Boxing club made the announcement yesterday that the champion from the Bronx, who took the title from Cerdan by a knockout last June 15 at Detroit, will defend his crown at the home of the New York Giants.

Cerdan is expected to return here August 19 to train at Loch Sheldrake, N. Y.

The Frenchman injured his shoulder in the June fight, but reports from abroad say that ailment has entirely disappeared.

# Boeing Work Shift Seen

WASHINGTON, Aug. 6 (AP)—The air force has confirmed reports that it is considering the transfer of some Boeing bomber plane production from Seattle to the company's Wichita, Kas., plant.

A spokesman said later yesterday Secretary of Air W. Stuart Symington, members of his staff, and Senator Magnuson (D-Wash.) will fly to Seattle late this month for conferences with Boeing officials.

Magnuson reported the entire production situation will be discussed. He emphasized, however, that any changes would only involve a shifting of work between factories and would not mean cancellation of current contracts for work being done in Seattle.

The air force spokesman concurred with Magnuson and said production of C-97 cargo planes and B-50 bombers in Seattle would not be affected by the proposed change.

In Seattle, Boeing pointed out that the C-97 and B-50 are the only military planes being built there along with a few component parts of the B-47 jet bomber.

The Boeing Wichita plant is engaged in limited production of the B-47. The trip of the high air force officials to Seattle is believed planned with the idea of concentrating all jet bomber work in the Midwest.

# Gen. Taylor To Take On German Post

BERLIN, Aug. 6 (AP)—Maj. Gen. Maxwell D. Taylor, wartime paratroop leader, officially was named today to command the American military government and army forces in Berlin.

He will be given this double-barreled authority, a formal statement said, "in order to unify the United States position in Berlin."

The statement said he would assume his position at a date to be announced later, but presumably in September.

Taylor will succeed both Brig. Gen. Frank Howley, military government commandant, and Col. James T. Duke, who has commanded the Berlin military post.

The statement, issued by the headquarters of U. S. army forces in Europe, said Taylor would be the personal representative of High Commissioner John J. McCloy and Lieut. General Clarence R. Huebner, acting commander-in-chief.

Taylor, who came to Europe last February after three and a half years as superintendent of West Point, has served until now as Huebner's chief of staff.

As head of American military government here, Taylor will take over one of the most rigorous assignments in the cold war.

His predecessor, Howley, who plans to return to private business in Philadelphia, was the target of a constant attack by communist propaganda.

# Crash Pilot Tells Of Fatal Takeoff

SEATTLE, Aug. 6 (AP)—The injured pilot of a C-46 airliner that claimed seven lives in a crash July 19 testified yesterday just before the close of a CAB hearing that engine trouble did not show up until after the takeoff.

Merle Edgerton, brought before the civil aeronautics board panel in a wheelchair, said the left engine began to sputter as the Air Transport Associates' non-scheduled charter plane was leaving the ground.

Earlier, three witnesses told the CAB investigators an engine was backing before the plane began speeding down the runway.

The presiding officer at the hearing, Russell A. Potter, said CAB headquarters in Washington, D. C., would issue a preliminary report on the crash within a few days.

# Crop Specialists Meet At Tule Experiment Station To Talk Current Problems

TULELAKE, Aug. 6 (AP)—Crop specialists of the University of California, farm extension leaders of Siskiyou and Modoc counties and some 200 Tulelake farmers were present Thursday for the annual field day sponsored by the Tulelake experiment station and the Tulelake growers.

Prost control was one of the principal subjects brought up for discussion but farmers were not given much encouragement for any plan here that will give basin-wide protection by Ralph Parks, extension specialist in agriculture engineering, of Davis.

The usual run of control, which includes smudging, wind machines and smoke screens, are prohibitive in cost for areas where crops are not concentrated. Parks said.

Control of weeds which encourages radiation from the soil is one of the best and cheapest methods of keeping the temperature in check.

Low spots are the areas that suffer damage first and a variation of 20 degrees at an altitude of 30 feet have been noted here.

The visitors viewed plots of alfalfa, pasture grasses, the new lotus, a legume, sugar beets, 75 varieties of two-row barley and other grains, fertilizer trials and truck crops at the experiment station.

Lotus, a new legume, is detrimental, if mixed with alfalfa since seeds are almost identical and difficult to separate.

Dinner was served at 2:30 visitors under the direction of W. F. Currier, manager of the association.

During the afternoon a tour by bus was conducted to a number of farms in the area.

Here for the meeting were Dr. B. A. Madson, director of field stations in California; Dr. J. E. Knott of the truck crops division, University of California; E. Batchelder, su-

# Industrial Accident Rate Shows Drop

SALEM, Aug. 6 (AP)—Oregon's industrial workers are getting more careful.

The state industrial accident commission reported Friday that it had 54 per cent fewer claims in the first half of this year than it did during the first half of last year.

And this record was made in spite of the fact that there was 1 per cent more man days worked.

The commission had 20,927 claims for compensation in the first six months of this year. Half of them were for injuries severe enough to cause workers to lay off their jobs, and 329 were for occupational diseases. There were 63 claims for deaths, which was 5.9 per cent less than in the similar period of last year.

There were 25 men killed in logging accidents, 7 in construction work, and 6 in agriculture.

The field program was directed by Burton Hoyle, manager of the Tulelake experiment station.

# Milk Cap Law To Be Enforced

SALEM, Aug. 6 (AP)—Milk distributors after September 1 will have to use bottle caps which cover the pouring lip of the bottle, the state department of agriculture warned today.

The department adopted the regulation September 1, but it gave the distributors a year to change over.

Another regulation effective September 1 will require trucking hauling milk for bottling to be completely enclosed. This doesn't apply to producers who haul their own milk.

Producers hauling their cans will have to have their cans protected from dust and direct rays of the sun.
