NEW YORK, (NEA)—Permanent pleats are science's gift this fall to the school girl.

Pleats educated to stay creased by baking-at-high temperature processes will spread their charms over classrooms and campuses at no extra cost for upkeep. A promise of this good behavior for six months to skirts with knife pleats, box pleats or accordion pleats—a written guarantee of California designer Stephanie Koret.

Well aware that a school girl can keep down the size and cost of her wardrobe with switchable units, this designer makes "separates" of pleated skirts and of tops that oblige all down the line from blouse to caftan.

Smart new blouse styles that can be worn out like a middie or in like a skirt is Koret's new torso-fitting wool jersey. Striped spirally like a barber's pole in two-toned colors, such blouses were designed to be the gay upper half of pleated skirt fashions. Typical styling of those is seen in the solid color wool jersey skirt, knife-pleated to look as straight as a plumb line when static, as fluted as an unfurled fan when it goes into action.
