Poultry Expert Slates Talk

Trends in eastern and midwest poultry production will be discussed by Dr. H. M. Scott, who is the head of the University of Illinois poultry department, at the fifteenth annual meeting of the Oregon Poultry Improvement association. The meeting will be held Thursday.

The all day meeting will begin at 10 a. m. daylight saving time, in the OSC Memorial Union building. On the two days following the meeting, the annual pullorum testing and flock selecting school will be held. Plans for the testing and school call for laboratory glass work one day, August 18, and practical and written examinations the following morning.

Among the OSC poultry department staff members who will appear on the association program

are Dr. J. E. Parker who will discuss ways and means of improving fertility in hatching eggs, and Dr. Paul Bernier, who will speak on flock improvement.

Feed dealer, field service representatives, poultry producers and hatcherymen are all invited to the meeting whether they are members or not.

Applications For NSI Payoff Ready

Applications for GI insurance dividends may be made August 29. All veterans who carried insurance at any time may apply. The applicant need not be carrying the insurance at the present time. Beneficiaries of service men will be sent dividend applications direct from the Washington office.

On the 29th the application blanks will be available at all first and second class post offices, veterans administration offices and veterans organizations.

Ram Sale Set For Sept. 12

The ninth annual ram sale will be held at the Lakeview fair grounds Monday, September 12. Two hundred rams have been consigned to the sale which is sponsored by the Fremont Sheepmen's association. Auctioneer Earl Walters, Piler, Ida., has taken the bids every year since the sale started.

and will handle the gavel again this year.

The committee has arranged for Ramboulllets, Columbias, Pannamas, Suffolks, Hampshires and crosses bred sheep in numbers estimated to take care of demands. Range rams are extremely hard to

locate according to Elgin Cornett, sale manager, and it will be difficult for sheepmen to find producers who can supply the need.

The sale committee has done its best to line up rams that are available from the entire Northwest.

"Activated" Shell Premium is the most powerful gasoline your car can use!

YES, many of today's engines have been stepped-up... they call for more powerful gasoline! Now Shell gives you the most powerful gasoline your car can use—Shell Premium—it's "activated." No other fuel can top its power in your car!

This is made possible by Shell's own, specially produced power components and by Shell's own blending methods!

Actually, Shell splits molecules to get more power for today's more powerful engines. So you get a gasoline that's "activated" 3 ways!

- 1. Activated for knockless power!**
 Pulling hard in low gear or traveling at full throttle, Shell Premium delivers full, quiet power!
- 2. Activated for fast "getaway."**
 Shell Premium delivers the extra power you can feel—no "balking," no "stuttering"—you go!
- 3. Activated for full mileage.**
 Shell engineers "balance" Shell Premium so that every drop of fuel goes to work for you!
