

4-H Garden And Canning Exhibits Larger This Year

Larger and better exhibits in the 4-H garden and canning divisions of the junior livestock show are entered this year, second year that these groups have participated and public interest was much more enthusiastic.

In spite of late frosts, gardeners, flower growers and canning enthusiasts entered excellent products. The entries were shown in the exhibit building of the Klamath county fairgrounds where a food preservation demonstration and judging contests took place.

Canning and food freezing exhibits were judged by Mrs. Lee Holloway, Lakeview, gardens were scored by Walt Jendzejewski and flowers and gardens were judged by C. B. Cordy, county agent in horticulture, Medford.

Winners in the various divisions will travel to bigger fairs in the near future.

The champion sister team in food preservation demonstration contest, Shirley and Kay Johnston, Keno, Pat Tucker and Edmona King, Malin, champions in the food preservation contest and Reina Hurlbut, Keno, winner of the special canning contest will spend their way to Salem to the state fair next week, representing Klamath county.

All other winners including the royalty of this division, canning queen Hazel Bradshaw, Bonanza, Garden queen, Nora Meeker, Henley and the brothers who raised the prize garden, Perry and Jerry Williams, Altamont, walked away with county awards.

Church Memorial Is Proposed

PORTLAND, Sept. 1 (AP)—A landmark church near Woodburn should be set aside as a memorial to the early settlers in Marks prairie, a Union Pacific railroad official believes.

W. W. Morrison, passenger agent at Cheyenne, whose hobby is Oregon trial landmarks, saw the 75-year-old Rock creek church for the first time this week.

He noted that although the building has been unused for 25 years, the benches, altar and organ are intact. A pioneer graveyard is nearby.

Ferns, Plants New Aids In Cancer Fight

NEW LONDON, Conn., Sept. 1 (AP)—Beautiful ferns and flowering plants are providing science with new tools in studies aimed at helping unravel the mystery of human cancer, a Harvard biologist said today.

Dr. Ralph H. Wetmore said recently-developed techniques employing such plants opened up the possibility of studying certain aspects of growth and development in a manner now impossible or difficult.

Plants provide a better means than animals for studying certain subtle changes in tissue development that may occur as a result of various influences that can be brought to bear by researchers, he said.

"And it is the hope of various investigators carrying on such studies," he added, "that they will lead to new insight into the particular factors involved in producing the wild growth of cells known as cancer."

Dr. Wetmore made the statements in an interview on the eve of a symposium to be held at Connecticut college here by the Society of study of development and growth.

Indian Committee Meet Postponed

Indefinite postponement was announced Wednesday for the joint meeting of the Klamath Indian business committee and a special eight-person council committee which had been set for September 6.

It was announced at the agency the meeting will be held off until tribal delegates return from Washington, D. C. The delegates, Dick Crane and Boyd Jackson, are expected to leave shortly for the capital.

He said Dr. George Morrell of the University of Paris, now doing research at Harvard, had been able to produce a "cancer-like" growth in a grape plant by employing a large dose of a hormone that normally occurs in grape and other plants.

But he added that the production of such effects in the laboratory does not necessarily mean that the same agents produce them when they occur naturally in a living system.

Don't be caught cold without heating oil

Get ready for the first cold spell—have your heating oil tank filled Now!

The first cold snap always comes as a surprise—especially to folks with empty fuel tanks. That's why we recommend a heating oil refill right now. You can't go wrong...whether you need heat for your home next week or next month, you're always ready—with a fuel tank that's filled and at your service. We'll take care of it today—just call us.

You'll prevent contamination, too, because water condenses on the walls of an empty tank—but it can't in a tank that's filled. Save yourself trouble and discomfort by ordering Standard Heating Oil right away. Standard Furnace Oil for furnaces and Standard Stove Oil for circulating heaters give you more for your money in fast, clean heat.
