

Sallies... by SALLY

In Mac Epley's column "Beach Combing" in the Long Beach Press-Telegram he tells an amusing little story. He says "And then there's the story of the vulcanized doll. That one comes from a service station where the doll was presented for repair by a young miss. It was one of those rubber dolls with special facilities for dampening its diaper. The doll sprung a leak in the water chamber and the resourceful girl took it down to the service station to have it patched. And now, thanks to science, it again gives demonstrations of one of humanity's minor problems."
