Bouquets to You, You, You And YOU!

By BILL JENKINS

THE largest crowd ever to attend a parade or public party in Klamath Falls turned out for the city's Christmas party last night. That scene was the pretty general opinion of most of those who went down and took it in. No official estimate of the crowd has been made, but it will run to at least 10,000 and perhaps more. Which is quite a little thing to turn out in a city of this size. Especially in the face of a biting north wind.

All the bouquets have already been tossed to those who got behind the effort and put it over. The only ones left to thank are those who took part in the parade. And with the memory of that frigid wind still clear in our minds, let's not forget the girls who turned out in drum majorette uniforms, the girls and boys on the floats and all the others who braved the cold (and flu) to make the parade a success. It was a swell party. Hope we can do as well in years to come.

NO wonder our grandparents were giants of their day. It is entirely plausible that they conquered the West, the Indian, the weather, the soil and the other hazards, hardships and pitfalls in their trek toward new homes. They had to be giants of mighty strength. Not so much to plow a straight furrow or to drive a team of oxen or shoot outlaws, but to be able to stand up under the strain of square dancing. Old histories tell of parties that started at sundown and lasted till sunup, with the men and women still responding gallantly to the calls of aleman left and dooce doe.

After several weeks spent in trying to master the intricate art of folk dancing there is a quite large group

of young people in Klamath Falls, Merrill, Malin, Henley and all the other spots around and about who are willing to admit that they aren't in as good shape as they thought they were. You find more muscles you didn't know you ever did in gardening, mowing the lawn or playing tennis.

It is not a sport for sissies. Only those who are willing to buckle down and hang on through sheer grit and doggedness need apply for the parties. Quite a group of them assembled last night, and I'll bet there are a lot of stiff and sore people this morning.

But, it's just like duck hunting. You go hunting, get wet and cold and miserable and fall in and get mud in your ears and swear you'll never go again. Then the next day you're up at dawn, looking for a good puddle to fall in. Same with square dancing. You are sure you will die before another dance rolls around, but if by some miracle you should live you won't go. The dance comes and there you are. It's fun. It's rugged. It's different and it's popular. Quite a handful of the faithful even turn out once a week at the community college and take courses in the art. That's fun, too, once you get used to it.

Until you have investigated for yourself, however, don't ever say that square dancing is only for sissies and those of retarded mentality. You need to be rugged, and it takes a lot more skill to go through the forms of a square than and waltz, conga or samba.

LOOKS like a Jet Plane TRAVELS the same way

YOU see it quick-stepping along the highway—and you can't miss the parallel.

You glimpse a bold front end—sleek tapering fenders—flaring, streamlined roof lines—even to "double bubble" taillights, here is the look of "the fastest thing that flies."

Then you try one on the road, courtesy of your Buick dealer.

Adjectives flock into mind—"agile"—"nimble"—"eager."

You realize that here is *action*, swift and easy—action born of Fireball valve-in-head straight-eight power—action floated on soft coil springs that, for all their lightness, keep your grip on the road sure-footed and firm.

This you tell yourself, is traveling as traveling should be.

Comfortable—in the spacious manner of king-size interiors. Easy—in the lightness of controls, which can include even the magic of Dynaflo Drive* if you wish. Pleasurable—in the wide, wide outlook that's yours, and the inner satisfaction of having a Buick for your very own.

And we might add another thing, just by way of being practical.

It's frugal too. Frugal in a first cost that's actually less than for some sixes. Frugal in the surprising way such a sizable car gives the go-by to gas pumps.

And if you have Dynaflo, frugal even in many up-keep costs you can forget about—such as clutch troubles, transmission maintenance, even many engine servicing costs.

*Optional at extra cost.

Why not put yourself into one of these jet-lined beauties right now? It's more easily managed than you might imagine—as you'll see by talking to your Buick dealer.
