

BOMB PLOT FAILS—Detectives examine carton containing 30 sticks of dynamite described as "enough to wreck the building" which were found in Christmas wrappings in an outside basement stairway of the C. I. O. United Auto Workers headquarters building in Detroit, Mich. A blotted fuse, which was lighted but went out, spoiled the plot. Authorities believe the plot was hatched by the same "network" that tried to assassinate U. A. W. President Walter Reuther and his brother.

Timber Yield Hearing Set For March 7

LAKEVIEW—Date for a public hearing on the proposed federal sustained yield timber unit has been set for Tuesday, March 7, 1950. It was announced in Lakeview Tuesday by Merle S. Lowden, supervisor of the Fremont national forest. He announced that the chief forester of the U. S. forest service, in Washington, D. C., has approved the application for a hearing.

The hearing will begin at 10 a. m. in the circuit court room of the county courthouse. It will be conducted by officials of the forest service and opportunity will be given to hear testimony and receive evidence for and against the proposal.

Requested
The hearing was requested about three months ago by the industrial committee of the Lake County chamber of commerce after more than a year of study and consultations. Ray E. Harlan is chairman of the committee.

The proposed unit would encompass the federal forest timber within the Lakeview working circle (private timber within the area would not be affected).

Purpose of federal timber units is to assure adequate annual supply of federal forest timber within the area involved and to retain the benefits of payrolls and timber income from primary sawmilling and some re-manufacture of that time within the area.

Trial
Such unit, under the application, would be established first for a three-year trial period. Under a statement of policy filed with the application for hearing by the industrial committee, federal timber within the unit would be sold only to firms that would do the primary sawmilling within the area and with the agreement that the timber would undergo an average of five man-hours of re-manufacture per thousand board feet (the committee pointed out that at present re-manufacture of timber within this area amounts to about 10-man hours per thousand).

Under the statement of policy, it would require that 85 per cent of the federal timber involved would undergo primary sawmilling and its average quota of re-manufacture within the federal unit area.

Lowden has announced that the sustained yield supply of timber in the proposed unit, during the three-year trial period has been estimated at 40,000,000 board feet of pine per year and about 10,000,000 board feet of white fir and other species.

One tree may have as much as 80 gallons of water evaporated from its leaves in a single day.

New Plane Promises High Speeds

LOS ANGELES, Dec. 23 (AP)—The world's fastest-on record—plane, the F-86A Sabre, has a big brother that may be even speedier.

North American Aviation disclosed yesterday that the YF-86D has received its first test flight at Edwards air force base. The company's veteran test pilot, Joe Lynch, indicated that the plane can do everything that the Sabre does and then some. The Sabre has the official world mark of 670 mph.

The YF-86D has a new air intake duct under the nose and a larger aft fuselage section to house a more powerful jet engine. The plane has a 37-foot wingspan, is 41 feet long and 14 high.

Germans Protest Russ Captives

BERLIN, Dec. 23 (AP)—The West Berlin city council last night accused Russia of holding captive over 1,000,000 German war prisoners—some of them women and children. The Germans said a resolution passed by the council, were being held despite repeated Soviet promises and agreements to return them. The resolution said some of the women and children were living under sub-human conditions in the Soviet zone.
