Stock Gains, Losses Make Even Mixture

NEW YORK, (AP)—The stock market turned to a fairly even mixture of gains and losses in late trading today after a hesitant advance.

Price changes were in small fractions for the most part. Advances or declines of a point or more were rare.

The volume hovered around the 1,800,000 shares as it backed away only slightly from its brisk opening.

Trading was selective and while most traders were optimistic for the long term future they also were cautious in their transactions.

There was larger than usual interest in mining stocks after the weekend decision of the Canadian government to sell part of the dominion gold production for non-monetary purposes in world markets.

The Canadian market holiday today brought exceptionally large activity to the mining and oil shares on the New York curb.

On the "big board," Howe Sound, a gold and copper mining operation, pushed ahead two points at one time.

DOOLITTLE RIFT

XENIA, O., (AP)—Mrs. Elva S. Doolittle of Fairborn has filed suit for divorce from Maj. of Gen. Doolittle, Greene county common pleas court records show.

Hunters Keep Firemen Busy

Hunters were still giving fire guards in the basin forests a run for their money over the weekend.

Klamath Forest Protective association crewmen tackled a fire along the road near Pitchlog creek south of Bly, early this morning. They reported the blaze was burning in a pile of logs and was about 100 feet long.

Modoc national forest service cremen yesterday quelled an 80 acre blaze in the Stone Cove valley area near Adin which raced through drying grasslands but stopped abruptly when it hit the still-wet timber.

One bulldozer and 20 men were mopping up the blaze today.

KFPA fire guards agso tackled a fire burning in the top of a green tree—apparently a holdover lightning strike in the Bear butte area near Boundary springs.

Fremont national foresters reported, however, that though hunters may be negligent in handling their fires, others have been of great help.

One hunter last week took care of a fire he discovered, then reported it to the forest headquarters in Lakeview.

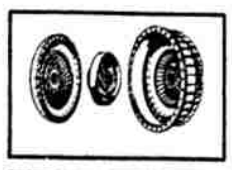
Here's why Fordomatic puts them all in the past!

For the past year, automotive writers, engineers and owners have been raving about a new kind of automatic driving...
and here's why you get it only in Ford Cars:

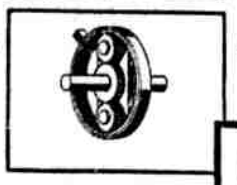
All the power you need when you need it is yours with Fordomatic. You'll find it the most thrilling experience you ever had. You'll discover the advantages of having... the smooth going that automatic drives employing torque converters can give you... plus the zip, control, and savings that cars with automatic gears can give you. For Fordomatic combines the finer features of all other automatic drives!

IT GIVES YOU INSTANT "GO"!
Because Fordomatic gives you a combination of the best features of all other automatic drives, it delivers instant "go" for exceptionally easy, exceptionally smooth starting, passing, and hill climbing. Its extra Intermediate Gear gives you a push of extra power any time you want it... extra braking power, too, that's outstandingly smooth.

Some automatics have this
The automatic drive some cars offer you is a torque converter which multiplies torque without the use of gears. Its advantage is a smooth flow of power. Its disadvantage is a smaller range of torque multiplication which requires more power from the engine and an uneconomical axle ratio which increases costs.



Some automatics have this
Other cars offer an automatic drive that uses automatic gears (as illustrated in simplified form at right) instead of a torque converter. The advantage here is more "go," more control and greater economy. The disadvantage is that this system is not as smooth, nor as jerk-free as a torque converter.



But Fordomatic has both

IT PRACTICALLY DRIVES ITSELF!
Fordomatic drives your car for you better than you could ever drive it yourself. It brings you a completely new thrill in no-shift-lever, no-clutch-pedal driving, because its development began where all other automatic drives left off!

Yes, Fordomatic has a torque converter plus automatic gears. It brings you only the advantages of both drives and eliminates the disadvantages.

Unlike cars with only a torque converter (which start and cruise all in one drive gear), Fordomatic starts fast and smooth in Intermediate Gear then shifts itself into Drive Gear.
