Rummage—Kappa chapter of Beta Sigma Phi will have a rummage sale 9 a.m. to 5 p.m. Friday and Saturday at Clark Motor Co. 531 S. 6th.

Conference—Mary Egan, Eleanor McKillop and Marlene Mingo, all of Sacred Heart, attended the third annual Catholic high school press conference at Gonzaga university.

Halloween—Eagles lodge will have a Halloween party Saturday, 7:30 p.m., for children of members.

Blood Purge Charged Reds

By SPENCER MOOSA

TAIPEH, Formosa, (U)—The Chinese Nationalists say heads are rolling again in a new and greater blood purge on the Communists mainland.

The defense ministry asserts that the new program of blood-letting calls for the extermination of anyone suspected of secret disaffection with the Red regime or with the previous purges.

MASSACRES—The ministry estimates more than 200,000 Chinese have been massacred in Kwangtung province alone in the new phase of the blood purge. Kwangtung is the South coastal province long a seat of revolt and unrest.

The Communists are supposed to be paying special attention now to former employees of the Nationalist government—from once-high officials to office boys.

The ministry estimates more than 200,000 Chinese have been massacred in Kwangtung province alone in the new phase of the blood purge. Kwangtung is the South coastal province long a seat of revolt and unrest.

Rains Come, No Brownout

PORTLAND, (U)—There won't be a power brownout in the Pacific Northwest—at least not until after November 7.

That was the statement of Bonneville administration officials yesterday. They said the stream flow in the Columbia river was high enough to insure the continuation of interruptible power loads to the region's aluminum plants until that date.

In fact, a spokesman said, the situation is optimistic for the critical period ending about the last of March. There is a chance that firm power commitments can be met through that period, he said. This reversal of last month's prediction is due to heavy rains.

Excess water is running over spillways at both Grand Coulee and Bonneville dams.

Greenland 3 Islands?

GODTHAAB, Greenland, (U)—A French scientific expedition says it has found that Greenland, regarded as the world's largest island, is really three separate islands bridged by an icecap.

This was one of the results of a 26-man expedition led by Paul

opened that Negroes, though qualified for membership, were banned by a secret ballot.

The labor commission ordered the union to halt the practice.

The first elevated transport line, built in New York in 1867, went broke.

Negroes Win, Union Quits

PORTLAND, (U)—A Portland union, ordered to accept Negroes, has become inactive and its officers have quit.

That was the report yesterday of William E. Kinsey, state labor commissioner, and William W. Rozelle, former president of the union.

Kinsey said the union—a local of the AFL brotherhood of railway carmen—had become inactive. Rozelle said all the officers had resigned, some of them because of the commission's order to admit Negroes.

Kinsey seemed to hold the officers responsible for the action of the union and the officers just decided they would not stick their necks out any more," Rozelle said.

The union was charged last summer with violation of the state's new fair employment practices law.

Emile Victor and disclosed here by his close collaborator, Capt. Gaston Rouillon. The scientists have returned to France after several years' research in the Greenland wilderness.

They measured the thickness of the icecap by setting off explosions and calculating the time it took

for the echo of the blast to resound from the ground underneath. The maximum thickness of the ice was found to be two miles.

Rouillon said the scientists found that Greenland was divided into three islands by "two deep sounds running under the icecap from coast to coast."

Patient Needs Big Escort

TORRANCE, (U)—When Eugene Adkins, 29, entered Harbor general hospital, he had an official escort of five firemen, one policeman, two ambulance attendants—and a laundry truck.

That's what it took to move Adkins' 602 pounds from his Long Beach home to the hospital for an operation. He is paralyzed from the waist down as a result of an automobile accident.

Tropical snakes wound around tropical trees and turned to stone have been found in northern Manitoba, Canada.
