LIKE A BABY—The Great Gilbert, hypnotist now appearing at the Pine Tree theater here, is shown making two brawny boys behave as mama and infant. Gilbert has two remaining evenings at the Pine Tree, tonight and tomorrow.

Educator Stalks Love Bug With $12,000 For Expense

CHICAGO, (AP)—A Northwestern university professor who hopes to learn all about love for a mere $12,000, yesterday gave an explanation of his U.S. financed project.

The man who thinks he can come up with the answer to the age-old problem of what is love (and many a man has spent lots more without getting a definite answer) is Prof. Robert F. Winch, 40, and married.

Pres. Truman was somewhat aghast last week when he was asked about the government sponsored research into what makes the love bug tick. He hadn't heard about it before.

After all, love has been going on since Adam and Eve, said the president.

"That's very true," Prof. Winch agreed, "but lots of things have been going on for a long time about which we seem to be just finding out the facts."

Winch, in the university's department of sociology, said he proposes to learn about love:

"By actually working with couples, we will try to discover what their marriage expectations were and how they selected their mates on that basis.

"Then we will try to find their gratifictions and frustrations."

Prof. Winch also will seek to trace the inner needs of people for things like dependence from childhood on. He wants to find out if these needs were satisfied in marriage, and why, and what can be done about it.

The study is expected to take about 18 months. Funds for the project were provided by the national institute of mental health.

GOP Women Man Canteen

By RUTH BLACK

When you enjoy that cup of coffee or tea, the doughnuts and cookies, the relaxation and visit with friends that is available in the canteen after you've made your contribution to the Red Cross blood bank here in Klamath you are reaping the harvest of hours of work put in faithfully each month by local Republican women who have sponsored the canteen from its inception. The Klamath county chapter of the Republican Women of Oregon set up the canteen and has manned it since the first visit of the bloodmobile to Klamath Falls in June.

Local Republican women through their chairman, Mrs. Oscar Kittredge, volunteered to run the canteen and have put in many hours of hard work to set it up every time the bloodmobile comes to town.

REFRESHMENTS

After the donor's blood has been taken and a period of rest has followed, he or she invariably goes gratefully to the canteen where various kinds of juice, coffee, iced or hot tea, and water are served doughnuts and cookies. Children of donors left in the bloodmobile nursery are also served fruit juices and refreshments in the canteen.

When the last blood donor has been served at the end of a busy day at the blood bank, all the professional and volunteer personnel of the bank are also served, the canteen equipment is cleaned up, and the weary workers are lucky to be home by 7 or 8 o'clock in the evening.

Mrs. C. M. Howie, vice-chairman of the local chapter of the Republican Council of Oregon Women, has been in charge of the canteen for the Republican group since its inception. All the members of the group are on call for work at the canteen and so far the following have put in enough hours to earn pins and uniforms: Mrs. W. F. Scott, Mrs. Dave Totten, Mrs. George Fliteraft, Mrs. George Clark, Mrs. H. O. Juckeland, Mrs. Elbert Stiles, Mrs. Madge Chilcote, Mrs. Louis Serruys, Mrs. Morgan Johnson, Mrs. Guy Barton, Mrs. Eliza McDonald, Mrs. Kittredge and Mrs. Howie. Many others who have not yet earned these tokens of service are working for them and put in what hours possible for them.

PREPARATIONS

Prior to the coming of the bloodmobile about three days of phoning and preparation are spent on the canteen. Supplies are purchased, donations of cookies and doughnuts are arranged for by telephone from private individuals and civic and fraternal groups. Coffee urns and some equipment has to be borrowed from generous persons and organizations. Women who will man the canteen are contacted. The day of the blood bank's arrival canteen workers arrive early to set up their section of the blood bank's efficient operation and the workers stay at their stations until the day is over and are available for any duty that may present itself in the canteen.

"It's just plain hard work but I love it," said one of the canteen workers. One may hire a baby sitter to look after her children so that she can give her time to the canteen. Another may stay up in the wee small hours finishing the ironing which she left to help at the blood bank canteen. Still others give their leisure time when they might be playing bridge or golf to contribute to this project without compensation.

Even though pins and uniforms have to be earned by hours of work, volunteers must pay for them out of their own pockets and it is not compulsory that they be purchased.

Sex Hormone Nips Cancer

By ALTON L. BLAKESLEE
A.P. Science Reporter

NEW YORK, (AP)—Cancers in four women have apparently disappeared with use of a synthetic female sex hormone, the American cancer society has been told.

All had cancers of the curvix, the neck of the uterus or womb. In all, the cancers were detected very early, when they were still confined to one spot, and before the woman had absolutely any signs of having cancer. This early detection was an important fact.

In two others, also with early cancers, the hormone brought changes toward normal, Dr. H. E. Nieburgs of the Medical College of Georgia, Augusta, Ga., told the society's seventh annual meeting.

In these two, there were areas in which their cancers seemed to be gone, and the cancers had changed to a different type, he said. One woman had taken the hormone pills only six weeks, and the other hadn't taken them regularly.

Two women with advanced cancer of the curvix also got the hormone. They felt better and bleeding stopped. Their cancers have not disappeared, but in one the cancer changed to a different type. Both women earlier had received X-ray treatments.

Dr. Nieburgs said the results were interesting, but can not be regarded as a cure. He said it is much too early to use the hormone generally for this kind of cancer, a leading site of cancer in women.

Only eight patients have been studied, and the longest treatment has been only 24 weeks. Cancer generally is not considered cured unless there is no recurrence within five years.

Good Chiang Omens Seen

TAIPEH, Formosa, (AP)—In the earthquake ruins of Hualien on the East coast of Formosa Chinese found good omens for the return of Nationalist Pres. Chiang Kai-shek to the mainland.

The Nationalists were driven from the mainland by Chinese Reds two years ago. Chiang has promised to lead them back.

Those who believe in signs and portents took heart he would do that because:

Hualien's Chung-cheng arch escaped damage in the shocks Monday and Tuesday. The arch is named after the president, whose official name is Chiang Chung-cheng. The arch is in an area that was hit particulary hard.

Still in place on the only remaining wall of a collapsed schoolhouse are Chiang's picture and a Nationalist flag.

Canning Activity High in U.S.

NEW YORK, (AP)—The U.S. department of agriculture estimates that about five million tons of corn, tomatoes, snap beans and lima beans will find their way into cans this year.

The department reports that two billion cans were used in processing these vegetables last year with a value of over $120,000,000 (AP). Due to improved methods of preservation, there are more than 45 varieties of highly nutritious vegetables available in cans the year around, Dr. R. H. Lueck, research director of the American Can company, pointed out.

Chaplain Hits The Road

KUALA LUMPUR, Malaya, (AP)—The Rev. W. P. Cole, senior service chaplain for the British forces, covered 20,000 miles by road and had over 80 flying hours during 20 months stay in Malaya.

The Rev. Cole, a lieutenant colonel, reported, "The response to church services among troops in operational areas is first class. But one gib difficulty the chaplains face is the constant movement of troops."
