How much *LIGHT* is <u>enough</u> to read a newspaper?

Don't stint on good light. Outdoors in shade, natural light gives better than 1000 footcandles.

It's good to settle down with your favorite newspaper when you have better lighting at your elbow for easier, smoother seeing.

Under modern lighting you'll be seeing more and seeing faster without straining your eyes or inviting fatigue. And eye comfort *is* important. For reading or writing . . . wherever eyes are called on to see quickly and surely . . . try a three-light lamp that brings you 100-200-300-watt lighting in a single bulb.

You owe it to your eyes to find out about better lighting NOW.

You can get free advice and helpful suggestions on how to improve your home lighting by calling in our Home Lighting Advisors.
