Row May Stop Ship Service

SAN FRANCISCO (AP)—Unloading delays caused by a dispute between the CIO Marine Engineers and Isthmian Steamship Co. may result in cancellation of Isthmian's Intercoastal Service from Gulf ports to the Pacific Northwest, a company official said Friday.

Members of the International Longshoremen's and Warehousemen's Union have refused to pass picket lines set up on Isthmian ships by the CIO union.

Isthmian's Pacific Coast manager, A. E. Blake, said further unloading delays at Seattle and Portland would force the company to retire from the northern route and return to chartered ships, the Clearwater Victory and the Las Vegas Victory, to the government.

Blake said there would be a show down when the Las Vegas Victory arrives at Seattle about Feb. 1.

The CIO engineers are disputing a company agreement with the rival AFL Brotherhood of Marine Engineers.

Plywood Mill To Be Built

EUREKA, Calif. (AP)—A new 1 1/2 million dollar plywood mill is being planned for Humboldt County, Calif., by Washington and Oregon men.

The announcement Thursday said it will be built near Freshwater in the near future. A spokesman said the firm holds leases on 250 million feet of standing timber.

Officers of the new firm were announced as William A. Mitchell, Seattle, president; Dr. William Nelson, Seattle, secretary; C. D. Thorne, Portland, director.

Humboldt County lies from about 40 to 100 miles south of the Oregon line with Eureka as the principal town. The Eureka Chamber of Commerce reported there were 258 sawmills and related industries last month, with most of the lumbering expansion having occurred since

PLANNING THE Lions Club traffic safety program for schools are (l to r): Arnold Grapp, city school superintendent; Paul Robertson, assistant city police chief; Gene Woods, Lions Club; and Dr. Robert Wood, Lions Club.

Lions Club to Try Novel Safety Instruction Plan

By DAVE UNDERHILL

It's not too long a step from tricycles to bicycles and then eventually to automobiles. That's why policemen and educators will watch with interest an experiment in safety education of school children to be tried Jan. 8 at Fremont school.

Through sponsorship of the Klamath Falls Tokete Lions Club, with aid of city police, Weyerhaeuser Timber Co. and the city elementary school system, a practical application of traffic safety education will be carried out with 22 fourth grade pupils at Fremont.

Weyerhaeuser will supply strips of belting to mark out simulated crosswalks and intersections. City police will provide "Iron Mike," a portable traffic control light. The Lions have acquired 14 tricycles to take the place of automobiles.

Under direction of a city traffic officer, the pupils will carry out their roles as drivers or pedestrians, observing the stop-and-go lights and wait-and-walk signals.

"This type of safety education is not new in the United States, and has been deemed highly successful in supplementing theoretical safety training given in classrooms."

Sgt. Odell Olson, City Police traffic officer, who will help in the experiment, thought it a good idea. He said it is necessary not only to train the youngsters for future years when they are adults, but also to provide training for the immediate future when they will be riding their bikes to school—some

probably gotten this Christmas—or walking on city streets.

Sgt. Olson said he believes if school children learn correct traffic habits now they will, in the greater majority, follow that training through the rest of their lives.

Members of the Lions Club conceived the idea of sponsoring this training program when the high rate of traffic fatalities in Klamath County was emphasized by the press and radio in recent months.

With 22 persons dead in traffic accidents as of December 17, the county has tallied its greatest number of traffic deaths in post-war years.

And on Dec. 22, 1951, the United States recorded its one-millionth traffic death since the turn of the century.

Lions Club members, like Dr. Robert Wood who is heading this particular project, felt that partial solution to the situation was in early education of youngsters to the ways of traffic safety.

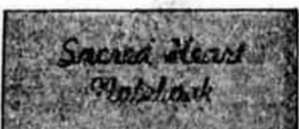

Sgt. Olson said he felt the program should be adopted in all city elementary schools from the first grade on. He said it is best to instruct the children when they are attentive and impressionable.

Principals of city elementary schools are to be at the experiment Jan. 8, 30, p. m. in the Fremont school gymnasium. And if the experiment appears successful it will probably be included in the present safety instruction program now carried on in the schools.

During flight at tremendous speeds, "outer skin" temperature of missiles rises to as much as 1,500 degrees, the heat increasing as much as 89 percent Fahrenheit per second.

TELLS OF TALK — Rep. Wayne L. Hays (D-Ohio) poses at the White House door after a talk with President Truman. He quoted Mr. Truman as saying he hopes to make known before Feb. 6 whether he will run again. Feb. 6 is the last day for filing of candidates for delegates from Ohio to the Democratic National convention.

By MARY EGAN

The eight days of holiday vacation came to a close yesterday morning for the students of Sacred Heart Academy. Strangely enough, the students didn't feel sorry, as they are eagerly looking forward to the first conference basketball game tonight in the Academy gym.

The Main Mustangs will face the Trojans in this first tussle of the new year.

"Oh dear!" was a common expression of the juniors today as the one thousand word essays were due. The essays were written on the theme "Employ the Handicapped for National Defense." They will be entered in the State contest.

Once again the time has come for semester exams. Students will probably be seen indulging in studying for the next six days. But they will be rewarded Friday with a mid-year holiday.

Confessions, Holy Hour, and First Friday were observed by students this week. Confessions were heard Thursday morning and in the afternoon students participated in Holy Hour services. Today being the First Friday of January, the students attended Mass.

Good luck Trojans in the game tonight!

Toronto Streetcar Strike Called

TORONTO (AP)—A strike of Toronto's street-car and bus operators started at 5 a.m. Friday.

The sudden strike call caught Toronto unawares. Thousands of citizens in a metropolitan area of some 1,300,000 were stranded on street corners waiting for non-appearing trams to take them to work. Taxis did a roaring business.

The Cabinet Room at No. 10 Downing Street is equipped with double doors and the windows have double sashes to balk would-be listeners.

Red Cross Plans Dual Meeting

A two-fold get-together of Klamath Red Cross people has been scheduled Monday.

At 11 a.m. the board of directors of the Klamath County Chapter of the American Red Cross will meet in the Klamath Army for its regular monthly sessions.

At 12:30, all water safety and first aid instructors in the Red Cross program are invited to attend a luncheon at the Winema hotel at which time the new method of artificial respiration is to be explained.

Disabled Engine Blackens Towns

REDWOOD CITY, Calif. (AP)—A two-hour shower of soot blackened Redwood City and San Carlos, on the San Francisco Peninsula, Friday.

Disabled Southern Pacific engine poured soot onto cars, freshly washed cars on drying lines, and residents.

Even white cats changed color.

In raw powder form or combined in sulphuric acid, sulphur is indispensable in making chemicals, fertilizers, insecticides, paints, explosives, metals, foods and textiles.

Alien Goods Bureau May Be Checked

WASHINGTON (AP)—Sen. Wiley (R-Wis.) said Friday he will ask a complete investigation of a "mass tip" on a multi-million dollar activities of the Alien Property Office.

The senator said in a statement he expects the inquiry to touch upon reports of fat fees and profits to some individuals and corporations.

"grave mismanagement" and "considerable favoritism" of the Alien Property Office is under the Justice Department and has had control of more than a half billion dollars worth of German and Japanese properties seized in this country during World War II.

Wiley said 55 active companies still are under control and that 10 of them have assets of more than one million dollars.

He proposed that the inquiry be made by a Senate judiciary subcommittee with a special staff of experts able to trace complicated affairs of the seized properties and corporations.

Wiley said the inquiry should look into management and disposition of assets; personnel appointed to operate corporations and salaries and fees paid; and results of the agency's operations.

Service Pay Boost Asked

WASHINGTON (AP)—Legislation giving all members of the Armed Forces a 10 per cent increase may get a high priority in the session of Congress convening next Tuesday.

Senator Vinson (D-Ga.) of the House Armed Services Committee said yesterday Friday he has asked the rules committee to give the measure prompt clearance so it can be acted on immediately. There is no foreseeable major opposition in the House.

An increase would be given to everyone in uniform, from the lowest ranking private to the highest general. It would apply not only to pay but also to subsistence and quarters allowances. It would not be retroactive.

Retired service personnel also would receive the increase.

Girls' Athletic Association Has

By JEAN OWENS

Girls' Athletic Association has been unusually active recently in that they are enlarging their group.

The girls held a pre-initiation for their prospective members in the GAA room on Monday, December 17. Entertainment was presented, and each girl brought gifts for needy children.

Basketball will start in January and will continue until March, when softball season begins.

The girls' athletics are making up a team for the city league basketball tournament. Players include: Nancy Berg, Sue Bevans, Ramona Messick, Barbara Paulson, Darlene Gordon, Sheila Marvin, Beverly Eells, Sherry Larson, Shirley Gordon, Jerri Harman and Margie Shreeves.

Griggs Superior Market is the sponsor of the team and Miss Johnson is the advisor.

This week and next, students are going through a review period in their classes in preparation for final examinations.

Regular classes will be cancelled on the three examination days, Wednesday, Thursday and Friday, and students report for a two-hour class in the subject he is being tested in.

The exam schedule is as follows: 8:30 Wednesday, first period; 1:00 Wednesday, fourth period; 8:30 Thursday, second period; 1:00 Thursday, fifth period; 8:30 Friday, third period and 1:00 Friday, sixth period.

Columbia Basin Wheat On Smutty Side Again, But Incidence Below Last Year

PORTLAND (AP)—Nearly 25 per cent of the Columbia Basin's 1951 wheat crop was smutty. Had as that, it was a reduction from the year before and the first time in nine years smut failed to show an increase in the Northwest.

R. E. White made that report Friday morning in telling members of the Pacific Northwest Smut Control Committee what had been found this year in 23,500 inspections of farmer-owned lots of wheat. White is with the Federal Production and Marketing Administration's grain branch.

Although the over-all percentage of smut was better than a year ago—the 1951 percentage of infestation was 24.7 while that of 1950 was 30.6—White said there was one disturbing thing.

Almost half of the samples that were smutty, had more than one-half of a per cent smut.

The story of infestation varied with different varieties. Club wheat accounted for about one-third of the total inspections, and 53 per cent of those club samples were infested. That was 2 per cent higher for club wheat than in 1950. Common white wheat, on the other hand, showed a decrease of about 10 per cent. The common white varieties included golden, rex, feauration and brevor.

The clubs included elgin, byman and elmar. Elgin is especially susceptible to smut.

On the other hand, there were seven samples of the new elmar—and not a single sample graded smutty.

White made his report as the committee met to consider what might be done to combat smut, the worst wheat industry's most serious disease problem.
