Lincoln-Mercury Plan Revealed

A major change in the mechanics of distributing Lincoln and Mercury cars to Western dealers, and a realignment of personnel handling their distribution, was announced today by Henry B. Daniels, regional sales manager of the Lincoln-Mercury Division of the Ford Motor Company.

The new procedure transfers all functions of car distribution from the region's four sales districts in Oakland, Seattle, Los Angeles, and Denver to the newly-formed car distribution department at the Los Angeles assembly plant. Cars for most of the dealers in the eleven western states are assembled there.

The reorganization is designed to increase the speed and flexibility with which automobiles are ordered by dealers, scheduled into production, and delivered according to customers' specifications.

Vermont, Arizona and Georgia are the leading U.S. states in asbestos production.

Admiral Orem Slated For Liberia Trip On Transport

The USS Monrovia is scheduled to make a visit to the little Republic of Liberia next week. The Attack Transport will carry a Klamath Falls man—Rear Admiral

REAR ADM. HOWARD OREM

Howard E. Orem—to the ship's namesake capital of the little African country where he will participate in inaugural ceremonies of Liberia's president-elect, William V. S. Tubman.

Both Adm. Orem's flagship and the Liberian capital were named for United States President James Monroe.

The trip is part of the routine employment of amphibious force ships of the Atlantic Fleet.

The admiral is the youngest member of the Orem family which

Fire Fighters To Attend Hearings

WASHINGTON (AP)—Federal Forest Service fire fighting experts are investigating themselves again this winter, to learn how their work can be improved.

Fire Control Chief C. A. Gustafson left today for these review board meetings: Monday, Silver City, N. M.; Wednesday, Springerville, Ariz.; Jan. 15 Marysville, Calif.; Jan. 21, Eugene, Ore.; Jan. 23 Olympia Wash.

POW Mail Turned Over To Allies

PANMUNJOM, Korea (AP)—A batch of 159 letters from U.N. prisoners of war was turned over to United Nations postal officers Monday by the Communists.

The U.N. turned over 1,087 letters from the United States to be delivered to men in the Red prison camps, plus eight letters from U.N. held Communist prisoners to their families in North Korea and China.

Alberta All Set For Big Year With Billion Dollar Expansion Plan In View

EDMONTON (AP)—Almost one billion dollars worth of new industrial development is in prospect for Alberta.

It will top the province's prodigious growth since the Leduc discovery less than five years ago marked Alberta as one of the world's great oil-producing areas, and drew attention to its other unexploited natural wealth.

New projects to develop the province's oil, natural gas, forests and mines, and to process the products of its rich soil, will pour nearly 900 million dollars into Alberta within the next few years.

The figure is from the Alberta Industrial Development Board. Without going into still-confidential detail, Director Richard Martland said the sum represents "firm" projects—undertakings "past the inquiry phase" and now in the planning stage.

"Of course," said Martland, "things could happen to change some of the developments planned, such as a shortage of materials or an outbreak of war." He added that individual projects will be announced by the firms concerned as plans are completed.

The province's oil wells produced an estimated 135 million dollars worth of crude during the 12 months, but still were held in rein because of inadequate means of getting million dollar pipeline from Edmonton to the Pacific Coast, supplementing the line to the Great Lakes which carries Alberta oil to eastern markets.

Meanwhile, Edmonton shaped up as the center of a great new chemical industry. First in the field was

Canadian Chemical Co., a subsidiary of Celanese Corporation of America. Its 54 million dollar plant, the largest of its type in the world, will turn British Columbia wood pulp into synthetic textiles and by-products of the nearby oil refineries into chemicals including some not at present manufactured in Canada.

Close behind Celanese was Canadian Industries Limited with plans to build a 13 million dollar plant as started. It will make polythene, a plastic widely used in the electrical, pharmaceutical and packaging industries, and will use 10 million cubic feet a day of Alberta natural gas. A third chemical concern was reported ready to announce its plans.

The past year saw the completion of large-scale irrigation works, balancing in the south to some extent the industrial development in the north. Completion of the seven million dollar St. Mary River Dam marked the first big step in a three million dollar project which will open up some 4,000 irrigated farms over the next 10 years and free large dry areas from dependence on grain growing and ranching.

This will result in intensified raising of specialty crops. Already a quick-freeze plant in Lethbridge is producing more than one-fifth of all the quick-frozen vegetables marketed in Canada.

The labels you see here are evidence of your doctor's and your pharmacist's interest in your health and safety.

Labels like the typewritten one shown at the top of the page appear on practically all prescription packages. Additional printed labels are included when needed, not only on prescriptions, but also on certain other medicines you may be purchasing.

It is wise to note all labels carefully. This helps to make sure that the medicines will be used exactly as intended, and will be kept under conditions that maintain their strength and potency. Moreover, careful reading of all labels is advisable to avoid the possibility of mistaking one medicine for another.

Your pharmacist makes every effort to see that medicines are dispensed and used properly. So always observe all directions or precautions appearing on labels. They are based on professional knowledge, which is your greatest safeguard in matters affecting your health and well-being.
