

Raisin Drop Cookies Star Plentiful Raisins In Luscious Cookies

This is the month for dried fruits. Delicious golden apricots, to make pies and compotes... hand-some juicy prunes for a breakfast fruit, for whips and quick breads. And raisins, fat and flavorful, for a myriad of good things to eat. There are many kinds of raisins available this year. The seedless raisin, once a native of Persia, is around in golden abundance. So, too, is the green-yellow Muscat. The seedless Sultanina is used both less raisin. This year's crop is twice as big as last year's. Raisins store beautifully—especially if kept in foil boxes or a covered jar so it's a good idea to stock up. You can use raisins in so many ways, as a snack, in hot breakfast cereals, in sandwich fillings, and in many desserts. And always to fill the cookie jar! Team them with delicious, tangy, New Orleans molasses and you've an incomparable combination, a cookie rich in iron, completely delicious, and a "good keeper."

HONEYMOONING

There's nothing like a man around the house as far as bride Elizabeth Taylor is concerned. The Hollywood actress ignores the cold of Alpe d'Huez, near Grenoble, France, as she hugs her husband of a week, British actor Michael Wilding. The couple is honeymooning at the French resort after London wedding.

AN EXPANSIVE HOUSE, five rooms and bath on the first floor provide a complete dwelling, while space upstairs can be finished later to add two more bedrooms, extra bath and abundant storage. This is Plan 1767 by William G. Chirgots, 968 Stuyvesant Ave., Union, N. J. The house covers 1,020 square feet, includes a full basement and contains 21,400 cubic feet—figures for estimating.

JACOBY on Canasta

"Is there such a thing as a misdeal in Canasta?" asks a Chicago reader. "If so, when is it possible to call for a new deal?"

Yes, there are misdeals in Canasta. Under certain circumstances you have the right to ask for a new deal.

Suppose that nobody cuts the cards before the deal begins and you remember this while the cards are being dealt. You may ask for a new deal. This situation is pretty rare, because the cards are usually cut to begin with.

In the second place, if the cards are not cut the chances are that nobody will think of that fact. Finally, if the deal is completed and a proper up-and is turned up, it stands as a correct deal even if somebody then remembers that the cards were not cut.

Usually a misdeal is called for when the dealer exposes a card while he is dealing. This is a general rule of most card games; there must be a new deal if a card is improperly exposed during the deal.

After the play has begun, the deal stands in spite of most dealing errors. However, there are certain errors that entitle you to call for a new deal provided that you act before each player at the table has completed his first play.

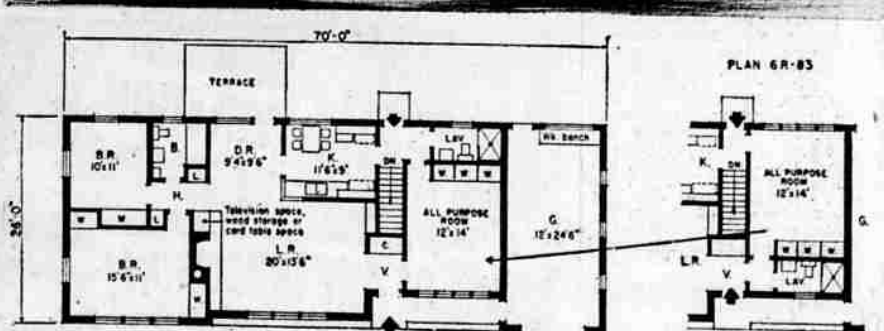

LOOK YOUR VERY BEST!

Suppose, for example, that any player was dealt 12 cards (or any other incorrect number of cards). If that error is discovered before the end of the first round of play, there must be a new deal. If the error is discovered later, the play continues without correction. The same rule applies during the first round of play if a card is found faced in the stock pile or if a foreign card is found in the pack or in a player's hand. A "foreign" card is one that doesn't properly belong in that deck. For example, if you have a blue Canasta deck (108 cards as usual) and also a red Canasta deck, you might have a red card shuffled in with the blue deck. That red card would be a foreign card. If such errors are discovered after each player has completed his first play, the deal stands. If a card is found faced in the stock it is turned over and shuffled with the rest of the stock. If a foreign card is found in the pack, it is removed. If a foreign card is found in a player's hand, it is removed and replaced immediately from the top of the stock pile.

MIRRORS for any Room in the Home! Calhoun's

HOMES FOR AMERICANS

TELEVISION FOR ALL the family is planned in this house. A glass corner at the kitchen sink gives the housewife full view of the TV set next to the fireplace, while living room and dining room have a view of the screen.

This is Plan 6R-83 by Elmer Gylleck, architect, 120 So. Grove Ave., Elgin, Ill. The house covers 1,380 square feet. Garage adds 338 square feet—figures useful for local estimates. It can be built with or without basement.

An all-purpose room with extra bath can serve as guest room, maid's room, playroom, or study. Where a powder room adjacent to front entrance is more important than a lavatory near the kitchen, the alternate plan is used. The architect suggests an exterior of Roman brick with asphalt shingle roof.
