Klamath Falls Garden Club

At the Mar. 3 meeting of the Klamath Falls garden club, Mrs. Walter Blessinger spoke on the topic of forcing flower shrubs, trees and bulbs.

Mrs. Blessinger warned against forcing flowering material too early. About Feb. 10 seems to produce best results. If green leaves, rather than blossoms are the goal, then lilacs are the first to respond to this treatment.

Some of the materials best suited to forcing include: all fruit trees, forsythia, Japanese quince, mock orange, barberry, maple, snowberry, spines, honeysuckle, briars and pussy willows. Bulbs adapted to forcing are hyacinths, some tulips and narcissus.

The approved method of forcing consists of merely cutting the branches on a slant to permit of maximum water absorption, then placing the stems in warm water in a sunny window for a few days.

However, the most intriguing subject for forcing, described by Mrs. Blessinger was a fresh pineapple. The entire depth of the green tuft was cut from the pineapple and placed in a shallow container of water for 2 or 3 weeks until the base became spongy in appearance, then planted in a pot of soil. In due time roots were formed, then a green stalk pushed its way through the soil. Thus a new pineapple plant was propagated from the simple expediency of a cutting.

On display were: forced maple and winter jasmine by Mrs. G. K. Cummings; forsythia, by Mrs. Will Wood; and tulips, forced in pots of soil by Mrs. Fred Karlson.

It was announced that the State Federation of garden clubs convention will be held at the Multnomah Hotel in Portland, June 3 and 6.

Mrs. Ralph Benoit won first prize in the game contest, and Mrs. Don Johnson won the door prize.

Invited guests included: Donna Denoshi, Mrs. E. L.
