

TWO KLAMATH FALLS MEN are among the 124 former high school student body presidents now enrolled at the University of Oregon. The group recently had a get-acquainted session on the campus. In the picture above (l to r) are: Ellis E. Owen, KUHS president in 1949; Louis L. Selken, Bend; Wayne Carothers, KUHS president in 1950; and John Tonack, Portland, chairman of the ex-prep prexy group.

### Warmer Weather Sure To See Bog-Bite Scares - Ready?

In winter, children and their dog companions never get enough time out of doors. Spring releases them for romping and rough-housing in yards and playgrounds. They race up and down the sidewalks with extra enthusiasm, their dogs barking at their heels. Strange dogs, too, are likely to join in the fun. Sometimes the play gets too rough. Dogs may take what appears to be a friendly nip, but it's strong enough to break the skin. There is the ever-present danger of rabies from the bites of dogs and other household pets for mothers to worry about.

**STRIKE EARLY**  
But there is a handy first-aid treatment found in almost every "working room" of the house—in the kitchen, laundry, bathroom, etc.—Soap. This first aid consists of washing the wound thoroughly with soap and water, says Dr. Carl J. Potthoff, First Aid Director, the American Red Cross. Dr. Potthoff writes a column on first aid for the monthly magazine, "Today's Health" which is published by the American Medical Association.

This first aid, Dr. Potthoff says should be done as soon as possible, right after the child has come home crying "the dog bit me." Rabies is an extremely serious illness, and one can not tell at first whether the dog-friendly or otherwise—is in an early stage of the disease. Accordingly, the first aid should be followed quickly by securing medical attention. Soap and water will not remove rabies germs that have been deeply injected by the dog's teeth. The physician must decide whether rabies immunization is necessary.

Therefore, Dr. Potthoff emphasizes this point: Soap and water cannot possibly take the place of treatment by a physician. It is first-aid only although first-class first aid.  
This is the advice Dr. Potthoff gives to mothers worried about dog bites.  
1. Wash the wound promptly, gently and thoroughly with soap and water. An antiseptic may also be applied. Dress the wound.  
2. Always consult a physician at once do not wait to see whether rabies develops. The physician must

decide at once whether to vaccinate.  
3. Notify the local health officer, or have the physician do so. The dog should be confined and observed in every instance to determine whether it has rabies and to guard against more bites. If the dog dies, the head should be examined for evidence of rabies.  
It is comforting to know that there is something we can do before the doctor comes! We never can tell when a child will report a bite by the family's dog, or a neighbor's.  
Better not take a chance, especially when the safe way is an easy way. Call your doctor. And while you are waiting for him, use soap and water!

### Grid Game To Portland

CORVALLIS — The Oregon-Oregon State football game next fall, scheduled for Corvallis, will instead be played in Portland Nov. 2.  
R. S. "Spec" Keene, OSC athletic director, reported the shift. He said it was made because repairs necessary on the antiquated Bell Field stadium here before a big crowd could be handled would cost several thousand dollars. Plans are afoot for a new stadium this was regarded as a waste, yet insurance requirements would force the expenditure he said. The shift to Portland's Multnomah Stadium opens the way to more alumni to see the game, he added.

CAIRO, Egypt — Five men received sentences ranging from three to seven years at hard labor Wednesday for burning and looting shops in Cairo's "black Saturday" riots of January 26.

### Range Plan Talk Slated

CORVALLIS — An April 4 farm conference in La Grande will take up the possibility of putting usable vegetation on 31 million acres of public and privately owned range land in Eastern Oregon.  
Oregon State College is cooperating in the conference set up by the Oregon Bankers Association. J. B. Rogers, Baker, president of the bankers, will be toastmaster at a banquet.  
Livestock operators and seedsmen will present a panel discussion of the region's range problems after a morning of individual talks.

R. Beck, assistant director of the OSC extension service, said the meeting's objective was to find some way of improving the livestock feed supply. He said some 20 million acres in Eastern Oregon are classed as non-forested, scrub-brush type land, much of it needing improvement.

**Pickets Surround Veneer Plant**  
KALAMA, Wash. — The Columbia Veneer Co. plant here was picketed Wednesday by members of the CIO International Woodworkers of America after 270 employees went on strike at midnight.  
The strike followed a dispute over firing of a pitney operator. Union officials called the firing "unjustified." The company was expected to issue a statement later.  
Union and company representatives continued meetings Wednesday in efforts to settle the dispute.

# Secretary Of Interior Pleads For Building Of Federal Hells Canyon Dam

WASHINGTON — Secretary of the Interior Chapman urged Congress Wednesday to authorize federal construction of Hells Canyon Dam on the Snake River.  
It is the key, he said, to the "principal of integrated development" of the Columbia River basin in the Pacific Northwest.  
Chapman told the House Irrigation and Reclamation Subcommittee that he not only was presenting the position of the Interior Department but also was conveying "the support of President Truman for the construction of this vital facility."  
The dam, described by Chapman as "a vital link" in the development of the Columbia River system, "to which Congress had long been dedicated." It would be the major unit in the Snake River project in Idaho and Oregon.  
Chapman said construction of Hells Canyon Dam as the govern-

### YMCA Slates Dinner Friday

A covered-dish dinner has been slated for the YMCA Friday at 6:30 p.m. for families of "Y" members, instructors, leaders and board of directors.  
The college-age group will have charge of entertainment, and an open house showing various YMCA programs in action will follow the dinner. This includes continuous movies suitable for all ages.  
Arrangements for members should be made by phoning 9279 for full particulars.

### Forest Industries Convention Slated

EUGENE — The Western Forest Industries Association, an organization of independent timbermen, will hold its annual meeting here Saturday.  
Features of the program will include a speech by J. Herbert Stone, U. S. regional forester; a panel on wood waste utilization; and an explanation of new ceiling price regulations on Douglas fir and hemlock lumber by Merton T. Owe, lumber business analyst from the Portland Office of Price Stabilization.

ment proposes would "provide a large volume of electric power urgently required for national security in the long range and for the continued economic growth of the Pacific Northwest."  
He said it would add 1,124,000 kilowatts to the prime power supply of the region. Of this, he said, 688,000 kilowatts would be produced at Hells Canyon and 436,000 at existing and proposed down stream dams.  
Other benefits he listed as flood control, navigation and recreation. The Idaho Power Co., he related, has applied to Federal Power Commission for a license to construct the Oxbow Dam at the Hells Canyon reservoir site and proposes to build four other low dams on the Snake River.  
The company's plan, Chapman said, would add 530,000 kilowatts to the region's power supply instead of the 1,24,000 estimated for Hells Canyon. And, he continued, the company's program would produce no flood control or irrigation benefits.  
"The Congress has already authorized the major units of this (Columbia River) program except for Hells Canyon Dam. Without Hells

Canyon... a significant portion of the comprehensive program can never be realized."  
Chapman said he agreed to a provision of the bill providing in effect for reservation of 300,000 kilowatts of power for sale to the state of Idaho with the understanding that in negotiations on contracts for its marketing "the basic federal public power policy will be paramount."  
That policy, he said, provides for preference to public bodies and cooperatives, transmission and disposal of the power in such manner as to encourage the most widespread use, and its sales, at "the lowest rates consistent with sound business principles."

## -you can't beat a GMC!

KNOW why, more and more, GMC's are becoming first choice of so many cost-watching truck operators in every type of hauling?  
One of the big reasons, they will tell you, is they can always get a GMC that's exactly "engined" for the particular kind of work.  
There is no need for a GMC owner to strain away with an underpowered truck—or lose profit to a gas eater unsuited to his job.  
That's because GMC builds the widest range of truck engines in the industry—GMC famed valve-in-head gasoline engines from 100 to 200 H. P.—GMC exclusive 2-cycle Diesels from 110 to 225 H. P.

And it's the kind of power you don't have to pamper!  
Each GMC engine is specially lubricated against wear, specially ventilated against acid-forming fumes even when idling—specially designed for truck duty!  
Why not let us recommend the GMC truck, tractor or six-wheeler perfectly powered for your job? It will be a real truck all the way—exactly the right combination of engine, axle, transmission and frame blended by the world's largest exclusive manufacturer of commercial vehicles!
