

Washington Lays Back On Fight For Dam Funds, To Put Pressure On Senate

By FRANK VALLE
WASHINGTON (AP)—Washington State congressmen will hold their fire and make no effort to have the House override recommendations of its Appropriations Committee for curtailment of the Army Engineers' Oregon-Washington-Idaho dam construction program.

A check of individual members indicated agreement that it would be futile to seek to offset the committee's \$47,677,000 slash in the \$176,337,000 proposed program.

"We may take the floor for a few remarks just to keep the record straight," several members commented. "But I doubt that any serious effort will be made here."

Water Supply Said Normal

HOOD RIVER (AP)—Water for irrigation in Wasco and Hood River Counties will be sufficient to meet usual needs, W. F. Frost of the Soil Conservation Service reported.

At the first of the annual series of outlook meetings Saturday, it was pointed out that the 4,000-foot level on Mount Hood, snow is about 11.5 feet deep. That would produce about five feet of water.

Wasco County Water Master Roger Wilhelm said snow cover at Brooks Meadow was 39.1 inches deep with water content of 17.2 inches. That is about two inches of water more than last year, but more than four inches less than in 1950.

White River below Tyah Valley is expected to discharge 185,000 acre-feet in the irrigation period April-September, 119 per cent of the 15-year average but again less than in 1950.

There may have to be some regulations imposed in August, but the prospect is that usual needs can be met nicely by Badger, Rock, Gate, Fifteenmile and Mill Creeks.

Legislative Meet Slated

A public hearing on reapportionment of the Oregon Legislature—a recurring problem facing the state—is to be held next Saturday night at the Courthouse.

Sen. Phil Hitchcock is chairman of an interim committee studying the various plans or reapportioning the positions in the Senate and House of Representatives, and that committee is to submit a report to the Legislature next year.

Other members of the committee are Sen. Richard L. Neuberger, Portland; Rep. David C. Baum, La Grande; Rep. H. H. Chindgren, Molalla; Rep. Ivan C. Laird, Sitka; plus several advisory members who are not of the Legislature.

All interested persons and groups are invited to attend the Saturday hearing and bring out ideas regarding reapportionment. The meeting is scheduled to start at 8 p.m.

Two Die In Plane Crash

OMAHA (AP)—Two men were killed and three others injured, one seriously, early Monday when an Air Force B-29 bomber crashed while attempting to land at Offutt Air Force Base.

A Strategic Air Command spokesman said the plane, based at Offutt, was coming in for a landing at the end of a routine flight to Burbank, Calif. Apparently one engine was out.

The plane overshot the field, tried to pull up and crashed about three miles northwest of the base, the spokesman said. The wreckage was strewn over a 300 square yard area.

Streetcar Strike Held

PORTLAND (AP)—AFL Streetcar men's union members voted Sunday to postpone their strike deadline for one week—until April 8—to give a citizens' committee more time to study the Portland Traction Company's wage and fare policies.

But two other major strikes threatened in the Portland area Monday. Some 500 operating employees of the Portland General Electric Co. will strike April 14 unless agreement is reached on a new contract, the union business agent said. The workers are asking an 8.5 per cent wage increase.

Some 3500 metal workers have set a strike for Tuesday in the city's major machine shops and fabricating plants. Federal conciliators attempted to head off the strike.

The vote to postpone the mass transportation strike was 242 to 192. The union has some 1200 members. They are asking a 15-cent hourly wage increase and other contract benefits. The company has refused to arbitrate unless the Portland City Council grants a fare increase.

Members also hoped that appropriations for Chief Joseph Dam would be upped from the 11 1/2 million recommended by the House committee to at least the 17 1/2 million originally asked by the Army Engineers.

They were less optimistic about Ice Harbor. Rep. Tolfeason (R-Wash.) said he considered the language of the House committee's report on the Lower Snake River project "to be about as flat a rejection as any I've seen."

But Rep. Jackson (D-Wash.) said he thought the chances of reinstating the five million sought for Ice Harbor "are pretty good unless the heavy percentage of appropriations going to the Pacific Northwest works against us."

Jackman contended the cut of The Dalles was "clearly unwarranted and costly to the government in view of the fact the project is already under way."

Tolfeason said he would renew his efforts to include funds for planning of the proposed Engle Gorge flood control project in King County. The House committee struck all planning funds from the bill.

Only one member of the Washington delegation sounded an optimistic note on the committee report. He was Rep. Horan (D-Wash.).

He noted that despite heavy cuts in the various projects, the recommended bill carries \$2,635,000 for surveys, planning and study programs. He said he has been assured that some of the money included will be used for water rights surveys on the Similkameen River.

Hells Canyon Dam Hot Issue For Solons To Handle; Idaho Against Plan on The Grounds It Would Hamper Irrigation

WESTERNERS
By JOHN KAMPS
WASHINGTON (AP)—Hells Canyon, the Seven Devils Mountains and the Snake River, some quipping congressmen say, combine to form a "devil of a country."

And a House Interior subcommittee is handling a hot controversy in its hearing on a bill to authorize the Hells Canyon Power Dam on the Snake River, on the Idaho-Oregon border.

Near Hells Canyon are the Seven Devils Mountains, which have peaks named He Devil, She Devil, and Lesser Devils.

Despite the geographical names however, Idaho congressmen loyally insist this rugged, picturesque area is God's country.

The Reclamation Bureau has picked what it calls the deepest river canyon in the nation as the site for what it says would be the highest dam in the world, a structure to cost 357 million dollars.

Through the canyon, nearly 8,000 feet below the nearby mountain peaks, the Snake River rushes on its 1,500-mile trip from Wyoming westward and northward through some of the continent's most inaccessible country on its way to the Columbia River.

Historians say Sgt. John Ordway of the Lewis and Clark expedition was the first white man to gaze upon the gorge's sheer walls, cliffs towering to the sky, and rugged snow-covered mountain peaks to the east and west.

Three fur traders drowned in 1811 in churning rapids at a point where the canyon is 6,950 feet deep but only 280 feet wide.

Capt. Bonneville, the Army explorer, visited the canyon in 1831 and wrote in his memoirs: "Nothing we have ever seen or gazed upon in any other region could for a moment compare in wild majesty and impressive sternness with the scenes which at every turn astonished our senses and filled us with awe."

A writer called the scene "a grand panorama of nature, created at the birth of a world."

The Reclamation Bureau wants to build roads to the canyon, truck in more than 11 million tons of materials and erect a dam between 720 and 740 feet high.

Engineers say it would be the world's highest and third-largest dam, which would impound a lake 93 miles long and covering 25,000 acres of land.

They say nine generators would use the water to produce about 900,000 kilowatts of power. Of this, 300,000 kilowatts would be reserved for use in Idaho and the remainder would go into the Bonneville Power Administration system serving the Columbia Basin area.

But opponents, including the Idaho congressmen, say the people of the area don't want the dam. They say it would hamper irrigation by using too much water, and would flood sites at which the Idaho Power Co. wants to build dams.

The government calls Hells Canyon Dam a key structure in its plan to control and utilize the Snake River, essential in the federal plan for multiple purpose development of the Columbia River system which was worked out by Army Engineers and the Reclamation Bureau.

The government has completed two major projects under the program, Bonneville and Grand Coulee Dams.

Many other projects are planned. The government has received authority from Congress to build dams costing more than three billion dollars in the Northwest during the next decade, and more projects will be submitted.

Among projects planned for the system are dams in Idaho, Oregon, Washington and Montana.

Hungry Horse Dam in Montana's south fork of the Flathead River, a big project, is scheduled to begin generating power in October.

Among other dams on the government's program are Albert Falls, Detroit, Big Cliff, McNary, Lookout Point, Dexter, Roza, Amer-

ican Falls, Chandler, Chief Joseph, Palisades, Upper Scriver Creek, Lower Scriver Creek, Ice Harbor, The Dalles, Hills Creek, Lower Monumental, Little Goose, Libby, and Lower Granite.

Family Night Big Success

"Family Night" at the YMCA Friday was so successful that it will probably become a regular event, according to Director Cecil Kollenborn.

A crowd of 118 "Y" members and members of their families turned out Friday evening. They were entertained by members of the college age group, had a group singing period, games and demonstrations of "Y" programs.

Lewis Erbes was master of ceremonies.

Margaret Knew Of HST Decision

PORTLAND (AP)—It was no surprise to Margaret Truman that her father won't be a candidate for reelection.

Miss Truman was notified of her father's announcement only a few minutes before she appeared on the stage of the Portland auditorium for a concert here Saturday.

"I've known about it before and I learned this afternoon that he was going to make the announcement tonight," she said.

Her concert was not enthusiastically received by critics here.

Some 3600 persons, an overflow crowd, attended the concert.

Water Supply Said Normal

HOOD RIVER (AP)—Water for irrigation in Wasco and Hood River Counties will be sufficient to meet usual needs, W. F. Frost of the Soil Conservation Service reported.

At the first of the annual series of outlook meetings Saturday, it was pointed out that the 4,000-foot level on Mount Hood, snow is about 11.5 feet deep. That would produce about five feet of water.
