Spending the weekend as house guests of Mr. and Mrs. Robert Cable were Mr. and Mrs. Millard Briscoe of Montesano, Wash., the two women being sisters. On leaving here Sunday evening, the Briscoes went on to Klamath Falls to see other relatives before returning to their home in Washington.
Other visitors at the Cable home this week were their daughter and her two children, Mrs. George Ziegler, her daughter Barbara and son Boobie who left Wednesday for their home at North Bend, Wash. All of the out-of-state visitors are former residents of Fort Klamath.
Mr. and Mrs. Charles Noah had as their Sunday guests their son-in-law, daughter and little granddaughter, Mr. and Mrs. Maurice Benedict and daughter Nedra, who drove up from Klamath Falls to spend the day at the Noah home.
Mrs. Benedict had recently returned from a trip to San Diego, Calif., where she saw her 17-year-old twin sons, Lawrence and Lloyd, who were at that time stationed there with the U. S. Navy but have subsequently been transferred to a ship in San Francisco Bay waters.
Glad to be back home are Mr. and Mrs. Martin Yeage, owners of Denton Park, who arrived here last Saturday evening from Los Angeles, where they spent the winter. Enroute to Ft. Klamath they stopped at Santa Monica, Calif., where they enjoyed a visit with two pioneers of the Wood River Valley, Mr. and Mrs. H. B. "Ben" Looney, now retired and making their home at Santa Monica.
Little Danny Brantham of Bly was taken to his home in Bly on Saturday by his uncle and aunt, Mr. and Mrs. James Van Wormer, accompanied by their son Douglas. Danny is the son of Mr. and Mrs. William Brantham of Bly, and had spent his week's spring school vacation with his cousin here. After staying Saturday night at the home of Mr. and Mrs. Van Wormer, both men are state highway foremen in their respective localities.
Joan Looney is spending the week's vacation from Oregon State at Corvallis with her parents, Mr.

and Mrs. Raymond S. Looney, at the Looney ranch.

S. Indian Service, and the family of the young couple now numbers two little daughters.
Mr. and Mrs. Raymond Van Wormer and family of Grater Lake National Park returned Sunday evening to their home here after enjoying a snowless week's visit at San Jose, Calif., with her relative. They were accompanied on the trip and visit by George Woodley, warehouseman at the Park.

Mrs. Joanna Taylor returned home Wednesday from a ten-day stay at Howell mineral springs, located near Drain, Ore. Going there to bring Mrs. Taylor home was John Acomb, who made the trip by car.
Roy Wimer and Buster Knox were here Thursday, visiting rela-

tives and friends briefly while looking over the logging situation hereabouts, with an eye to finding out when woods operations will commence. Both men are former residents, having moved to Medford last summer. Wimer, who owns his own logging truck, was working for Tommy Fisher in logging at the old Yawkey tract northeast of here, where cutting and hauling had just got underway nicely when halted summarily by deep snowfall in early December.

From present indications, it would seem that spring logging operations will get underway here soon, as the heavy snow has been disappearing at an incredible rate of speed during the past week of balmy, spring-like weather. Now it is even possible to see fences which were buried under the blanket of snow all winter, and the ground is also visible in places with patches of green grass showing once the snow has gone.

DICK B. MILLER CO.

In a small power station in the Idaho sagebrush last December, men made electricity for the first time from the atom. Lights burned, heaters glowed, machinery pumped — all on atomic energy. Soon, the atom commissioners tell us, we may have a new unending source of heat, light and power.

Soon—the atom will bake a cake!

ANY DAY NOW, there'll be news of some revolutionary civilian use of atomic power.
Heating? . . . Already the British are heating houses from an atomic pile.
Transportation? . . . We'll soon have atom-driven submarines—how about cars and planes? Housekeeping? . . . Will we get new foods, textiles, dishes and labor-saving devices in unheard-of abundance?
When the first big story about peacetime atomic power breaks, you'll want to know how it all began and how it works . . . but most of all, who has it — and where can you get it?
You'll want the whole story . . . from your point of view, as only your local paper's news

columns or ads can tell it to you every day.
That's how it is with every important news or product story. You want all the story. You want to know where you fit in.
So does everybody else.
And just as you read the newspaper every day, so does everybody else. Because there's something for everybody every day.
Why do advertisers invest more of their money in newspapers than in any other form of advertising?
Simply because everybody reads the paper, for its advertising as well as for fun or news.

So, why advertise only to fractions of the people who can buy?
Radio and TV programs reach only fractions of anybody's market — sport fans, homemakers, kids, or whatever. And even they can't all listen at the time a commercial is broadcast.
Magazines reach only fractions of a market. For each one appeals to some people — not to others.
The Newspaper talks to everybody in town. It's created fresh every day to appeal to everybody.
Only the newspaper is first with the most news . . . first with the most people . . . first with the most advertisers!

The newspaper is always "first with the most"
