

ARMS PRODUCTION MAY STOP

In The News

By FRANK JENKINS

The government of the United States announces this morning it is considering buying airplanes from European nations...

Ordinary common sense tells you that if you need something badly and can't make it better buy it from somebody else if you can.

Incidentally, it is humiliating and more than a little disturbing to learn, as we're beginning to, that with all our boasted production capacity we can't make war material as fast as we need it.

More from Washington: The house and senate, 175 million dollars apart, left to a conference committee today the decision on the size of the country's flood control program for the coming year.

Maybe that wouldn't be good politics in a campaign year, but it would certainly be good common sense.

He may be just shooting the breeze for the benefit of the reporters, but if he can't back up his words, I think it's too much power to be held in one man's hands.

Suppose someone could get out of a test tube the secret of complete and detailed predictions of the future.

What if the process told you the exact day and hour on which you'd die of cancer or heart failure—or maybe the plot? Again your life would be ruined.

I'm not so sure but what there's a point at which we'd better call a halt on science.

Grower Meet Set Tonight

TULELAKE — Local onion and potato growers are scheduled to meet at 8 p. m. in the Growers Association office tonight to determine whether or not growers will underwrite the importation of Mexican nationals to help in the fall harvest.

The Tulelake Growers Association has indicated it cannot undertake the expense this year. Last year it put up about \$20,000 to bond, service, feed and house 250 Mexicans, Grower Pres. Ed Duckett said.

A survey has shown that about 325 Mexicans should be brought in this season to supplement the local labor force.

Shuckey pointed out the Mexican help stabilized the going wage scale, and filled out a rather shaky labor picture.

This year's labor situation may be the toughest yet, local labor experts report.

Ikemen In Policy Dispute

DENVER (AP) — Gen. Dwight D. Eisenhower's top policy advisors were sharply divided Friday over whether the general should set up headquarters in Chicago and make an on the spot fight for the Republican presidential nomination.

They feel there will be a multitude of questions which will arise at the convention and that it would be a tremendous help to the Eisenhower cause to have the general available for making decisions and talking to those who wish to see him.

STAY AWAY ON the other hand, another group believes it would be best for the general to stay away from Chicago and not give any impression that he is asking delegates to vote for him.

CONTEST Persons contesting for delegate seats represent the general and Sen. Robert A. Taft, his principal rival for the GOP presidential nomination.

The general scheduled a meeting with Idaho delegates at 2 p. m. (PST) Friday and with Washington State delegates an hour later.

All 14 Idaho delegates are listed in the Taft camp, while 20 of the 24 Washington delegates are regarded as favorable to Eisenhower.

'Roundup' Held Near Tulelake

TULELAKE—A unique "roundup" got under way on the Tulelake Wildlife Refuge near here yesterday, and was slated to continue today.

The birds were in swimming flocks into the channel between the Upper and Lower Tulelake Reservoirs and then were trapped in a wire mesh corral.

The birds were in swimming flocks into the channel between the Upper and Lower Tulelake Reservoirs and then were trapped in a wire mesh corral.

House Votes Control End

WASHINGTON (AP) — The House Friday voted to end price controls on virtually all consumer goods. The vote was subject to reconsideration.

By a vote of 146 to 88, the House decided there should be no price controls on items which are not rationed or allocated.

At present, no goods are rationed, and only a few metals are being allocated.

The amendment was offered by Rep. Talle (R-Iowa), and supported heavily by Republicans.

Opponents, led by chairman Spence (D-Ky.), of the House Banking Committee, claimed it would amount to killing controls.

Spence told the House it should face squarely the issue of price controls and not destroy them by "just whittling away."

Taft Scorns Eisenhower Statements

NEW YORK (AP) — Sen. Robert A. Taft blasted Gen. Dwight D. Eisenhower on domestic and foreign issues Thursday night, scolding a "me-too" type of presidential campaign and lambasted "new deal" Republicanism.

ACCUSES Taft accused Eisenhower of being ill-informed on, not understanding, or shifting his views on several issues — particularly reduction of government expenditures.

END OFS The Ohio senator urged an immediate end to price controls, reduction of Truman administration foreign policies, gradual elimination of the draft, continuation of farm price supports with qualifications, and a personal platform stressing individual liberty.

Steel Supplies Dwindling

By ELTON C. FAY WASHINGTON (AP) — Industry and the military say the nation's arms production — everything from jet engines to atom bombs and nuclear submarines — will come to virtual halt within a few weeks if the steel strike continues.

Secretary of Defense Lovett, calling the potential effect of the strike very serious, arms has moved to get into arms production channels the comparatively small amounts of steel production and finished steel still available.

RAWLINGS Lt. Gen. E. W. Rawlings, commanding general of the Air Materiel Command, said Thursday night the strike has not greatly affected military aircraft production to date.

ATOMIC ENERGY The Atomic Energy Commission is a heavy user of almost all types of steel.
