Someone asked Francis of Assisi how he could accomplish so much. "This may be why," he said. "The Lord looked down from heaven and said, 'Where can I find the weakest, littlest, meanest man on earth?' Then He saw me and said, 'I've found him. I will work through him; he won't be proud of it. He'll say I am only using him because of his insignificance.'"

BROTHER T. T. SMITH, who is now handling services at the Stewart Lenox Baptist Church From Wichita Falls, Tex., he recently accepted a call to this church.

## Calif. Man Buys Weekly

PRINEVILLE (AP) — I. R. Batman of Niles, Calif., will become publisher of the weekly Central Oregonian here Friday. He purchased it for an undisclosed price from Mrs. Theresa Cox who had published it since death of her husband, Remy Cox. Batman, who recently sold the Township Register at Niles after publishing it eight years, got his first print-shop job on the Grants Pass Courier when he was 12 years old. Included in his experience is 10 years with the Stanford University Press. Mrs. Batman and her two children will join him here.

## Accident Claims Worker's Finger

Bernard Schultz, 3931 Shasta Way, suffered an injured hand Wednesday when it was caught in machinery at the Palmerton Lumber Co., where he is employed. He was taken to Klamath Valley hospital where it was reported a finger had been removed.

PRIDE... A disease which makes everyone sick but the person afflicted.

# New Sources Of Uranium Ore Revealed By United States

WASHINGTON (AP) — Precious uranium ore for America's ever-expanding atomic program will soon be coming from two new foreign sources—South Africa and Australia—the United States revealed Thursday in a report also disclosing substantial progress in developing improved atomic weapons during the past six months. The Atomic Energy Commission (AEC) in its 12th semi-annual report to Congress further disclosed that uranium may come from additional new mining facilities in Canada—long an American supplier—and that new sources within the United States itself are nearly ready for initial production. Conspicuous by its absence was any reference to progress on the projected hydrogen bomb.

Implying a vastly increased tempo for its entire atomic enterprise, the AEC revealed that its plans for producing atomic fissionable materials for explosives and other uses had at times been pushed even beyond their designed operating capacity—even as new ones are being built and still others are in prospect under the recently approved \$3 1/2 billion dollars expansion program.

As for the new foreign sources of raw uranium, the AEC said the first of several plants being constructed in South Africa to recover uranium from gold ores of the famous old "Rand" gold field is nearly ready to start production. Concerning the Australian source the AEC said only that an agreement was reached with Australia to supply uranium to the United States. It was the first mention of such an agreement by the AEC although Australia disclosed in March that she had accepted an American offer to purchase uranium from the "radium hill" field of South Australia.

More recently, Australian officials were reported trying to interest the United States in developing Australia's so-called "run jungle" uranium field—believed by Australian experts to be potentially one of the richest and most easily worked fields in the world. The AEC's report also listed: 1. Progress in the development of atomic propulsion for aircraft—with certain phases of design and development work having gained momentum in the past half-year.

2. Continuation of a project to build a second type of atomic engine for possible use in a submarine—even as work progresses on building a hull for a submarine which will house an atomic power plant of a different type. 3. Research accomplishments offering hope for the development of a powerful medicine with which to treat people severely exposed to atomic radiation.

4. Significant advances towards developing improved atomic reactors — or "burners" — which might be used some day for producing useful atomic power and for other purposes.

5. Increased production of raw uranium ore from existing domestic sources—even as "new sources," both foreign and domestic are nearly ready for initial production.

Regarding weapons development, the AEC followed its usual policy of guarded, close-to-the-vest statements. But it made two separate references to the fact that it couldn't say much publicly along these lines—thereby prompting speculation that the weapons developments are really hot stuff.

"Although, for reasons of security, it is impossible here to specify the record of accomplishments in weapons development," the AEC said, "it may be stated that substantial progress was made."

"A large part of the total national effort in the atomic energy field continued to be directed to the military aspects of atomic energy. Production of atomic weapons proceeded steadily. Research in a variety of subjects continued to yield new developments applicable to weapons; work continued on the application of these improvements to the design of specific weapon models to meet the various needs of the armed forces. Construction of several new facilities for weapons work progressed satisfactorily."

Annual board meeting and election of new Red Cross officers is Monday at the Winema Hotel. The meeting is open to all Red Cross members. Reservations must be made by Saturday by phoning either Mrs. Coral Sabo (4670) or Red Cross headquarters (7184).
