

MACDOEL

By MARGARET STEVENSON

The Macdoel-McHebron Scout Troop No. 1 has taken up its activities for the coming year. On Sept. 19, the troop met and elected officers. Elected were: Gerry Garvey, president; vice president, Patsy Davis; secretary, Lorelei Kmatz; treasurer, Marlene Andrus; news reporter, Pat Garvey.

Second Class Scouts are Beverly Walton, Cheryl Garvey, Patsy Davis, Barbara Abell, Bonnie Walton, Marlene Andrus, Marilyn Andrus, Novella Holden, Lorelei Kmatz, and Pat Garvey.

The Scouts working on their Tenderfoot badges are Alice Stone, Ivy May, Patsy Davis, Marlene Deldrich and Sylvia Holbrook.

Leaders for the Troop are Mrs. Charles Abell, Mrs. Jim Butler and Mrs. Steve Eskildsen.

Arriving Sept. 17, to visit Mr. and Mrs. Paul Robinson were Mr. and Mrs. Pat Robinson and daughter Jerry Lee, Venice, Mr. and Mrs. Lloyd Davis and Mr. and Mrs. Clarence Chown, Culver City, Ray Hampton, Van Nuys and Arthur J. Presley, Santa Monica. The group went deer hunting over the weekend.

Mrs. Verba Cummings of Alameda and Joe Kennedy of Sacramento were weekend guests in the Roy Andrus home. Kennedy shot a 3-point deer.

Weekend hunting guests of Mr. and Mrs. Bud Stevenson and Barbara were, A. M. Adams, Adams Stevenson, Modesto, Mr. and Mrs. R. R. Ruffin Jr., Merrill, Virgil Ruffin, Malin, Norman Du Bois, Stevenson, Mr. and Mrs. J. E. Ferguson, Bakersfield.

Fred Raymond, Roseville, was a weekend hunting guest of the Crutcher family. He bagged a 3-point deer.

Mr. and Mrs. Smith, Yuma, Ariz., and Mr. and Mrs. Charles Huffard, Harry Huffard, Dana Huffard, and son and Emerson Huffard, Monterey arrived for deer season. Mr. and Mrs. Charles Huffard.

ford brought with them their trailer house and expect to stay an indefinite time.

Mr. and Mrs. John Jones formerly of Macdoel, who have been residing for the past few months in Alaska arrived in Macdoel Sept. 22, to live.

Mr. and Mrs. Lambert Bartlett, Redding, were weekend guests of Mr. and Mrs. Harold Edvall.

Mr. and Mrs. Lloyd Naught and daughter Carol spent the weekend in Medford.

Glen McKinnis, Ashland, and brother of Mrs. Lloyd Naught spent Monday night with the Naughts.

Mr. and Mrs. Nils Nilsson, Redding, were weekend guests of Mr. and Mrs. Morris Gilmer. While here they went hunting and visited friends.

Mr. and Mrs. Floyd Murray, Mr. and Mrs. M. A. Gilmer and Myra West attended the Ashland 100th Centennial in Ashland Sept. 20.

Coming home to spend the weekend and to hunt were Rosemary Robinson and Hilary Winberger, who both attend the University of California.

Lila Winebarger, San Francisco, arrived at the home of her grandparents, Mr. and Mrs. Walter Robinson of the Prather ranch early last week. She plans to stay indefinitely.

Among those attending the Shrine Circus in Klamath Falls Sunday evening were Mr. and Mrs. Elmus Kaponen and Mr. and Mrs. Keith Truax and family.

Peggy Hatfield, Klamath Falls, was an overnight guest of Sharon Myers, Sept. 17.

Mr. and Mrs. L. E. Clinton, Walnut Creek, were weekend guests of Mr. and Mrs. Jim Whitt.

John Parsons, Red Rock, is under doctor's care this week with a virus flu infection.

Mal Mathews, Walnut Creek, was a hunting guest in Macdoel Sept. 20-21.

Mrs. Walter Carruthers, who has been in Los Angeles for some time due to illness in the family, arrived home this week. She reports that Frank Glati, who is in the Kern General Hospital in Bakersfield after having been in an automobile wreck on Sept. 10, is slightly improved and is past the immediate danger stage. Glati suffered a punctured lung and other critical injuries.

Other hunting guests of Mr. and Mrs. Jim Whitt for the opening

of deer season were: Mr. and Mrs. Charles Laws and sons, Skippy and Steve, Concord, Mr. and Mrs. Hilary Braunman, Lafayette, Mr. and Mrs. Sam Strickler, Walnut Creek.

Wednesday evening Sept. 17, the Butte Valley Spurs met for their regular meeting in the Macdoel Party Room at 8 p.m.

During the business session Mrs. Juanita Stevenson, treasurer, of the club resigned her position due to moving away soon. Mrs. Mary Myers was elected to be the new treasurer.

Plans for a horse back ride were made to take place Oct. 5. The group will meet at the 'D' corral near the D Ranch at 11 a.m. going from there to the J. P. Ranch where they will meet the chuckwagon and it's crew of cooks for a wicker roast and all the trimmings.

The members decided to ask the men for the outing.

At the close of the meeting the "Spurs" sang "On the Range" accompanied by Barbara Anderson at the piano. Mrs. Juanita Stevenson and Mrs. Juanita Goode served refreshments of cake and punch to the 28 members present.

Mrs. Nancy Egeline and Nancy Hamilton will be hostesses at the next meeting which will take place Oct. 15.

Bly

By MRS. J. M. KENDALL

Bob Windfield writes from Japan that out of a class of five hundred rated enlisted men, he's the only seaman taking classes in optometry.

Norman Winningham has recently visited the Everett Plumber. He has brought the news that his parents are building a new home at Yreka, Calif.

Mr. and Mrs. Jim Dixon are home from a three month visit with their daughter, Marge Fitzpatrick in Buffalo Creek, British Columbia, Canada. The Fitzpatricks are expected to be in Bly about opening day of hunting season. While motoring back Mr. and Mrs. Dixon visited Mrs. Dixon's brother and family, Mr. and Mrs. John Mulkey at St. John, Wash.

Mr. and Mrs. Wilson West are new residents of Bly. They are formerly of Olympia, Washington. Mr. West is employed as shop foreman for the Bly Logging Co. and the Wests are living at the company residence.

Jim Briley has been hobbling around on one foot. A victim of blood poisoning.

Liz Hyde, Republican Party Committeewoman, would be glad to register anyone eligible right here in Bly. The deadline to register is Oct. 4.

Bob and Betty Hagerud, Bly's new teachers, taught last year at Lexington, Ore., where there were only twenty students in the high school. They are graduates of Lewis and Clark, Mr. Hagerud majoring in education and Mrs. Hagerud in PE.

Darlene Hadley entered OTI this week. She is taking the dental assistant course and is living on the campus. Her grandmother is keeping house for her.

The Bly Women's Club met at the home of Mrs. F. W. Hyde last Wednesday. It was decided to have a homemade pie and cake sale at the Sycan Store at noon on Saturday, Oct. 3.

The Bly Lion's Club met at the home of the president, Joe Kendall, last Wednesday evening. Several ideas were presented and discussed for a new fall project, but no final decision was made.

Tex Barnes was taken to Lakeview Hospital last week with a mild heart attack.

Mr. and Mrs. David House have a baby born Sept. 19. They have named him Michael David.

Eight Boy Scouts of Bly Troop 19 spent last weekend on top of Gearhart Mountain. Friday night they camped at Finley Corral and on Saturday morning they hiked and rode horses fourteen miles to the very top of the mountain. After lunch parents in Bly had fun trying to read coded messages, mirror flashed into Bly by Scoutmaster Spike Armstrong. The boys spent Saturday night camped at Blue Lake. Sunday they returned home by way of Dairy Creek. Monday evening they attended the Shrine Circus as guests of Spangler Lumber Co. The eight boys who made the trips are: Michael Powell, Walter Lee, Martin Clemens, Howard Armstrong, Tucker Kendall, Jimmy Leatherwood, Paul Melness and Terry Nelson. Tucker Kendall surprised everyone by finding a cool about twenty-five feet from the top of the mountain.

Mrs. H. L. Hadley entertained the Women's Bridge Club last Friday evening with Mrs. William A. Hatzi, winner for the evening.

Mr. and Mrs. A. L. Leatherwood are honored with a visit from Mr. Leatherwood's mother, Mrs. Lou Leatherwood of Red Bluff, Calif.

Guests of Mr. and Mrs. Max Dillavore are Mrs. Lester Cummings of Horse Creek, Calif., and Mr. and Mrs. Marion Johnson of Glidden, Iowa. Mrs. Johnson is Mrs. Dillavore's sister.

PALS—Champion Timber, an Irish Wolfhound, appears unperturbed by little Marguerite Horn's cuddling gesture during a National Dog Week exhibition at Rockefeller Center in New York. Timber was exhibited by Thomas Madigan of Huntington, Long Island.

Up to this time we have validated only 11 California deer which is some fewer than usual but actually better than was anticipated by many. Harvey Porter who has been helping bring the deer out on horseback said he was surprised that he knew of 18 deer that had been killed in the area thus far.

Kendall Houser and Lauren Ward of Van Nuys, California stopped here Monday for a visit with the latter's cousin, Les Perry and family. They immediately proceeded into the direction of the mountains with Les in an effort to seek a big buck. The couple have been fishing for some time over in Idaho and are trying to wind up their vacation with a bang! excuse—

EGYPT'S PREMIER GREETING FINANCIAL EXPERT—Premier Maj. Gen. Mohamed Naguib (left) shakes hands with Hjalmar Schacht, Hitler's economic expert, in Cairo as Schacht arrived to discuss Egypt's financial and economic problems. At right is Mrs. Schacht. Premier Naguib is reported to have pinned his faith on Schacht to bring Egypt out of its economic wilderness within a year. Schacht went to Cairo at the invitation of the government.

JUNIOR ROCKET—This German lad looks at a toy rocket, capable of speeds up to 85 m.p.h., exhibited at Frankfurt autumn fair. It parachutes to earth at the end of its climb.

BATTLE'S AFTERMATH—An Army medical aid man climbs Old Baldy in Korea after it was retaken by United Nations troops. He is seeking to identify the bodies of those killed in the all-night fighting. Body of GI lies in foreground at base of scorched tree.

New Pine Creek

By IRVIN PARIS

Thirteen women, their husbands and families, making about 30 persons in all, celebrated the finish of the plum season with a potluck party last Monday evening, Sept. 23, in the basement of the First Baptist Church.

The women under the foremanship of Mrs. Ruby Partin, constituted the crew which picked the crop of plums at the A. E. Rugg wild plum orchard. Rugg said that owing to the storm coming just when it did this year, he lost about half of his crop. The rain caused the plums to crack open and considerable time was lost in the picking operation picking over the spoiled plums.

The dinner party has become an annual custom since the orchard first started bearing fruit three or four years ago and now has become sort of a tradition amongst the pickers. Rugg showed some colored slides after the banquet which were enjoyed and the group of women presented a gift to Mr. and Mrs. Rugg and Mrs. Ruby Partin as a memo to continued success in the effort of growing wild plums commercially.

Miss Dorothy Overton, new Mrs. Duke Stewart, having been married in Reno, Sept. 17, will make her home in Lakeview at the Harvey House Apartments. Mr. Stewart is going to work for the Lakeview Logging Company and Dorothy has been employed at the Cooper Drive-in all summer. Their friends wish them success and happiness.

Up to this time we have validated only 11 California deer which is some fewer than usual but actually better than was anticipated by many. Harvey Porter who has been helping bring the deer out on horseback said he was surprised that he knew of 18 deer that had been killed in the area thus far.

mean a buck!

Mrs. Silvia Oppio of Sparks, Nevada is visiting for a time with her sister, Mrs. Cliff Striver. Mrs. Oppio has been keeping 13-year-old, Clinton McMullen for some time, whose father, George R. McMullen passed away last Saturday in Cedarville. She is awaiting instructions regarding the funeral services.

Houseguests at the home of Mr. and Mrs. Marvin Roeder and sons Donald and Clark are Mr. and Mrs. Barry Hinz, who arrived by car Sunday evening for a visit here. He is a nephew of Mrs. Roeder and grandson of Charles J. Brice, and during their stay, they will be houseguests at the Roeder home.

Despite the fact that the official season at Crater Lake National Park came to an end on Sept. 15, tourist travel is still heavy. Many out-of-state residents taking advantage of the glorious fall weather to visit Crater Lake and other points of scenic beauty in this locality.

The warm dry spell of weather pleases everyone except those who want to go deer hunting on the opening day of the season, Oct. 1. These nimrods are afraid the forests won't be opened to hunters of the present weather continues and the woods remain tinder dry, with danger of forest fires very acute, even without the added hazard of an invasion of deer hunters.

These hunters are keeping their fingers crossed and praying for rain.

mean a buck!

McMullen passed away last Saturday in Cedarville. She is awaiting instructions regarding the funeral services.

On The House

A crying need for an easy way to dampproof basements has flooded the market with various materials which are so good for minor problems that they inspire their promoters to make fantastic claims.

Apparently such promotion is more of less sound business since the majority of damp basements can be remedied rather simply and the material used will rarely be subjected to a severe test.

However, the National Bureau of Standards has found that the basic ingredient of most of such products is Portland cement "and few, if any, show any marked superiority in preventing dampness over Portland cement."

This is shown in a report, which Joseph H. Orendorf, director of research for the Housing and Home Finance Agency in Washington, says "indicates to us that Portland cement is the important ingredient and that waterproofing admixtures and coatings do not necessarily improve the water-tightness or absorption characteristics of the wall."

Having been assured of the performance of cement water-paints, just having finished different parts of a basement with different types of paint, this writer can report on personal experience. Having been assured of a manufacturer's representative that a good grade of oil paint would suffice for a permanently dry 12-inch poured concrete foundation, we tried it. A gallon covered less than 100 square feet because of the comparatively rough surface.

It was obvious that a sealer was called for. Shellac was used for the next section and the oil paint went farther. Still two coats of paint, unthinned, were needed for fair coverage and a third could have been used to advantage. This paint costs about \$6 per gallon.

In a third section, a rubber-base cold-water proofing widely advertised for use with a roller, was tried. One coat covered better than the two coats of oil paint on top of shellac.

In another place cement-water paint was used with highly satisfactory results.

Portland cement paint, however, usually is available in plain white. If you want colors you add mineral pigments to suit. But the big advantage is that it provides a certain definite damp-proofing quality which ordinary paints lack. Orendorf's report states: "Where the basement wall is subject to only mild or occasional dampness, it can often be made sufficiently dry by scrubbing one or two coats of cement-water paint on the interior face of the wall. Where the water condition is severe, paint coats of this type usually will not correct the situation and it usually is necessary to excavate around the wall and apply a Portland cement grout coating, over which two coats of bituminous material is usually applied to bridge over any hair checks."

And here is the formula of that HHEA expert:

"Cement-water paint may be purchased ready-mixed or can be made by mixing either gray or white Portland cement with sufficient water to produce a creamy consistency. For concrete masonry walls, cement-water paint consisting of one part of fine silica sand (passing a 20-mesh sieve) and one part of Portland cement are effective. They

are best applied by scrubbing in with a stiff bristled brush using a stiff brush scrubbing brush. They should be kept damp for a few days to prevent hair checking."

The American Builder, trade publication for home builders, is an authoritative study of basement problems, recently observed that cement-water paints "repel moisture effectively." The method of use recommended is: (1) Vigorous brushing of surfaces; (2) Filling with a heavy paste, all large cracks; (3) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (4) Applying the first coat with circular movements of a scrub brush, with the brush held at an angle; (5) Curing with a fine fog spray; (6) Applying the first coat has hardened, keeping it damp for 24 hours; (7) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (8) Curing with a heavy paste, all large cracks; (9) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (10) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (11) Curing with a heavy paste, all large cracks; (12) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (13) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (14) Curing with a heavy paste, all large cracks; (15) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (16) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (17) Curing with a heavy paste, all large cracks; (18) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (19) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (20) Curing with a heavy paste, all large cracks; (21) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (22) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (23) Curing with a heavy paste, all large cracks; (24) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (25) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (26) Curing with a heavy paste, all large cracks; (27) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (28) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (29) Curing with a heavy paste, all large cracks; (30) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (31) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (32) Curing with a heavy paste, all large cracks; (33) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (34) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (35) Curing with a heavy paste, all large cracks; (36) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (37) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (38) Curing with a heavy paste, all large cracks; (39) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (40) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (41) Curing with a heavy paste, all large cracks; (42) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (43) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (44) Curing with a heavy paste, all large cracks; (45) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (46) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (47) Curing with a heavy paste, all large cracks; (48) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (49) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (50) Curing with a heavy paste, all large cracks; (51) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (52) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (53) Curing with a heavy paste, all large cracks; (54) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (55) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (56) Curing with a heavy paste, all large cracks; (57) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (58) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (59) Curing with a heavy paste, all large cracks; (60) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (61) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (62) Curing with a heavy paste, all large cracks; (63) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (64) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (65) Curing with a heavy paste, all large cracks; (66) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (67) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (68) Curing with a heavy paste, all large cracks; (69) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (70) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (71) Curing with a heavy paste, all large cracks; (72) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (73) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (74) Curing with a heavy paste, all large cracks; (75) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (76) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (77) Curing with a heavy paste, all large cracks; (78) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (79) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (80) Curing with a heavy paste, all large cracks; (81) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (82) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (83) Curing with a heavy paste, all large cracks; (84) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (85) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (86) Curing with a heavy paste, all large cracks; (87) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (88) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (89) Curing with a heavy paste, all large cracks; (90) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (91) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (92) Curing with a heavy paste, all large cracks; (93) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (94) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (95) Curing with a heavy paste, all large cracks; (96) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (97) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (98) Curing with a heavy paste, all large cracks; (99) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (100) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (101) Curing with a heavy paste, all large cracks; (102) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (103) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (104) Curing with a heavy paste, all large cracks; (105) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (106) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (107) Curing with a heavy paste, all large cracks; (108) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (109) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (110) Curing with a heavy paste, all large cracks; (111) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (112) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (113) Curing with a heavy paste, all large cracks; (114) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (115) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (116) Curing with a heavy paste, all large cracks; (117) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (118) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (119) Curing with a heavy paste, all large cracks; (120) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (121) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (122) Curing with a heavy paste, all large cracks; (123) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (124) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (125) Curing with a heavy paste, all large cracks; (126) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (127) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (128) Curing with a heavy paste, all large cracks; (129) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (130) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (131) Curing with a heavy paste, all large cracks; (132) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (133) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (134) Curing with a heavy paste, all large cracks; (135) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (136) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (137) Curing with a heavy paste, all large cracks; (138) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (139) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (140) Curing with a heavy paste, all large cracks; (141) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (142) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (143) Curing with a heavy paste, all large cracks; (144) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (145) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (146) Curing with a heavy paste, all large cracks; (147) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (148) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (149) Curing with a heavy paste, all large cracks; (150) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (151) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (152) Curing with a heavy paste, all large cracks; (153) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (154) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (155) Curing with a heavy paste, all large cracks; (156) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (157) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (158) Curing with a heavy paste, all large cracks; (159) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (160) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (161) Curing with a heavy paste, all large cracks; (162) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (163) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (164) Curing with a heavy paste, all large cracks; (165) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (166) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (167) Curing with a heavy paste, all large cracks; (168) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (169) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (170) Curing with a heavy paste, all large cracks; (171) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (172) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (173) Curing with a heavy paste, all large cracks; (174) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (175) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (176) Curing with a heavy paste, all large cracks; (177) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (178) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (179) Curing with a heavy paste, all large cracks; (180) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (181) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (182) Curing with a heavy paste, all large cracks; (183) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (184) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (185) Curing with a heavy paste, all large cracks; (186) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (187) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (188) Curing with a heavy paste, all large cracks; (189) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (190) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (191) Curing with a heavy paste, all large cracks; (192) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (193) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (194) Curing with a heavy paste, all large cracks; (195) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (196) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (197) Curing with a heavy paste, all large cracks; (198) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (199) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (200) Curing with a heavy paste, all large cracks; (201) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (202) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (203) Curing with a heavy paste, all large cracks; (204) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (205) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (206) Curing with a heavy paste, all large cracks; (207) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (208) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (209) Curing with a heavy paste, all large cracks; (210) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (211) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (212) Curing with a heavy paste, all large cracks; (213) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (214) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (215) Curing with a heavy paste, all large cracks; (216) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (217) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (218) Curing with a heavy paste, all large cracks; (219) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (220) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (221) Curing with a heavy paste, all large cracks; (222) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (223) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (224) Curing with a heavy paste, all large cracks; (225) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (226) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (227) Curing with a heavy paste, all large cracks; (228) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (229) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (230) Curing with a heavy paste, all large cracks; (231) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (232) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (233) Curing with a heavy paste, all large cracks; (234) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (235) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (236) Curing with a heavy paste, all large cracks; (237) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (238) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (239) Curing with a heavy paste, all large cracks; (240) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (241) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (242) Curing with a heavy paste, all large cracks; (243) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (244) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (245) Curing with a heavy paste, all large cracks; (246) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (247) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (248) Curing with a heavy paste, all large cracks; (249) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (250) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (251) Curing with a heavy paste, all large cracks; (252) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (253) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (254) Curing with a heavy paste, all large cracks; (255) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (256) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (257) Curing with a heavy paste, all large cracks; (258) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (259) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (260) Curing with a heavy paste, all large cracks; (261) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (262) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (263) Curing with a heavy paste, all large cracks; (264) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (265) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (266) Curing with a heavy paste, all large cracks; (267) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (268) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (269) Curing with a heavy paste, all large cracks; (270) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (271) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (272) Curing with a heavy paste, all large cracks; (273) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (274) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (275) Curing with a heavy paste, all large cracks; (276) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (277) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (278) Curing with a heavy paste, all large cracks; (279) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (280) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (281) Curing with a heavy paste, all large cracks; (282) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (283) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (284) Curing with a heavy paste, all large cracks; (285) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (286) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (287) Curing with a heavy paste, all large cracks; (288) Fog spraying the surface with a hose, allowing water to drain off, but not dry; (289) Applying a second coat in long, horizontal strokes with a whitewash or calcimine brush; (290) C
