

THANKSGIVING IS THE TIME for using your loveliest china, your cherished sterling, linen crystal. Here is Lenox Pine from Rickys, its graceful sprays of needles outlined against creamy translucency. As a table arrangement, be clever, cut a Pilgrim hat from stiff black paper. Fasten together with brads. Cut a buckle from silver foil, place hat on circle of autumn leaves and encircle brim with yellow pompon Mums. Use twisted yellow tapers and green linen cloth.

Air Force Flier Sets New Speed Mark

THERMAL, Calif. (AP)—A roaring, flame-spewing P-80 Sabre jet plane piloted by Capt. J. Slade Nash of Edwards Air Force Base has established a new unofficial world speed record — 699.9 miles per hour.

Capt. Nash, 31, whose home is in Menville, Ia., made four low-level passes yesterday over a measured three-kilometer course at the edge of the Salton Sea, 235 feet below sea level. His performance was made under rules of the Federation Aeronautique Internationale and the National Aeronautics Association, which must verify it before it becomes official.

In shattering the record for operational aircraft in the North American all-weather interceptor, Capt. Nash topped the 670.81 miles per hour mark set last Sept. 15 by Maj. Richard L. Johnson at Edwards AFB. Johnson used an earlier Sabre model, the P-86A.

At his top speed Capt. Nash's plane nosed toward the dangerous compressibility of the sonic wall. The speed of sound in the 75-degree temperature of the lake shore was about 775 miles per hour at the time of the test runs in the Imperial Valley.

The rules under which the flight was made specified that the plane must not fly higher than 1,440 feet 500 meters at any time during the test. On the four straightaway passes, he could not fly above 328 feet 100 meters. Actually, Capt. Nash made the four passes at not more than 100 feet off the sun-swept earth of the eastern shore of the inland sea. He was monitored by four T-28 training planes and timed with a high speed movie

camera and a special chronograph system.

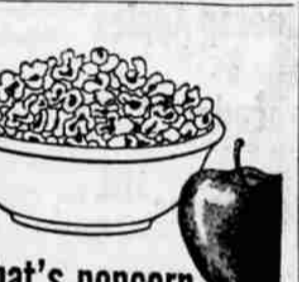

The North American Sabre carried 24 rockets in a retractable launcher and weighed about nine tons. It was powered by a General Electric turbojet with afterburner developing in excess of 5,700 pounds thrust.

Capt. Nash's wife, Glens, mother of three young daughters, was at the field to see her husband set the record. She appeared calm but she admitted to "plenty of nervousness" and said she was glad when it was over.

Nash himself said there was little rough air to contend with "despite the low altitude."

"I experienced some mild shock waves," he told newsmen. "They were like streaks of lightning around the canopy during the runs."
