Princess Wladyslaw Jerzy Boguslaw Radoslaw (right) has a face-to-face meeting with Leonard Blecher, 21, male fashion model who told Hollywood, Calif., police earlier that he stole her jewels at her suggestion so she could gain publicity. Police quoted him as saying she promised \$1,000 for the job. At the Hollywood police station meeting the Princess repeated she had never before seen or heard of Blecher. He is being held on suspicion of burglary.

Red-Protected Railway Aids Indochina Communists

WASHINGTON (AP) — State and Defense Department experts said today Russia-made war supplies are pouring into Indochina over a transcontinental Red railway system protected from Allied air attack because it cuts through China. Officials said this gives new striking power to Communist forces in Indochina, and presents a new, sinister threat to Burma and Thailand.

Informants said evidence that the Vietnam (Communist) were receiving Russian supplies was found in a recent raid by French and native defense forces on a Communist supply center.

Man Shot; Drives Home

LIGONIER, Pa. (AP) — George Giesey, 35, of Ligonier, who drove 12 miles to his home by auto despite a bullet wound under his heart, is in critical condition today at McGinnis Hospital.

Giesey told state police a .22 caliber pistol discharged while he was cleaning it at his hunting lodge. He collapsed after reaching home.

Allied raiders captured 25 tons of Russian-made mortar shells and four Russian "Molotov" trucks with gasoline engines, among other items.

The presence of these 2½-ton trucks at the Vietnam base of operations means that Red forces in Indochina must now be regarded as far more mobile than ever and thus creates a new degree of danger for all Southeast Asia, officials said.

These informants declared that Phu-tho, where the captured war materials were concentrated, is around 400 miles from the Burma border and about 350 miles from the Thai border.

In the raid many other types of weapons and ammunition were also captured, including supplies of French, American, British and Japanese manufacture, as well as Chinese materials.

But interest here centered on the four Russian trucks because of their possible strategic signifi-

ficance. The fact that they are in Indochina at all, responsible authorities said, means that the Red railway line and Indochinese supply routes are functioning against all obstacles.

The last link of the rail line from the Chinese supply center of Nanning in Kwangsi Province, China, to Chen-kuan on the China-Indochina border, a distance of 130 miles, was completed in October, 1951. It was estimated to be capable of carrying many thousands of tons per month to Indochinese Red forces.

But Allied leaders figured that any haulage of more than 80 miles from the rail terminal to various Vietnam supply centers would be highly vulnerable to air attack. The French have untested use of the air.

When Allied leaders learned that

Red supplies were piling up despite repeated air raids, a large-scale reconnaissance in force, complete with artillery and paratroopers, was ordered a few weeks ago to smash the latest Red operation center in the triangle formed by the towns Phu-tho, Tuyen Quang and Yen Bay.

It was regarded as a highly successful operation when results were analyzed and captured material totaled up a week ago.

Officials here professed to be as pleased by the maneuver as they were distressed by the evidence it provided of the flow of Russian supplies all the way across Central Asia, Siberia and China to Indochina.

McCarran Law Soon in Effect

WASHINGTON (AP) — Working against a rapidly nearing deadline, Justice Department experts today continued their efforts to draft regulations for dealing with aliens under the new immigration law.

The new law, known as the McCarran-Walter Act, becomes effective Dec. 24, just one month

from today. Atty. Gen. James P. McGranery, who has described the new statute as badly organized, contradictory and possibly unconstitutional in some respects, said over the week end he hopes to have the revised regulation ready sometime around Dec. 14.

EXTRA FLAVOR
because it's Pan-Toasted

This West of ours really keeps us humping!

In the railroad we do a lot of humping—as defined by Mr. Webster. But "humping" also has a special railroad meaning and we do a lot of that too.

The railroad term applies to an improved method of switching cars and making up freight trains, which reduces effort and helps move freight through large terminals with greater speed and efficiency.

\$7,000,000 Hump

Because this system is so helpful at heavy freight concentration points, we've recently built ourselves \$7,000,000 worth of "hump" yards at Roseville, California, and at Los Angeles to better handle the increasing movement of freight between the Pacific Coast and other parts of our system and to and from the East. Here thousands of freight cars daily are classified, switched, coupled, remade into new trains, and spotted on miles of tracks, ready to roll.

The Hard Way

Formerly at these yards switch engines shuttled back and forth switching cars from one string of cars brought in by incoming trains to other strings of cars being made up as outgoing trains. This took a lot of backing and filling and took time, too.

Now these yards have been greatly enlarged, and through radio, electronics and old-fashioned gravity, the use of switch engines is greatly curtailed and the making up of freight trains is expedited. In each of

these yards a small hill or "hump" was built. Cars from incoming trains are shoved up the hill by a radio-equipped switch engine. As the cars go up the hill they are inspected top and bottom by men in pits and in glassed-in towers.

Iron Hand, Velvet Glove

After reaching the top of the hill or "hump," the cars roll down, by gravity, into a network of tracks. Their progress is directed by men in towers who, by flicking levers or pressing buttons, operate track switches, and an amazing set of electrically controlled brakes called "retarders," which grip the car wheels as they pass, slipping the most heavily loaded cars into position with easy impact.

You Win

These "hump yards," costing millions, save time, speed freight and increase our railroad's efficiency. They are continuing proof of Southern Pacific's determination to give our "Golden Empire" (see map) the best freight and passenger service in the country.
