

# New Senate Could be Upset By Anti-Filibuster Plans

WASHINGTON (AP)—Senators trying to figure out how to smash filibusters are considering strategy that could throw the opening session of the new Senate on Jan. 3

## Youth Again Joins Marines

READING, Pa. (AP)—The in-again-out-again boy of the Marine Corps, 17-year-old William H. Houston, is in again today. Houston, whose father Marine Maj. John Lester Houston, was killed at Iwo Jima in 1943, enlisted in Jacksonville, Fla., when he was 15. He had almost completed boot training at Parris Island, S. C., when his age was discovered and he was discharged. Not to be discouraged, Houston enlisted again at Reading when he was 16. "You're here again," they asked at Parris Island as they gave the lad his second honorable discharge. During his present enlistment Houston told Sgt. Norman Pershing he was 17, the sergeant asked "You're not kidding now?" Houston assured him he was serious. He heads for Parris Island again in a few days.

Under Rule 22, a bill can be called to a filibuster only by the votes of 40 senators, or two-thirds of the entire membership. Opponents contend it is almost impossible to apply. What's more, Rule 22 provides that no debate limitation whatever shall apply to proposals to change the rules—so that any move to change it can be talked to death. Tentative opening-day strategy outlined by Humphrey to cope with this roadblock to civil rights and other legislation involves some fast parliamentary footwork. Here's what Humphrey expects would happen if the plan were put into execution: At the outset of the session a motion would be made to appoint new Senate rules; the vice president, who is Senate presiding officer, probably would rule that the motion was out of order, relying on all past precedents that the Senate, because only a third of its membership changes at one time, is a continuing body and so already has its rules. An appeal would be taken from the ruling of the vice president; only a majority vote is necessary to overturn such a ruling and Humphrey is hopeful that the necessary votes could be obtained. If the vice president were overruled, the effect would be to leave the Senate without any rules. Humphrey said in the case ordinary parliamentary rules would apply and any senators attempting to filibuster against the adoption of new rules no longer would have the protection of Rule 22. Aside from parliamentary technicalities—and some authorities believe there are flaws in the plan—such a maneuver would touch off a bitter fight by Southern senators who long have relied on filibusters to block fair employment practices legislation and other civil rights measures.
