Japan Warns Reds of Airplane Trespass

TOKYO (AP)—Japan, irritated by permission over Japan would be "at least 20 or 30" violations of its borders, today warned Russia against sending warplanes over Japanese territory.

A Foreign Office spokesman said U. S. defense planes would shoot down intruders if necessary.

The U. S. had approved Japan's ultimatum in advance.

Japan thus in effect rattled a U. S. saber against its old enemy to the north. It did not name Russia, but left no doubt that's the country it meant.

Shortly after the blunt warning, Gen. Mark Clark's headquarters announced the Far East commander had ordered his defense chiefs in Japan to take "all measures necessary to prevent further violations of Japan's security or acts which endanger U. S. forces."

A Japanese government spokesman said planes flying without

would take steps to drive off intruding aircraft.

"Violations of our territorial air over Hokkaido by foreign military planes have of late become increasingly frequent," the government statement said.

"Such trespassers are not only forbidden under international law but they constitute also a grave menace to the security of Japan."

"When they don't follow our orders," Mitsuo Tanaka of the Foreign Office told a news conference, "if necessary (we will) shoot them down."

Tanaka's statement came only a few hours after the Japanese government—with full U. S. backing—warned that Japan and the U. S.

Balsiger

(Continued from page 6)

The Balsiger Motor company plant was originally built with the thought of pleasant working conditions for the employees. Just recently the company installed one of the most complete and efficient ventilating systems to be found on the market which operates in all of the departments providing clean wholesome air at all times.

Augmenting the outstanding service for motorists and truck operators for which the Balsiger Motor Company has an enviable reputation is the maintenance of four wrecker-trucks one of which is the most powerful wrecker in the region. These wreckers are on call twenty-four hours out of every day and will go to any location desired. This is also one of the few repair plants that maintains the equipment for turning brake drums with specialists for brake service.

The Balsiger Motor company is also distributor for Sieberling and Armstrong tires for the same territory where they represent Ford cars and trucks which includes Klamath County in Oregon and northern Modoc and Siskiyou counties in California. A complete new tire recapping, retreading and vulcanizing plant is maintained operating under the Lodi system with 12 moulds capable of efficiently repairing any passenger or truck tire.
