February revolution freed the exiles, and was ready to move in when the Bolsheviks saw an opportunity to seize the revolution in October.

Stalin had charge of the Bolshevik faction of the Social Democrats.

support the middle class liberals, on the Marxist theory that the bourgeois revolution must come first in Russia. Lenin wanted the Socialists to seize and keep the revolutionary leadership. The split widened.

Young Djugashvili—by this time he was known by many names, including Koba and Ivanovich—already was under the spell of the dynamic Lenin. He had begun writing Lenin admiring letters as early as 1902. After his escape from the snowy wilderness, he made his way back to Tiflis, an agonizing journey, and cast his lot formally with Lenin and the Bolsheviks.

When Japan defeated Russia in 1905, a crowd at the St. Petersburg Winter Palace petitioned the czar to ease their starvation. It was an orderly crowd which carried banners of the czar—their "Little Father"—in an approved patriotic manner. But the royal guards opened fire. Many were massacred. The revolution of 1905, dress rehearsal for 1917, erupted.

Desperate, the czar offered a duma, or consultative assembly. But the revolt continued into the climactic December rising. Soldiers' guns put it down. The czar withdrew his concessions.

Lenin was in Switzerland until the revolt was all but spent. But Djugashvili was active in the Caucasus, leading strikes in Baku which two years later brought about the first collective agreement in Russia to be granted by employers. Sometime during this hectic period, Djugashvili's first wife, Yekaterina Svanidze, died.

Djugashvili's success in Baku attracted Lenin's attention. Under the name Ivanovich, Djugashvili was elected a delegate to the Social Democratic National Conference which met at Tammerfors, Finland—then part of Russia—in June, 1907. In his initial venture into European Russia, he met Lenin for the first time.

Still an Ivanovich, he was sent to Stockholm for the Social Democratic Congress of 1908. There he opposed Lenin, standing for distribution of the land to peasants instead of nationalization. He won out. A year later he went to the London congress and had his first meeting with Trotsky.

Back in Russia, Djugashvili returned to the life of a conspirator. In June, 1907, he organized a hold-up of the bank of Tiflis, seizing millions of rubles for the party. The Bolsheviks, condemning such methods, expelled him, but it was a formal sort of thing which did not take. Djugashvili went right

with his work at the oilfields, where he edited a fanatically Bolshevik newspaper, once again arousing Lenin's admiration.

In 1908 he was arrested again and forced, with other prisoners, to run a gantlet of soldiers who beat him with rifle butts. Witnesses said he walked erect through it. Then he was sent to exile in Northern Russia, a mild penalty. Evidently the czarist police did not consider him too dangerous.

He escaped in the spring of 1909, worked his way back to Baku and became correspondent of central party periodicals, again attracting Lenin's notice.

Djugashvili was arrested again in 1910 and again banished to the north. He was out in June, 1911. He stayed around Moscow and St. Petersburg, although his sentence had banned him from big cities. The revolutionary movement was on the upsurge again. Lenin named Djugashvili to a sort of inner party cabinet, and the young Georgian was on his way to the top.

After several more arrests and escapes, he edited Zvezda (The Star) for the party and launched Pravda, with the help of a young intellectual from the bourgeoisie named Scriabin, whose party name was Molotov (The Hammer). In December he visited Lenin in Poland.

At Lenin's suggestion, Djugashvili went to Vienna to write "Problems of Nationalities and Social Democracy." He signed it K. (Koba). On reading it, Lenin referred to the author as "that magnificent Georgian."

From then on the Georgian Djugashvili was Stalin—Man of Steel—a name he admitted he thought suited him well. The work he did in Vienna was to make him Lenin's choice for commissar of nationalities five years later, because it showed him conversant with problems inherent in Russia's melting pot of peoples.

While in Vienna he worked closely with Bukharin, a man he was to purge in later years, and got much help from him. Trotsky was there too, preaching that the Russian Revolution should touch off revolt in all Europe and attacking Lenin as a splitter of the party.

On his return from Vienna, Stalin was arrested and sent to Siberia for four years. There he met Jacob Sverdlov, who was to become first president of Soviet Russia.

The czar's regime, wasted by war, called exiles back from Siberia for war service, but Stalin escaped the draft because of a childhood infirmity in his left arm, which was somewhat withered. He was on hand, however, when the

February revolution freed the exiles, and was ready to move in when the Bolsheviks saw an opportunity to seize the revolution in October.

Stalin had charge of the Bolshevik faction of the Social Democrats.
