Greek Quake Toll 150
 ATHENS, Greece (AP)—The Greek government rushed aid today to a group of Ionian Sea islands, devastated by a series of earthquakes. The official death toll stood at 150 but survivors predicted it would top 400.

The Navy Ministry announced that the landing ship Alifeios reached the ravaged island of Kefallinia last night with medical personnel and emergency supplies. It also carried Minister of Welfare Constantine Adamopoulos to take personal charge of relief work.

Prime Minister Alexander Papagos promised all possible government aid would be sped to homeless survivors.

Kefallinia and its neighboring islands of the west-central Greek coast have been rocked by a wave of recurring quakes since Monday. The fourth tremor in three days shook the area last night.

Scattered and fragmentary reports told of whole towns being destroyed, of survivors living in the open and short of food.

The governor's office of Kefallinia appealed for helicopters to fly doctors, nurses and medical supplies to the stricken islands. It described the situation as "hopeless."

Reports said fears of new quakes kept unhurt inhabitants from searching the wreckage of their towns and villages for dead and injured.

Reds Complain Of Restrictions
 SAN FRANCISCO (AP)—Peiping radio charged today "unreasonable restrictions" were imposed on Chinese and North Korean Red Cross workers visiting Communist prisoners in South Korea.

The propaganda broadcast, heard here by The Associated Press, quoted repatriated Chinese prisoners as saying Allied authorities limited visiting time or would only permit the Red Cross workers to address the prisoners over loudspeakers.

"In striking contrast," Peiping added, "full convenience of movement is provided for the joint Red Cross teams visiting the area under control of this side."

There have been no reports from any source in South Korea of any limitations being placed on the Communist Red Cross workers.

100 More US Gls Freed By Commies

PANMUNJOM (AP)—One hundred hale and happy Americans streamed through the Bamboo Curtain at Panmunjom today to start the second dramatic week of Korean War prisoner exchange.

But their South Korean comrades again came home in wretched shape. Pitiful living skeletons were passed tenderly from Communist ambulances to litters carried by Allied soldiers.

Four hundred in all got their freedom during the day: 100 Americans, 25 British, 25 Turks, 250 South Koreans.

The Communists promised to hand over 75 Americans, 75 British and 250 South Koreans—all able-bodied—at Thursday's swap, the ninth since the exchange started. This will boost the number of Americans liberated to 823 of 3,313 the Reds said they held.

The Reds were 2 hours and 25 minutes late in making the last delivery Wednesday of 25 Americans and 25 British. It was the first flaw in an otherwise smooth operation.

The Communists said the reason for the delay was that they had been unable to get men from Camp 1 at Changchun to the Kaesong collecting center just north of Panmunjom in time to meet the delivery schedule.

U. N. officials said 222 Chinese Communist prisoners, the last of 5,495 to be repatriated will be delivered to the Reds Thursday, together with 1,800 healthy North Koreans, 360 sick or wounded North Koreans.

A surly batch of 2,758 Chinese and North Koreans, including 1,200 North Korean civilians, was turned over to the Reds Wednesday.

Canadian Liberals Win Again
 TORONTO (AP)—Canadian still swear by Prime Minister Louis St. Laurent and will have none—or very little—of his detractors. They made that clear in the national elections with a big tide of votes rolling the Liberal party to an unprecedented fifth term.

The vote Monday returned the Liberals to power with a House of Commons majority just short of the record margin they ran up in the landslide St. Laurent engineered in 1949.

There were 285 Commons seats at stake. The Liberals needed 133 to maintain a majority able to back a government. They won 171.

The Progressive Conservative (Tory) party won 80. The socialist CCF (Commonwealth Cooperative Federation) was in third place with 23 and the Social Crediters next with 15. The remaining 6 were scattered.

In 1949 the Liberals won 193 seats for the greatest majority in history. The Conservatives won 41, the CCF 13 and the Social Crediters 10.

St. Laurent hailed the result as showing Canada had the kind of government it wants. He called the returns "a heartening expression of confidence."

The 71-year-old "Uncle Louis" conducted his own kind of campaign. "I'm running on performance, not promises," he said.

That was good enough to make history again. Never before had a party won five consecutive times in Canadian elections.

The Liberals have been in power since 1935, first under W. L. Mackenzie King and since 1948 under St. Laurent. With the four to five years added by yesterday's election, they will run their tenure to 22 years.

The Conservatives now have failed to win a Canadian election since 1930. They tried yesterday under the same leader, who lost in 1949—George Drew, former premier of Ontario. His hopes of being prime minister were as good as lost in mid-campaign. Some Conservative candidates, as if to pull away from Drew ties, never mentioned him in their speeches.

Truck, Plane Hit; Truck Best Built
 MEXICO CITY (AP)—A truck and an airplane collided at Mexico City's airfield. The truck won.

The truck crashed into a Douglas DC2 yesterday as the plane was taking off and tipped off a wing. No one was injured, but the truck driver was arrested.

His explanation: Someone started the motor of his truck, which was parked on an airport runway. Being in gear, the truck lunged forward into the path of the cargo plane.

Less Dipping Into Notes For Army Electronic Brain

ABERDEEN, Md. (AP)—The Army has patched a bigger and better memory into Eniac, its electronic brain.

Now Eniac can remember six times as much and make more decisions for itself, without referring to notes. (Eniac stands for electronic numerical interegrator and computer.)

The army uses Eniac, a roomful of vacuum tubes and electrical relays, to work astronomical figure problems.

For example: Where do you aim an anti-aircraft gun so its shell will hit a plane which is flying so many degrees southwest, so many thousand feet away, so many thousand feet high at so many miles an hour?

Gunners use firing tables which Eniac helps figure out.

The figure wizards in the Army's ballistics research laboratory at Aberdeen Proving Ground, directed by Col. Alden B. Taber, have been using Eniac since 1947.

"The brain" did most of the work figuring out the trajectory of shells fired from the new 280mm atomic cannon.

When Eniac runs out of memory room, it puts out partial solutions on punched cards. When it needs the information again, the operators feed it back with the punched cards.

Before getting its new eight-foot "memory box," Eniac could remember 20 figures, as large as 9,999,999,999. Now it can remember up to 120 big numbers. The Army explains its complicated way of doing things as the first "static magnetic memory" ever used with an electronic calculator.

The Burroughs Adding Machine Co. built it, using 4,100 tiny magnets whose waves of attraction can be reversed electrically.

Like platoons of soldiers in close order drill, they mark time or do an about face. They can do it individually or by squads, platoons or companies.

The way they face determines

CAMERA CHATTER

"Making Movies" By DAL SWOGER

If you're a beginner — just starting to make your own home movies or planning to start soon, you have a lot of pleasant surprises coming. First of all, it's not as expensive or as difficult to make movies as most people would have you believe. With very simple equipment, a little patience, and your imagination clicking along, you can start right now to take professional-looking movies!

There are only four simple but essential rules to follow:

1. Select an interesting subject for your movies.
2. Be certain your subject is well-lighted at all times.
3. Set your lens for the condition of the light. (Sunny, cloudy.)
4. Start taking pictures — remembering to hold the camera STEADY! at all times.

The only rule here that requires any explanation is the third one. Even that is quite simple. Keystone, Revere, Bell and Howell, Eastman and DeJur all have inexpensive movie cameras on the market featuring new universal focus lenses. When you use such a camera, simply judge the amount of light on your subject, decide whether it is bright, cloudy or dull, and set the lens at the number indicated on the guide which is built right on the camera so it can't be lost, strayed or stolen!

Besides being so easy to use, these new cameras are so low-priced that home movies have become a practical hobby for almost every family. You can buy the Revere, "50" for only \$49.50. The Eastman "Brownie" movie camera is the least expensive at \$39.75. The Key-

stone "29" sells for only \$49.95 and has an interchangeable lens mount. But regardless of what you pay you want to take good pictures and the new movie cameras are designed to help you take better movies.

A movie camera is a wonderful thing, something that the whole family can enjoy—not only today, but all through the year, and there is no greater thrill for you than that which comes when family and friends urge you to show those swell movies made by none other than yourself.

I'll try to pass on a few helpful hints on making movies in this column next week and also on snapshots in black and white and color; but for now, remember — this column is written to help YOU! If you have a special photographic problem, please drop in and see me, and I'll help you with it. If you have a question you would like to write in—drop me a line—Standard Optical, 715 Main, Klamath Falls, and we'll discuss it in this column. For those with movies and slides we have a projection room for your convenience and use. We are happy to have you use it.

For anything photographic, drop in and see your cameraman, Dal Swogger. Bye now!
