

COPCO GRANTED BIG BEND OKAY

In The Day's News

By FRANK JENKINS

President Eisenhower, addressing the sixth national assembly of the United Church Women of the National Council of Churches of Christ at Atlantic City.

"Peace will not be won by dark threats or glittering slogans. . . . It can come only slowly and tortuously and ONLY if the Western powers build, maintain and pay for the military might that will secure them from an H-bomb attack."

That is to say:
This weird, grisly thing that we call communism, which heads in the Kremlin in Moscow, fears and respects ONLY SUPERIOR FORCE.

If we are to come to a peaceful understanding with communism, we must first convince its rulers that if they persist in their determination to conquer the free world we have the power AND WILL USE IT to destroy them.

Our President added:
"It is essential that all the world should comprehend the paramount alternatives of our day." These alternatives, he said, are:

1. A wasteful and devastating contest in the production of weapons of inconceivable power.

2. A world ever advancing in peace and prosperity through the co-operative efforts of its nations and peoples.

If the choice were OURS, it would be easy. We would unhesitatingly choose a world ever advancing in peace and prosperity through the co-operative efforts of its nations and peoples.

But the choice isn't ours. The choice is MOSCOW'S.

If the heads of communism, who rendezvous in the Kremlin in Moscow, even THINK they can conquer the free world, they will know by this time that they have the technical ability to build atomic weapons. Unless we can convince them that we can and WILL destroy them if we have to, they will eventually make the attempt.

It's a grim situation. But that is about the long and the short of it.

Another question:
CAN we become so strong that we can destroy Russia (which is the spider at the center of the communist web) if we HAVE TO?
We can if we bring ourselves to the state of mind that was Patrick Henry's when he said: "As for me, . . . Give me LIBERTY or give me DEATH."

Remember, please, that Patrick Henry didn't have to die violently on the field of battle in a hopeless attempt to preserve his country's liberty. He saw his country's liberty WON and died peacefully in his bed in a FREE country in 1799.

Near Ceilings, No Turret For City Hall

City Council Monday night okayed a proposal to lower the ceilings in the City Hall—and while they are at it they will remove the turret.

"Removing the turret will modernize the building and make it safer," Mayor Paul Landry said. According to one source, the heavy construction in the turret is partly responsible for leaks in the roof. Removal of it will allow more permanent ceilings repairs.

The Council also awarded contracts for roof repairs at the airport. C. Fitzgerald will do the complete repair job on the steel hangar. His low bid was \$3,116. All Type Roofing Co. was awarded the contract for temporary patching on other airport buildings at a bid of \$359.48.

NELDA HALE, 17-year-old senior at Bonanza High School, has been selected by the student body of her school to be candidate representing Bonanza for queen of the 17th annual Klamath Basin Potato Festival. She is the daughter of Mr. and Mrs. Vivian L. Hale of Bonanza.

Lizards' 12-Hour Chance To Flee Violated By Trio

DONALDSONVILLE, La. (AP)—Lizards are fine insect killers so three men collected 600 of them to sell to florists.

But today they are charged with "taking and possessing lizards between 9 p.m. and 6 a.m." Nighttime possession of lizards is illegal according to an old Louisiana law, Deputy Sheriff J. Arthur Sheets explained. Daytime possession is all right.

He didn't explain how you can possess lizards only half a day and expect to keep them.

Vodka Supplier Fined \$150

Douglas Meyers, 21-year-old construction worker who pleaded guilty to providing three pints of vodka for a teenage drinking party, was fined \$150 Tuesday in District Court.

Judge D. E. Van Vactor gave the youth a stern reprimand. The judge declared that by providing liquor for an all-night party staged by a group of high school students, Meyers set off a chain of events which brought "heartbreak and sorrow to several Klamath Falls homes."

The judge cited the statute to Meyers under which he could have been given a much more severe penalty. The judge said he was taking into consideration the defendant's age. He just turned 21.

In the meantime, after a conference with Circuit Judge David R. Vandenberg, juvenile officers were continuing their investigation of teenage drinking parties.

Juvenile Officer Francis Mathews said at the conclusion of the probe he expects to file morals charges against at least two high school students.

Stray Horse Transferred To Back Yard

It might be aptly said "it was a horse on Charlie DeLap."

Anyway, the genial county assessor had a stray horse on his hands Tuesday.

DeLap says the animal is a "real hay burner." He's feeding it. The horse tore up the newly-planted lawn in front of DeLap's residence at 1950 Crest St.

Without benefit of Jariat, DeLap got the horse in tow and penned it up in the back yard.

"I'll feed him until he's claimed by the rightful owner," DeLap said. "I hope that's soon."

Quadruplets' Pa To Add A Tent

SYDNEY, Australia (AP)—Mrs. Ethel Hudson, a 38-year-old grandmother, gave birth to quadruplets today. The latest arrivals—a boy and three girls—gave her a round dozen children.

Authorities at the Gligandra Hospital, 328 miles northwest of Sydney, said the births were normal and mother and babies were doing well. Arriving over a 3½-hour period, the babies weighed between 2 pounds 13 ounces (the boy) and 3 pounds 13.

Mrs. Hudson had expected twins. The family has been living in tents two miles out of Gligandra.

"I suppose I'll have to buy another tent," said the father, E. R. Hudson, a 40-year-old fencing contractor.

Cartridge-Driven Nail Kills Worker

TEMPLE CITY, Calif. (AP)—An automatic nailer, powered by black cartridges, is blamed by sheriff's deputies for the death of one workman and serious injury of another in a freak accident.

Carl Mitchell, 45, an engraver, was killed, and Harry Fisher, 43, also an engraver, was injured at the Miller Dial and Name Plate Co. plant yesterday.

In an adjoining room carpenter Robert Becker was installing plasterboard. Deputies said nails which missed the studding struck Mitchell in the heart and Fisher in the chest.

Night Watchman Explains Success

BOSTON (AP)—A school custodian suggests he may have the answer to the city's problem of night time vandalism at schools.

Armand Couston said last night he has kept four dogs with him during the seven years he's been night watchman at the Hugh O'Brien School.

Hunter Fires Dot County

Hunters' warning fires this morning were responsible for three fires, according to Hal Ogle, KFPFA superintendent. The three, all under control, were above the Keno power plant, another at the Bly Mountain summit area and a third on Antelope Mountain near Bear Flat. The latter fire spread over about an acre and was the largest of the three.

A strong warning has been issued by Ogle to hunters concerning the warning fires. It is going as the woods are still exceptionally dry.

Some 12 fires have been reported on the Fremont since Saturday, all man caused, the two most serious being on Gearhart Mountain and another on Guyere Creek in the Silver Lake district covering two acres.

Men from the Spangler Lumber Co., in Bly, have turned out to combat the blazes in their area. All fires in the Fremont were reported under control this morning but still being watched.

Cigar Industry Doing Better

TAMPA, Fla. (AP)—The Tampa cigar industry produced \$9,154,842 cigars in September for one of its best months in many years. That was 3,330,000 more than in September 1952.

Boy, 11, Gets Buck

In all probability the youngest successful buck hunter in this part of Oregon is 11-year-old Jack Sutton, Medford, who with an honest assist by Louis Schweiger, 4677 Peck Drive, and his father-in-law J. M. Pinney, 2226 Oregon Avenue, proudly placed his tag on a forked horn deer and left here Sunday with his father for their home at 126 Vashit Way in Medford.

Jack and his father set up camp near Holcomb Spring on Hogback mountain near OTI Saturday, and after hunting for some time together, returned to their car. While his father drove back to camp Jack took the deer gun and returned through the brush alone. Shortly the elder Sutton heard a shot and investigation disclosed Jack had shot a deer.

Following a trail of blood until dusk, the two gave up, returned to camp and attended the OTI-Ramblers football game that evening.

Early Sunday morning Schweiger, a car salesman for Bob Meist, and Pinney stopped at the Sutton camp and asked if there were any bucks in that area. Informed by Sutton that his son had wounded one the night before the Klamath hunters drove on.

About a mile farther on they discovered a deer buck beside the road and as it was still warm they loaded it in their car and returned to the Sutton camp.

Awakening the Sutton lad Schweiger asked if he would like to have the buck he had hit the night before. The boy bounced out of bed exclaiming, "Oh boy would I!"

Before seeing the deer the lad was asked where he had hit it and after informing the Klamath men he had shot at the heart, there was no question as to its rightful owner. The bullet had missed the heart only by inches.

Unmindful of the chill in the air and forgetting he hadn't dressed, the lad helped make preparations for taking care of the meat from his first buck.

One Leg No Handicap

By PATI O'CONNOR
Mrs. Betty Stride, amputee, is a challenge to other handicapped persons and a warning to hunters. In spite of an artificial right leg, she is a homemaker, mother of two children and potential roofing expert.

Just two days before "Employ the Handicapped Week" began, Betty Stride mounted a ladder to help her husband shingle the roof of their home, and to prove that a "handicap" need not be a handicap.

Eleven years ago this November Betty lost her right leg when a 12-gauge shotgun, left loaded after hunting, went off.

"I was just out of high school when the accident happened, but the State of California sponsored my vocational rehabilitation program, and after finishing business school, I was able to do the same work as others," Betty said.

The youthful amputee endorsed wholeheartedly the program for handicapped persons.

"It gives them a place to live and enables them to do something on their own without being dependent on others for support."

Betty herself says she has never considered her loss a handicap so she never let it get her down. She dances, rides horseback swims and even went bike riding once. Next spring she has a vegetable garden planned.

Daily duties include routine housework and meals for her two children, Lyndell, 2½, and John, 9½ months; her husband, Pete, who besides working full time as a city fireman holds down a temporary job and works on his home; and Bootsy, the family pup.

Monkeys, Man Unsafe During Squirrel Season

COLUMBUS, Ohio (AP)—There have been some pretty funny things in Ohio since the squirrel hunting season opened Sept. 14.

For example, there was the Ravenna man whose pet monkey escaped the day before the season opened. He received a call the day after he advertised for his pet in a local newspaper.

"Sorry, buddy," said the voice at the other end of the line. "I thought that was a funny-looking squirrel I shot."

Then there was the brawny hunter who was treated at a Youngstown hospital for squirrel bite.

But Don Mack, Ohio State Journal outdoors editor, thinks the best of all was the hunter who mistook his pal for a squirrel and let loose both barrels.

His friend, wounded but not too badly, fired back. Both ended up in the hospital.

Well-Guarded Election Passes Without Voters

FAYETTE, Maine (AP)—The town clerk, four ballot clerks, a constable, an election officer and a janitor stood by—at \$8 each—at the polls yesterday.

But none of the town's 150 voters showed up to cast ballots in a special State Senate election.

"Guess folks just weren't very interested in the election," remarked one of the clerks.

The Day in Brief

Pres. Eisenhower called on Americans today to strive faithfully for a firm and just and durable peace—lest the world fall into what he called the other alternative—terror and death through H-bomb warfare. Eisenhower emphasized that free world security can be achieved only at great expense, sacrifice and close cooperation among the Western powers.

Secretary of State Dulles has told a news conference in Washington that the U.S. is considering the possibility of assuring Russia against a revival of German aggression. He said the matter is being discussed with Britain, France and West Germany.

Approximate New York noon stock sales were \$50,000 shares. The Associated Press 60-stock average at noon was 102.6, off 7-tenths.

The Robert Greenleaf family in Kansas City announced today there has been absolutely no contact with the kidnappers of 8-year-old Bobby Greenleaf.

Six more leaders of the Communist party have been arrested by FBI agents and charged with conspiracy against the government. Attorney General Brownell says the Reds were seized in Cleveland, Lorain and Steubenville, Ohio, and in Newark, N.J. A detainer has been placed against a seventh Red now in Ohio State Penitentiary. All are said to hold—or to have held—top Communist party jobs in the Midwest.

A partial back-to-work move has followed the government's securing of a temporary injunction halting the East Coast Longshoremen's strike. Some of those returning to work in New York were members of the International Longshoremen's Union ousted by the AFL and some were members of the new rival union backed by the AFL.

The White House has announced the nomination of its final appointee to the seven-man Federal Communications Commission. He is Robert E. Lee—a Republican—an employee of the House appropriations committee.

India's senior officer in Korea has declared at Panmunjom that Indian troops would not attempt to prevent a mass breakout of anti-Communist war prisoners.

In Seoul, meanwhile, thousands of South Koreans are demonstrating against Indians guarding Red soldiers who have refused to return to Communism. South Korean leaders have renewed threats to drive out the Indians who, they claim, are pro-Communist. Indian General Thimayya says he isn't concerned because the Indians have huge UN command and Communist forces at their disposal.

In Beirut, Lebanon, a man took personal revenge last night against the city's French-owned electric company. He just plunked himself down in the middle of a street car track and puffed calmly away on a cigar while traffic piled up behind him. Hundreds gathered to cheer before the police removed him. Seems the man was angered by frequent electric power cuts by the French firm, which also owns the streetcars.

Two stokers were jailed and dismissed from Britain's navy today on charges of committing damage aboard the new aircraft carrier Eagle. The two sailors—one 18 and the other 20—told a courtmartial they felt they were getting even with the navy for stopping their leaves. Among the damage, the sailors threw overboard the carrier's entire stock of rum.

BRITISH DOCKERS STRIKE
GLASGOW, Scotland (AP)—Britain had her own dock strike troubles Tuesday. More than 8,000 longshoremen were out and 67 ships were idle.

Work Plans Hinged On 1967 Pact

WASHINGTON (AP)—A power project on the Klamath River in Oregon won approval of a Federal Power Commission examiner here Monday and if it is not challenged within 30 days it will become final.

The ruling, by William J. Costello, said that California-Oregon Power Company should receive a 50-year license for a hydro-power project.

The approval is subject to one condition: an agreement for continued use, after 1967, of water stored upstream by a federal reclamation dam.

The license was opposed by the Interior Department because it first wanted long-range requirements of the Klamath Reclamation Project to be determined.

Some Tule Lake area farmers also opposed it. They said further reclamation work would be cut off by the power development.

Costello's ruling was that the company showed the proposal was feasible from an engineering standpoint, and the company could finance it.

\$8 MILLION JOB
The plan is to spend about \$8 million dollars on Big Bend No. 3 project, which would be virtually a stream-flow plant. It thus would be dependent on release of water from the government's Link River dam at the outlet of Upper Klamath Lake.

Costello pointed out that "the only real objection . . . arose from the problem of an ample supply of water with which to operate the project throughout a 50-year license period."

He said that if the company accepts the license to build the plant it must also agree to use water substantially the same manner and conditions as the company now uses for other power projects on the Klamath.

LONG DAM
The Big Bend No. 3 project calls for a dam 63 feet high and 316 feet long which would divert water through a tunnel to a power house. There, two 27,000 horsepower wheels would turn two 28,000 kilowatt generators.

Costello's decision gives the company a year to complete negotiations with the Interior Department for continuing use of water.

John Boyle, Copco general manager, was on a business tour of Tokyo today and unavailable for comment. However, Marian Bowditch, vice president, said: "We are happy over the news, but as yet the order has not been received by Copco." Further developments will be reported as they develop.

Rancher Nicked; Man Held For 22 Pheasant Shoot

Paul Pacheco, 21, 7700 Jefferson, Paramount, Calif., was arrested Monday by Oregon State Police for shooting pheasants from his car with a .22 calibre rifle.

Copies of a warrant from the gun penetrated the wall of police warehouse owned by Cecil Cheyne, prominent basin rancher, and the spent missile hit Cheyne in the leg near the knee hard enough to cause a stinging sensation.

Pacheco was released on \$30 bail.

Car-Sleeper Taken For Ride, Robbed

DENVER (AP)—J. A. Baker, San Diego Navy man, told police he awoke from a nap in his car yesterday to find two strangers driving him up the street. When they left, they took his billfold and \$8.

FLYING SAUCER RESEARCHERS

Managing Editor
Klamath Falls News
Klamath Falls
Oregon

Dear Sir:

We need further information on 5 nights of reports of Flying Saucers over Chiloquin and Klamath Falls this month. We would like to receive observations of witnesses, in particular, their drawing of the objects, or series of drawings, as it performed.

All information received will be used to study the reports in our magazine, Flying Saucer Review, and names of observers will be kept confidential on request.

We also welcome any other newspaper and eyewitness reports made before or after these 5, and latest reports will receive study in the review. Thanking you for your prompt attention in reprinting this request for information, we remain,

Sincerely,
C. Robinson, Jr.
Flying Saucer Researchers

ER:tr

Latest reports listed and analyzed in "Flying Saucer Review," printed since Aug. 51

FOR THE BENEFIT OF BELIEVERS in the flying saucers, we reproduce herewith a letter from the Flying Saucer Researchers of Brooklyn. The letter was not carried by saucer, obviously, as it took some six days to reach us from the New York site.
