Increase Indicated In Spring Pig Crop

Farmer's reports on breeding intentions indicate 7,795,000 sows to farrow in the spring of 1954 (Dec. 1, 1953 to June 1, 1954). This would be an increase of 6 per cent from last spring, but 15 per cent below the 10 year average. Compared with last year, all regions except North Atlantic show increases.
