## Berlin Meet Site Wavers

**PARIS**—Gen. Alfred M. Gruenther, supreme Allied commander in Europe, said Thursday the West has the capability "to do a great deal of damage to Soviet industrial potential and the Russians are unable to meet this development at this time."

The Allied commander, reviewing the accomplishments of the North Atlantic Treaty Organization in Paris, said the development of NATO's strategic air power was "one of the consoling features" in the overall situation.

He told an American Club luncheon "we still do not have enough forces in any area, particularly the

central area, to meet an all-out Soviet offensive. But neither do the Soviets have the capability to defend themselves against an attack on their industrial potential."

# The '54 BUICK's got it—

## The BIG CHANGE you've been hoping for!

# BUICK

## the beautiful buy

THE instant you see these 1954 Buicks, you'll know that something sensational has happened in automobile styling.

Here is vastly more than the usual model changeover. Here is vastly more than could be done just by warming over what Buick had before. Here is something accomplished by going far beyond artful face-lifting.

Here is that rarity of rarities—a completely new line of automobiles.

But Buick didn't stop with the bolder, fresher, swifter-lined beauty you see in raised and lengthened fender sweep—in the huge and back-swept expanse of windshield—in the lowered roofline—in the most more glamor features of exterior modernity.

They upped all horsepower to the highest in Buick history.

They engineered a new V8 for the SPECIAL—and in the process came up with new Power-Head Pistons that boost gasoline mileage in every engine.

They brought to market a sparkling newcomer with a famous name, the Buick CENTURY—a car with phenomenal horsepower for its weight and price—a car with more pure thrill per dollar than any Buick ever built.

And they did all this without change of the price structure which, for years, has made Buick the most popular car at its price in the world.

We invite you to come in and inspect these great beauties, these great performers, these great buys. Then you'll see why the Detroit previewers are already saying, "Buick's the beautiful buy!"

When better automobiles are built Buick will build them
