Quality of potatoes in local store is good ..... poor  
I believe our better grade potatoes are being shipped leaving only poorer grade potatoes for local consumption

### Today's Women

**BY DOROTHY ROE**  
AP Women's Editor

If anyone has any lingering doubts about the economic, industrial and general importance of women, he should have a few words with Harley J. Earl, vice president of General Motors.

If it weren't for women, he says, everybody might still be driving plain black cars, with high seats, small windshields and maybe even gears that have to be shifted by hand.

It's the little woman who has revolutionized automobile design, says Earl, who is in charge of styling. Women influence 5 per cent of all car purchases, and when women go shopping for automobiles they know what they want.

"Right after World War II we started to receive a lot more letters than ever before," says Earl. "Today about 65 per cent of the letters are from women. They're very definite in their suggestions and criticisms."

"Designers used to try to interpret the feminine taste as they felt it should be. But today a woman can almost write her own ticket. Automobile designers are pampering the women, and that's to the advantage of the men too. Men hesitate at evolution in design—in their homes, cars or anything else. If you change anything they're accustomed to, they squawk. But in the end they usually decide that 'modern knows best.'"

"Today's rainbow-hued cars, with fingertip steering control, comfortable seats, smooth surfaces, foam rubber upholstery, automatic shift, power brakes and air conditioning, are largely the result of suggestions and complaints."

When women wrote in that they snagged their nylons and scraped their shins getting in and out of cars, front seats were redesigned. Studies made with hidden cameras of women stepping in and out of cars, showed seats were so high and threshold plates so wide that the girls were constantly striking the backs of their legs against the seat edge. This was eliminated by dropping the seats 2½ inches, moving the cushions nearer the door. The carpet also was wider.

New tinted glass windshields, low the feminine taste for smoked or colored glasses, plus new decorator upholstery fabrics are a result of women's efforts to pretty things. And what trend in automobiles to which lists call "the more passionate cars?"

Just to be sure they kept with the feminine taste from General Motors now has a committee of five women who do it from the smooth. The smoking areas look not ironed.

**SMOKING**  
Dresses or blouses with a ring can be "hand pressed" smoothing out the puffiness of the smoking stitches with fingers after the garment is washed and rinsed. Then all you do is iron the smooth. The smoking areas look not ironed.

**SFCY ICE CREAM**  
Combined ½ pint chocolate cream, 1 pint vanilla ice cream and 1 teaspoon cinnamon chilled bowl, working quickly with a wooden spoon and tagy beater until blended. Layer with graham cracker mixed with melted butter and spiced ice cream. Freeze firm. Garnish with shaved late and serve in pie shape.
