The State Advisory Committee for Oregon Tech is composed of representatives of business, industry, agriculture, general public and the home. This committee is established by law and each member is appointed by the State Board of Education. Appointments are made by the State Board from nominations made by state organizations. Members of the committee who attended the

recent meeting at Oregon Tech represent these state organizations and widely spaced geographical areas of the state.

The duties of the State Advisory Committee are those of recommending general policy actions to the State Board of Education. By spending an evening and the next day on the campus, members of the Advisory Committee

develop an acquaintance with staff members and operating policies that is very helpful to the State Board of Education which meets only in Salem. The recommendations of the State Advisory Committee are viewed with confidence by members of the State Board of Education during its regular meetings when the OTI agenda is under consideration.
