## HOW TO WHITEN DINGY, YELLOWING NYLONS

Did you know that you can use PUREX Liquid Laundry Bleach on nylons (or orlons and dacrons) just as safely as on cottons and linens? It's true! These new "miracle fibers" can be bleached with complete safety with PUREX, using the same amount as for cottons. Just be sure your fabric is not a mixture with silk, wool, or rayon, which should not be bleached with PUREX.

No matter how thoroughly you wash with detergent or soap alone, you can't keep nylon things white and crisp without bleaching. But safe and gentle PUREX will get them white again...and keep them sparkling fresh...as well as antiseptically clean.

Blouses, uniforms and dainty nylon underthings will look their very best when they're bleached regularly with PUREX Liquid Laundry Bleach. And because PUREX is made by the exclusive Intrafil® Process... you can always be sure of its purity and safety. Use it with confidence...you'll be delighted with the results!
