

Church Plans Broadcasts

Saturday evening, April 24, at 6:45 p.m. the Klamath County Ministerial Association radio committee begins a new series of broadcasts. The theme is "The Favorite Hymns of the Church."

Since an article appeared recently in Collier's on the ten most popular Christian hymns, much interest has been aroused all over the country, and in view of this, the committee selected its theme.

The program will include interesting historical facts concerning

the composers as well as human interest stories of the inspiration these Gospel songs have been to different people. The hymns will be sung in various vocal combinations. Talent from different churches and records of favorite Gospel singers will be used.

The new series of broadcasts is being arranged by the Rev. Wayne Proett, pastor of Peace Memorial Presbyterian Church, and the Rev. Joel Nordlund, pastor of the First Covenant Church.

The committee has expressed its appreciation to those who have willingly donated time and talent in the six months it has experimented with different types of programs in the hope that listeners would receive some blessing from the Saturday night broadcasts.

The radio committee includes the Rev. Richard Graef, Zion Lutheran Church; the Rev. George Alder, First Christian Church; the Rev. Joel Nordlund, chairman, First Covenant Church.

Legal Notice

Sale of timber, Klamath Indian Reservation. Sealed bids in duplicate on forms provided therefor, marked outside, "Bid, Crooked Creek Rim Unit", addressed to the Superintendent, Klamath Indian Agency, Klamath Agency, Oregon, will be received until 2:00 p.m., Pacific Standard Time, May 6, 1954, for the purchase of timber on five tracts allotments comprising approximately 60 acres of timber land and on tribal timber lands comprising approximately 100 acres. Separate approved contracts must be made for timber to be cut on those allotments and on the tribally-owned land for which the authority to sell the timber has been obtained from the owners. The unit contains an estimated stand to be cut, which estimate is not guaranteed, of approximately 440,000 feet B.M. of ponderosa pine, 15,000 feet B.M. of sugar pine, 83,000 feet B.M. of Douglas fir, and 7,000 feet B.M. of white fir. Each bidder must state the price per thousand feet B.M. Scribner Decimal C Log scale that will be paid for timber to be cut and scaled from the unit as a whole. No bid will be considered for less than \$19.90 per thousand feet B.M. for ponderosa pine, \$19.80 per thousand feet B.M. for sugar pine, \$19.00 per thousand feet B.M. for Douglas fir, and \$5.00 per thousand feet B.M. for white fir. A certified check in the amount of 20 per cent of the total bid price on a solvent bank, payable to the Treasurer of the United States must accompany each bid. The deposits will be returned to the unsuccessful bidder. The deposit of the successful bidder will be held in lieu of bond on proportion to the value of timber on each allotment and the tribal land pending satisfactory completion of the terms of each of the contracts, or retained as liquidated damages if the bidder shall not execute all contracts within 30 days from acceptance of his bid. The right to waive technical defects and to reject any and all bids is reserved. The contracts will specify that all designated timber shall be cut and removed from the unit on or before December 31, 1954, and that all other requirements of the contract, including slash disposal, will be completed by the same date. An additional deposit, in the amount of 20 per cent of the estimated value at the bid price will be required on each individual contract before cutting begins and in any case not later than thirty days from the date of approval of the respective individual contracts. The contractor will be required to deck logs in advance of scaling or to conduct logging operations in such other manner that will permit the scaling of timber in as few scaling assignments as possible. Before bids are submitted, full information concerning the timber, the conditions of sale, and the submission of bids, should be obtained from the Superintendent, Klamath Indian Agency, Klamath Agency, Oregon, or the Area Director, Indian Service, Building 1, Swan Island, Portland, 18, Oregon. Dated this 18th day of April, 1954, at Portland, Oregon, Don C. Foster, Area Director, April 21, 28 No. 908.

Most Lakes Open Late

Although a few lakes in the Cascade mountains will open to angling on May 1 along with most of the streams, the majority of the lakes will not open until May 29. In the Deschutes national forest for example, Suttle, Blue, Crescent, and Odell lakes, and Wickup and Rock Creek reservoirs are the only bodies of water that will open on May 1. Suttle, Blue, and Odell lakes contain kokanee which provide early season fishing. The other waters mentioned are usually accessible at that early date.

Included among the larger lakes that will not open until May 29 are Paulina, East, Elk, and Crane Prairie reservoir. It is unusual that many lakes are accessible by road prior to that time, and a good many are snowed in until well into June and even early July.

Chemult Civic Club Holds Sale

CHEMULT—The Chemult Civic Improvement Club held a bake sale Friday, April 16, in the lobby of the Chemult Hotel. Hot cross buns, home baked cakes, cookies, pies and many other delicacies were on sale. The profits are to be used for the purchase of new chairs for the clubhouse.

Following the sale members sewed. Refreshments were served by Mrs. R. E. Jessup, Mrs. Ace Kenoyer, Mrs. Cap Jessup and Mrs. C. C. Long were in charge of the sale.

Naomi Shrine Plans Rummage

Vera Fritsch, chairman of the Naomi Shrine No. 5, White Star of Jerusalem rummage sale, announced that the date is set for April 23-24 in the Masonic Temple on Klamath Avenue.

The rummage sale is given annually to raise money for the shrine's various philanthropic projects.

Articles for sale may be taken to the temple or for pick-up call 6916 during the day, or 5648 after 6 p.m.

Feel Like This After Eating?

(Gas, Heartburn, Acid Stomach?)

TUMS Neutralize Excess Acid Fast
If you suffer from after eating distress, try this top-speed way to relieve gassy, fullness and acid indigestion. Just eat 1 or 2 Tums after meals—or whenever over-indigestion makes you feel upset. Tums neutralize excess stomach-acid fast. Can't over-alkalize. Always carry Tums in pocket or purse. Guaranteed to contain no soda. Get a roll today! 50¢ only 10¢ a roll.

HOW TO KEEP COLORED COTTONS BRIGHT AND FRESH

Fast-colored clothes can be bleached with PUREX just as safely as white clothes—with wonderful results!

Are you one of those housewives who have learned to bleach white clothes with PUREX, but have not yet learned that PUREX is splendid for colored cottons too?

PUREX has a special value for colored fabrics. By removing soil and grays, PUREX works to restore the colors to their original freshness and liveliness.

Just add one cup of PUREX to the suds in your washing machine (16 gal.). If you've used the same suds for whites, you may find it necessary to add an extra 1/4 cup of PUREX, since the solution will have been weakened by the first load.

PUREX LIQUID LAUNDRY BLEACH

4-H News

POE VALLEY SEWETTES

A meeting of the club was held at the Community Hall April 12. We have finished our record books and then had our business meeting and sang a song. The fair is going to be April 22, 23, and 24. We talked about the things we are going to do at the fair.

CHERYL WEST

SUGAR AND SPICE CLUB

The meeting was held at Mrs. Kenyon's home. The president, Ellen Rajnis, called the meeting to order. We said the 4-H pledge. April Gilbert, secretary, read the minutes of the last meeting. Then we went into the kitchen and made two sponge cakes. While they were cooking the song leader, Marcia Kenyon, played the piano and we sang songs.

Judy Cunningham

KLAMATH RIVER

(Continued from page 11)

low the lake outlet. With full development of the arable lands above the lake, mostly in the Klamath Indian Reservation, some storage on the upper Williamson and Sprague Rivers may be necessary.

The present issue on a new contract with Copco for storage in Upper Klamath Lake boils down to just this. Do the people of the Klamath Basin want a Bureau of Reclamation project for Butte Valley for irrigation and power development in California or do they want the development of the Big Bend project by Copco? They can not have both. It is possible that they could not have the Butte Valley project before the present contract with Copco expires in 1967, 13 more years, because regulation of the storage in the lake to fit the requirements of Butte Valley might infringe upon the rights of Copco, under the contract, to regulate the flows to fit the requirements of its existing plants.

It is important to consider that if Copco is permitted to construct its Big Bend Project, it does not necessarily follow that the water will be earmarked for power development for all time. The license will run for fifty years and the new agreement with the Interior Department, if made, will likely run the same time. Copco's financing should be such that its investment on the new work will be paid back in that fifty years.

Good News For Septic Tank Owners

The trend to suburban, ranch homes, and year round beach or mountain living has only one drawback—sanitation facilities! Septic tanks are lifesavers for those who live away from city sewer systems. But septic tanks can, and do, stop-up and overflow! First, because the tank is not cleaned at proper intervals; secondly, toilet tissue that does not readily disintegrate may clog the drains and force them to back up!

Sharptail Grouse Spotted in State

Information on one of Oregon's former abundant game species has been turned up recently by game commission field agent Karl Morton, working out of Baker.

On March 30, Morton was working in the area of Glasgow butte in the lower Powder river valley east of Baker and spotted four sharp-tailed grouse.

These birds, commonly called "prairie chickens" by many, were at one time numerous in Oregon but have proven to be quite incompatible with modern agricultural uses of land.

This is the first authenticated report of these birds in the state since Morton noted one of the birds last September.

POE VALLEY SEWETTES

Our club met April 4 at our leaders home, Mrs. Reiling, and she also served refreshments. There was no business meeting. We are going to have two more meetings of this club. We have finished the sachets for the County Farm Home. The next meeting will be at the Community Hall.

Cheryl West

HENLEY BEEF CLUB

The club held the fifth regular meeting, April 10, at the home of Betty, Peter, and Rosie Scala. Those present were: Bob Brower, Jim Cheyne, Tim White, Dick Dehlinger, Betty Scala, Peter Scala, Rosie Scala, Rod Wright, Henry Williams, Ted Barry, and Tom Wright.

Before the meeting the leader, Stan Masten, and two members weighed the calves.

At the meeting Stan Masten gave a demonstration on trimming the head of the calf.

The meeting was adjourned and refreshments were served by Mrs. Scala.

Tom Wright

BONANZA BEEF CLUB

The club had their monthly meeting on April 6, at the Bonanza High School. A summary of weights of calves, feed and cost of feeds were discussed. It was observed in our last weighing tour that some of the calves were in need of more training but as a whole the calves are doing fine and the other calf clubs can expect some competition this fall. One of the meeting's activities was singing. Songs sang were: "My Oregon," "Home on the Range," and "I'm Looking over a 4-H Clover."

Joe Hoefler, Billy Liskey, Rex Porterfield, and Bob Liskey each gave a one minute talk on calf handling, training, washing, and clipping. Each member wrote a regular monthly report on calves progress, weight, feed and etc.

The meeting was then adjourned.

Bill Dearborn

Farm Dams In Way of Fish

Farm ponds, used primarily for irrigation and stock watering purposes, are being constructed in increasing numbers throughout the state, and according to Fred Locks, chief of lake and stream management for the game commission, many are located on small streams used by cutthroat and rainbow for spawning. All too frequently the dams either have no fish passage facility, or the facility is inadequate. The small tributary or feeder streams are natural spawning grounds for native cutthroat in western Oregon and rainbow in the eastern part of the state. The cumulative effect of barring cutthroat or rainbow from the many miles

of natural spawning area can be disastrous according to Mr. Locke. This situation is particularly acute in the Willamette valley. The game commission will institute a statewide study of this problem pointed at developing a blueprint for farm pond location and determining where the fadding of farm pond dams is essential.

Mr. Locke added that the game commission recognizes the importance of farm ponds not only for

the primary purposes for which they are intended but also for fish production and that there is no intent on the part of the commission to attempt to curtail their construction. In former years few ponds were constructed, and the problem was not acute, but the rapid increase in the number of ponds in recent years demands that adequate fish passage facilities be provided.

SPECIALS THURS., FRIDAY and SATURDAY

MRS. SMITH HAS STARS IN HER EYES

She's just a bit on the romantic side—and is taken in, sometimes, by so-called "Specials." But, many times these specials are misleading. We think most folks like to shop week in and week out where they are confident they do better throughout the store on ALL their purchases! We still think there's room for some good, old fashioned honesty in business—so we play fair with you.
