U.S. Nat'l Deposits Increase

The United States National bank recorded an increase of more than 28 million dollars in deposits since a year ago. Deposits for the state-wide system as of April 15 totaled \$645,536,494, according to W. A. Huggins, manager.

Loans and discounts also continued to increase in line with business expansion within the state and now stand at \$241,307,748. U.S. National now lists total resources of \$701,186,584, a gain of more than 40 million dollars during the past 12 months.

Plans are now being made for nursing service in the event of disaster. Mrs. Lee Musselman, president of the District Nurses Association, states that there are not enough registered nurses in the county to completely staff the nursing teams, in addition to the number on active duty at the hospitals. In the event of disaster, home nursing students would be used to assist and supplement the work of the registered nurses.

Anyone interested in taking a home nursing course in order to qualify for a civil defense volunteer is asked to call the Red Cross headquarters.

Capital stock of the United States National bank was increased from \$14,000,000 to \$16,000,000 by a stock dividend of 100,000 shares approved by the shareholders in January. This action has increased the bank's loaning capacity, placing it in an even stronger position to finance business and agricultural growth of the state.

The U.S. National is vitally interested in this community and the state," commented Huggins. "We shall continue to serve the banking needs of business, industry, agriculture and individuals."

The first brick building in San Francisco, and the second in California, was built in 1848 by the mercantile firm of Meilus and Howard.
