Speed Limit Signs Urged

PORTLAND (AP)—A proposal that speed limits be posted on the state's highways — varying from place to place based on local conditions — was approved by a sub-committee of the Oregon Highway Lifesavers Tuesday.

The proposal, made on a motion by R. H. Baldock, state highway engineer, retains the principle of Oregon's "basic rule" that top speeds shall be whatever is safe for the conditions at the time. It does this by suggesting if posted speed be exceeded, the motorist be required to prove it safe at the time, and if police arrest a motorist posted speed, police be required to prove that the posted speed would not be safe under the conditions at the time.

This chief point, brought out by Robert C. Nelson, Oregonian managing editor who made the suggestion on which Baldock's motion was based, was that the posted signs would take the place of the opinions of motorists and police as to what speed is reasonable and safe under normal conditions.

The posted speeds would be based on a survey to be made by the state speed Control Board or the Highway Commission.

The sub-committee proposal will be submitted to the full group with a recommendation it be submitted to the legislature.
