

Red Cross Directors Hold Meeting

September 29 has been set as the date for the annual meeting of the Klamath County Red Cross Chapter. The date was set at a meeting of the board of directors, July 19 at the Winema Hotel with R. H. Tidale, chapter chairman presiding. Other members of the board present were Mike Balsiger,

Jim Kerns, Julius Quintoni, Deb Addison, Nelson Reed, Frank Sexton, Dr. Boyd Sprague, A. L. Grapp and Dr. William G. Holford Jr.

Nelson Reed was appointed chairman of the annual meeting. Officers and ten new directors are elected annually. Deb Addison, Julius Quintoni and Mrs. Larry Watkins were appointed as a nominating committee.

Liquor Funds Distributed

More than 15 million dollars was distributed by the Oregon liquor control commission during the 12 months ending June 30 — the greatest yearly allocation in its 20-year history. The commission reported that \$13,082,596 went to the state general fund, \$1,240,276 to incorporated cities and \$914,822 to counties.

The record distribution is not matched by a rise in liquor sales, the commission emphasized. More money was distributed during the last fiscal year because less was required for working capital, and it was possible to release accumulated funds withheld for investment in inventories. Liquor purchasers spent only \$168,738 more for liquor during the year.

Of the amount distributed \$13,398,288 came from liquor revenue and sale of purchaser's permits; \$1,185,816 from privilege taxes; and \$654,080 from license fees.

Virginia Dixon, executive secretary, reported that on July 16th she had been elected to serve as president of the Northwest Association of Red Cross chapter executives, and was authorized by the board to accept the position and attend quarterly meetings in Portland. The association is composed of chapter executives from Oregon and Washington.

Reports were given to the meeting concerning the present status of the blood program. Red Cross has been requested by the Secretary of Defense and the Office of

HST On First Trip Since Operation

KANSAS CITY, Mo. — Former President Harry S. Truman took his first automobile ride yesterday since leaving Research Hospital, where he underwent surgery for removal of his gall bladder and appendix June 20.

"The trip apparently didn't tire him at all," said Mrs. Truman. "He seems to be getting stronger all the time."

Vote Approves TL Bond Issue

TULELAKE—Voters went to the polls yesterday to approve a \$35,000 general obligation bond issue for extension of the city's sewer lines to include the second addition to the townsite and the new Tulelake-Butte Valley fairgrounds.

The vote was 119 for and 24 against.

Construction of 28 new homes by a development company hinges largely on an affirmative vote on the proposal.

The bonds will be retired in 20 years from taxes paid by property owners of the new addition.

We did not reduce the quality of our Auto Insurance when we reduced our rates, 627 Pine St.

Fantastic Flights Now Routine

ALAMOGORDO, N. M. — The fantastic has become routine in little more than five years at Holoman Air Development Center.

Any week and every week rockets can be shot 90 miles up into space, carrying incredibly complex electronic instruments to ask questions and get answers on what's what up there.

For instance, one mission of the last 20-foot Aerobee rocket whooshed upwards from the White Sands desert floor was checking wind velocity and direction in the upper atmosphere.

The rocket itself hurtles upward at supersonic speed—not very much less than a mile a second or 3,600 miles an hour.

The wind check instruments and tiny vanes mounted in jeweled bearings. What they find out is recorded by electronic method.

All the rocket checks—on temperature, radiation, light and chemical changes—have a military purpose. Missiles are being developed that fly or will fly in these altitudes.

Instruments to guide these missiles must be perfected. How upper atmosphere conditions affect this guiding gear must be learned.

The Air Force Cambridge Research Center, at Cambridge, Mass., assigns rocket missions to such schools as Michigan, Colorado, Utah and Rhode Island universities and correlates the findings.
