"This House Painted in Just 3 Hours!" With No-Motor Sprayer and Spray Kote Paint Says...Ernie Bishop 2027 Earle

Extraordinary... "amazing"... "unbelievable"... are typical reports coming from more and more home-owners who have painted their own homes with the revolutionary No-Motor Sprayer and special high-quality Spra-Kote Paints.

And no wonder! For here is the newest, neatest, fastest and most economical way yet devised to give your home new beauty that will last for years. You'll realize savings up to 80%... complete the job 7 to 5 times faster than ordinary brush painting and have fun doing it.

Using an entirely new principle in spray-painting, the No-Motor Sprayer is completely portable, using harmless CO2 gas as the pressure source to apply a non-fogging, high-quality coat of paint to your home. Requiring no electric motor or compressor, you simply turn a small valve... and in five seconds there's a steady flow of 80 pounds pressure which "pushes" an even, confined coat of paint onto the surface of your home.

Special, heavy-bodied Spra-Kote paints are used which require no thinning or other messy preparation. You may select from a wide range of attractive, lasting colors. As a free special service, the Spra-Kote man brings you in sure, quick methods to get you started. In just 30 minutes anyone becomes an expert. K. C. Paint Store at 520 Klamath Ave. rents the No-Motor Sprayer for less than you'd pay for a quality brush.
