

### It Happened This Way in New Pine Creek

By IRVIN FARIS  
It's quiet and hot. Even the elements refuse to budge. About the only thing that's moving are the ants, the beetles and the earwigs—damn 'em! I'm about to go bugs myself. Better I guess to

go into the bantam business. There's enough bugs on this place to keep a hundred bantams in fresh meat every day for a year.

"There goes an earwig on the wall!" Bob just hollered, thinking it was somewhat unusual. But I've been seen 'em on the walls, in the newspapers and—every little bit during the day. You can almost pick up your tooth brush and find one under it.

planes passing over, I was very conscious to a droning motor when stepping outside one hot day last week. I looked intently up into the deep blue sky until I nearly threw a kink in the neck. Yes—"sure-an' b'gory there was a plane somewhere—but where?"

After craning some more I gave up and returned inside. The next day I stepped out again on the front porch for something and it was the same thing all over again. Slightly mystified, I asked a native.

"Where in heck is that plane—it sounds so near and—no see 'im."

"Plane," said the fellow. "That's no plane—that's James Wadlow's air conditioner a-goin'."

"I'll be—," I calculated. The thermometer reading was 93 degrees. "If that hot cools that little house in proportion to it's hum—bet James has his coat on by now."

He never froze out. I guess, for it keeps hummin' thataway every day now.

Alvin Butler was about first to get his alfalfa hay up so he and his wife took off for a rest cure on the Sprague River some place—to fish and relax for a few days.

They slipped 'em into Pine Creek, Lassen Creek, Davis Creek, Swereng Creek and Joseph Creek. He explained the reason this area got so many fish was because Annie Reservoir was too low to hold them. They originally had been slated for that spot of water. Fishing in Pine Creek has again become popular with limits being caught regularly.

Wellman Smith has been doing his annual assessment work up at the Moonlight Mine and also working on the Golden Star and the Brick Bat Ore property. In addition to this required annual assessment work he has the contract on the school section up

in the High Grade district which is owned by Mrs. Roy Baker of Alturas and Cluel Lowell of Fort Bidwell, of blasting in and filling up all the old shafts of the area.

The purpose of the work is to make the area safe for vacationers and deer hunters this fall. He has been working on this project since the first of the month. So far he has used up ten cases of dynamite. Some of the old shafts reach down as far as 375 feet such as the old High Grade Mine owned formerly by the Wrisley Chewing Gum people. In this task, bulldozing is required. Smith was given the contract for this work because he grew up in this locality and, being interested in mining all his life, knows where all the old shafts are located.

The lad who was working on a distant MC ranch was crushed to death when the horse he was riding began bucking down a rocky hillside and fell. While falling the horse broke all four legs and landed on the young rider, crushing his head. Funeral services were also attended by Mr. and Mrs. Ed Hartzog. Mr. Hartzog is also a relative of the youngster who met such a sudden, untimely death.
