Reportedly due to high operating costs of building a new logging road, operations of the Modoc

Lumber Co. at the U.S. Forest service family division came to a close last week, when the last truckloads of the cut logs were hauled to the company's mill in Klamath Falls. The crew of timber fallers finished cutting trees some time ago, and with the completion of final details, logging came to a halt. Future plans of the company in this area are unknown at this time, but rumor has it that next spring, work will again start up.

The Fort Klamath Garage building and gasoline pumps were treated to a new coat of paint in the orange, red and cream colors of the Shell Oil Company last week. Doing the work were Robert Derby and Virgil Peebler of Roper and Roper, painting contracting firm of Klamath Falls. Strong Anti-Red Sentiment Told

WASHINGTON (AP)—Five Chinese who served in the Communist army in Korea say there is strong anti-Red sentiment in the Chinese Communist army.

The Chinese, who were taken prisoner in Korea by U.N. forces, refused repatriation and elected to go to Formosa. They are on a tour under sponsorship of the Chinese Nationalist government on Formosa.

Speaking through interpreters, they told a news conference yesterday at the Pentagon that there would be large-scale defections in the Chinese Communist army should the Nationalists invade the mainland.

Beautiful homes of wood...designed for better living

Wood is the only building material that is readily adaptable to all types of architecture... contemporary, ranch style, Cape Cod or traditional. Color schemes are easily and economically changed. Additions or improvements can be made at moderate cost. Wood has natural insulating qualities for warmth in winter and coolness in summer. The advantages of lumber and plywood are so many that it's no wonder 8 out of 10 homes in America today are built of wood. Yet, if wood is to continue to successfully meet the growing competition from other materials, its merits must be told again and again to prospective builders. Remember, wood must compete with them all... concrete, brick, aluminum, plastic, glass, compositions and steel.
