Chevrolet To Show New Line

Pronounced mechanical advances plus new riding comfort and a complete restyling of bodies give Chevrolet for 1955 its most spectacular model announcement.

No major part of the car has been overlooked in the broadscale improvement program. Driving ease and riding comfort benefit along with the creation of fresh automotive design. The accomplishment, says the company, has been possible only because of a thorough job of product re-engineering and the tremendous new plant facilities Chevrolet adds this year.

The 1955 models will go on display at dealer showrooms nationally tomorrow (October 28). From an extraordinarily long list of new features the public will see at that time, these are particularly outstanding:

1 — First automobiles in the low-price field to reflect the "dream car" influence of the General Motors Motoramas. All roofs have been visibly lowered with a corresponding reduction in hood and belt lines to accentuate a longer, sleeker appearance. Overall, sedans have been lowered two and one-half inches, station wagons as much as six. At the same time, passenger room has been increased.

2 — First V8 engine offered on a Chevrolet in 35 years. Profiting by recent research in combustion and manufacturing techniques, the V8

and new quietness and smoothness in two "Blue Flame" sixes. Engines are of the traditional valve-in-head design, which in the last few years has won virtually 100 per cent acceptance by other power.

Re-Elect
JERRY RAJNUS
COUNTY COMMISSIONER

- For betterment of Klamath County
- Your support and vote will be very much appreciated.

Pd. Adv.—J. Rajnus

"7" WON'T WORK

here's why

- Means a better than \$3,200,000 direct loss in income from our state's economy.
- Will add at least 1,860 people to Oregon's unemployment rolls and idle over \$11,680,000 worth of equipment.
- Grabs more than 37% of the state's salmon resource (at least 4,000,000 lbs. annually) as a private fish preserve for a handful of salmon fishermen.
- Will destroy the fish commission's program of salmon conservation and propagation in coastal streams.

VOTE 7 X NO
