

PRIMARY TEACHERS of Klamath County viewed the new county library at a recent meeting. Here—coming down the stairs from the second floor where the lecture room is located are, reading top to bottom, left, Aura Mitchell, and right, Jeanette Jackson, of the county group, both of Henley; center, Mrs. Martha Lander, Fairhaven and lower step, left, Mrs. Irene Jelinek, Malin and Mrs. Loy Barker, Altamont secretary.

Teachers Hold County Meet

Klamath County Primary Teachers met November 15 at the new Klamath County Library with a coffee hour at 9:30 a.m. followed by a business meeting. Jeanette Jackson, president, presided. Theme for this year's conservation program in the county schools is "Minerals." Displays of progress made in the various school groups were shown. Grade meetings were held with representatives from all grades. The first grade groups discussed "Our Achievement Testing Program;" the second grade, "Spelling and Writing in Early Second Grade;" and the third grade topic was "Writing and Other Problems of the Early Third Grade." Irma Wood, children's librarian for the county, gave an interest-

ing talk on "Books for Little People." A conducted tour of the new building followed the meeting.

Pain From Nerve Ailment Stopped By Wonder Drug

By ALTON L. BLAKESLEE
AP Science Reporter
ATLANTIC CITY, N.J. (AP)—The "worst pain in the world" is being stopped by curious new drug described today by the American College of Surgeons.

The pain comes from a nerve ailment in the face—tic douloureux—fairly common after 40. Attacks can last steadily for two to three weeks. Victims can't eat, or even shave. Some commit suicide from the agony. Many doctors agree with victims that it's the worst pain in the world.

Surgery cutting the face nerve has been the best remedy. But that causes loss of all sensation in one side of the face, sometimes leads to eye complications and loss of an eye.

A fairly new drug, tibamidine, seems to paralyze or somehow strike at the face nerve causing all the pain. And it apparently acts only on that nerve.

months at least. Other medical treatments haven't extended that freedom period much more than six months.
