

### Oregon Cattlemen Support U.S. Savings Bonds Drive

The Oregon Cattlemen's Association has joined the American National Cattlemen's Association in making December "Cattlemen's Bond Month" for the promotion of U.S. Savings Bonds buying among its members. This was announced today by Mr. J. C. Cecil, of Burns, president of the OCA, through its headquarters here.

### Two Killed In Church Crowd

MEXICO CITY (AP)—Two persons were killed and about 400 injured in the crush Sunday as an estimated half million Catholic pilgrims converged on the shrine of Mexico's patron saint, the Virgin of Guadalupe.

The annual pilgrimage to the basilica on Mexico City's outskirts was the third largest in history. The only larger throngs gathered in 1931—the 400th anniversary of the church-recognized appearance of the Virgin Mary in Mexico—and in 1945 for coronation rites following the Vatican's official acknowledgment of the miracle.

About 100 foreign groups, more than half of them from the United States, took part, church officials said. Other groups came from Latin American countries and from all over Mexico.

For hours the tremendous crowds pushed forward doggedly inch by inch, to get into the leaning old church that Mexicans believe they must visit at least once. The plaza in front of the basilica was a tight mass of humanity, broken here and there by white Red Cross tents and ambulances. Of those injured, five required operations and 125 were held in hospitals for treatment.

### Two Pilots Die In Jet Crash

GIG HARBOR, Wash. (AP)—Two Air Force pilots were killed yesterday in a collision of their Sabrejet planes across Puget Sound from McChord Air Force Base.

The dead were 1st Lt. James L. Teelink, 25, of Oakland, Calif., and 2nd Lt. Donald L. Mooltry, 24, son of Mrs. Hazel Fern Lynch, of Los Angeles, and William Mootry, of Salem, Ore.

against plunging the world into war. "The survival of our American system of individual enterprise will depend in the end on how well we make it work," he continued. "The struggle is for the minds of men, and blowing people to bits with super-bombs will not solve the problem; it can only create chaos and ruin. We have to be prepared to defend ourselves so effectively that aggressors will realize that starting another world war would be suicidal. But the basic problem is to convince the peoples of the world that the way of freedom is the better way to a richer and fuller life."

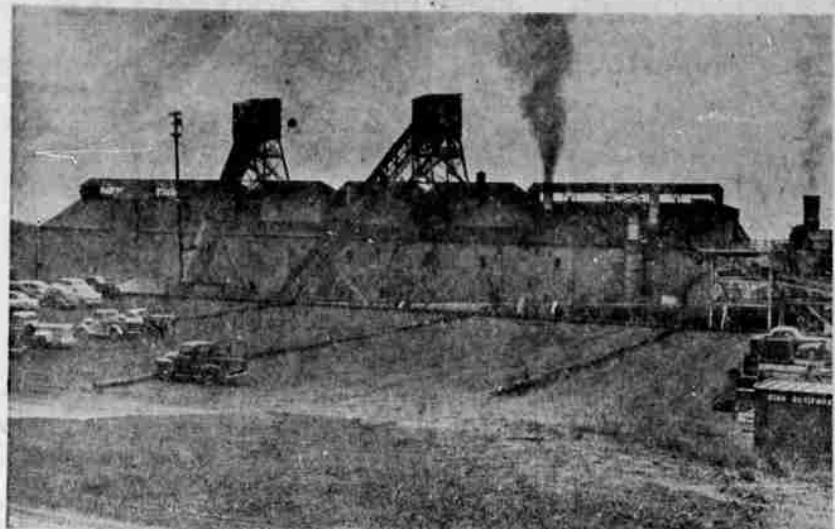

"If world war is avoided, the next few years can see an advance in our productive power through the use of atomic energy that could dwarf the results of the invention of the steam engine. If there ever was a time when we could afford an economic setback, this is defense program to protect our freedom and discourage aggressors."

should be supporting every move in the direction of economic stability, and the Savings Bonds program is certainly one that deserves our support."

"Mr. Cecil added that individual Americans now own over 37 billion dollars, present cash value, in Series E Savings Bonds and over a billion dollars in the new current income Series H Bond, which resembles the E Bond in term and yield but pays interest by Treasury check twice a year instead of adding the interest to the cash value.

"Sales of these bonds this year are the largest since wartime 1945," he concluded, "and redemptions are down. Also 75 per cent of the dollar value of the E Bonds that have matured, beginning in

May, 1951, is still invested in the original bonds under the extended maturity option which allows them to go on increasing in value each six months for up to 10 years beyond the original maturity."

**THIRTY MILLION DOLLAR SOUTHERN OREGON DEVELOPMENT** — These two pictures illustrate sketchily what happens when modern technology and hitherto undeveloped raw material resources come together. The upper picture shows the smelter building at the Hanna Nickel Smelting Company's operation at Riddle, in Douglas County. Shown below is the hogged fuel conveyor that feeds furnaces where the ore is dried. Also visible are ore stacking equipment, a pile of ore in the stockpile grounds and, at left, an end view of the ore reclaiming tunnel. The ore comes from Nickel Mountain, a mass of low-grade nickel ore at the edge of the town of Riddle. New processes have made its development possible. A total of some 30 million dollars is being spent in the project. A new development of similar magnitude for the Klamath Basin is possible through utilization of jackpine, formerly regarded as useless, but now recognized as one of the most valuable pulp woods in the West.

### KLAMATH FURNITURE CO. COMPLETE HOOVER

- SALES
- SERVICE
- PARTS

Fast, expert, efficient service on your present Hoover or... trade your present cleaner on a new Hoover upright or tank model.
