

### AFL Sailors Okay 'Most Powerful' V-8 Engines Highlight 1956 Packards

**New Contract**  
 SAN FRANCISCO (UP)—Members of the AFL Sailors Union of the Pacific have voted overwhelmingly to approve a new contract with West Coast ship operators providing a \$25 monthly raise.  
 Harry Johnson, assistant secretary of the union, said yesterday that the contract also fixes as a basic part of salaries the sum of \$96 a month, heretofore considered "penalty pay."  
 As a result, the new contract will raise base pay for most sailors from \$802 to \$827 a month.  
 The pact affects some 8000 able-bodied seamen.

DETROIT (AP)—Electrically activated push-button automatic transmissions, numerous safety features and "the biggest and most powerful V-8 engines in the industry" will feature the 1956 Packard automobiles.  
 Studebaker will present new V-8 and six-cylinder passenger cars, described by company sources as the biggest and most powerful the company has ever produced; a line of high-powered, sports-type cars; a series of sedan-type station wagons, and a more powerful line of trucks.  
 These facts were disclosed Tuesday as Studebaker-Packard placed its 1956 line of cars on display for a preview audience of press, radio, television and magazine writers.  
 Full mechanical and engineering details were not disclosed for publication. James J. Nance, president, said, however, that the Studebaker passenger car line "will be the only all-new line in the low price field for 1956."  
 He said the Clipper models, covering the medium price field, will have torsion bar suspension and new, more powerful V-8 engines.  
 The Packard push-button shifting device is located on the

steering column for right hand operation. An upper row of three buttons provides neutral, low and high gear; a lower row provides a "park" lock, reverse and drive buttons. The high and drive gears provide two ranges of touring speed.  
 Removal of the ignition key at any gear step automatically locks the car in park. It cannot be disengaged without replacing the ignition key.  
 All cars will have the new Packard non-slip differential. This does away with the hazard of a drive wheel spinning on ice at the

curb and aids in cornering by transferring drive power to the wheel in the clear.  
 Other safety features include new door latches; safety rim wheels; new safety-finned brakes that aid in cooling; crash-tested lap belts and new safety beam headlights.  
**SAILORS TO RUSSIA**  
 MOSCOW (AP)—The first British naval squadron to visit a Soviet port since World War II will sail into Leningrad harbor Oct. 12. The same day six Russian warships arrive at the British naval base at Portsmouth for an exchange visit.

**Fort Rock Scouts Get Den Charter**  
 FORT ROCK—Bobcat pins and the charter for neighborhood Den No. 8 were presented in induction ceremonies conducted Wednesday night, September 21 by Jack Mangus, field executive for scouts in this area. New Cub Scouts are

The Fort Rock pack is the first neighborhood den to be organized.

### FALSE TEETH That Loosen Need Not Embarrass

Many wearers of false teeth have suffered real embarrassment because their plate dropped, slipped or wobbled at just the wrong time. Do not live in fear of this happening to you. Just sprinkle a little FASTERITE, the alkaline (non-acid) powder, on your plates. Hold false teeth more firmly, so they feel more comfortable. Does not sour. Checks "plate odor" (denture breath). Get FASTERITE at any drug counter.
